

Arizona NO₂/SO₂ Infrastructure State Implementation Plan (iSIP)

Briefing for the Regional Administrator

July 26, 2018

What is an Infrastructure SIP (iSIP)?

- An iSIP is a SIP that provides the framework for a state's air quality program.
 - Requires states to demonstrate authorities to permit, enforce requirements, and implement programs to ensure that emissions do not interfere with air quality or visibility in other states (interstate visibility/regional haze).
- Each state needs to have an iSIP for each National Ambient Air Quality Standard (NAAQS).
- The Clean Air Act (CAA) defines the required elements of an iSIP. Each element has one or more provisions that support the overall program.

California Bay Delta Overview

June 21, 2018

The Basics: California Water

CA's Federal and State (CVP & SWP) Water Infrastructure alone includes:

- 54 dams & reservoirs (22 MAF)
- 1200 miles of canals

Local – examples

- EBMUD – Mokelumne Aqueduct
- SFPUC – Hetch Hetchy Aqueduct
- Santa Clara Valley Water District

Why is the Delta Important?

- 2/3 of Californians rely on Delta Water
- Irrigation for 45% of the nation's fruits and vegetables
- Largest West Coast Estuary
- Habitat for 700 Species, several listed under the ESA
- 2 ports, 3 railroads, other infrastructure
- Recreation

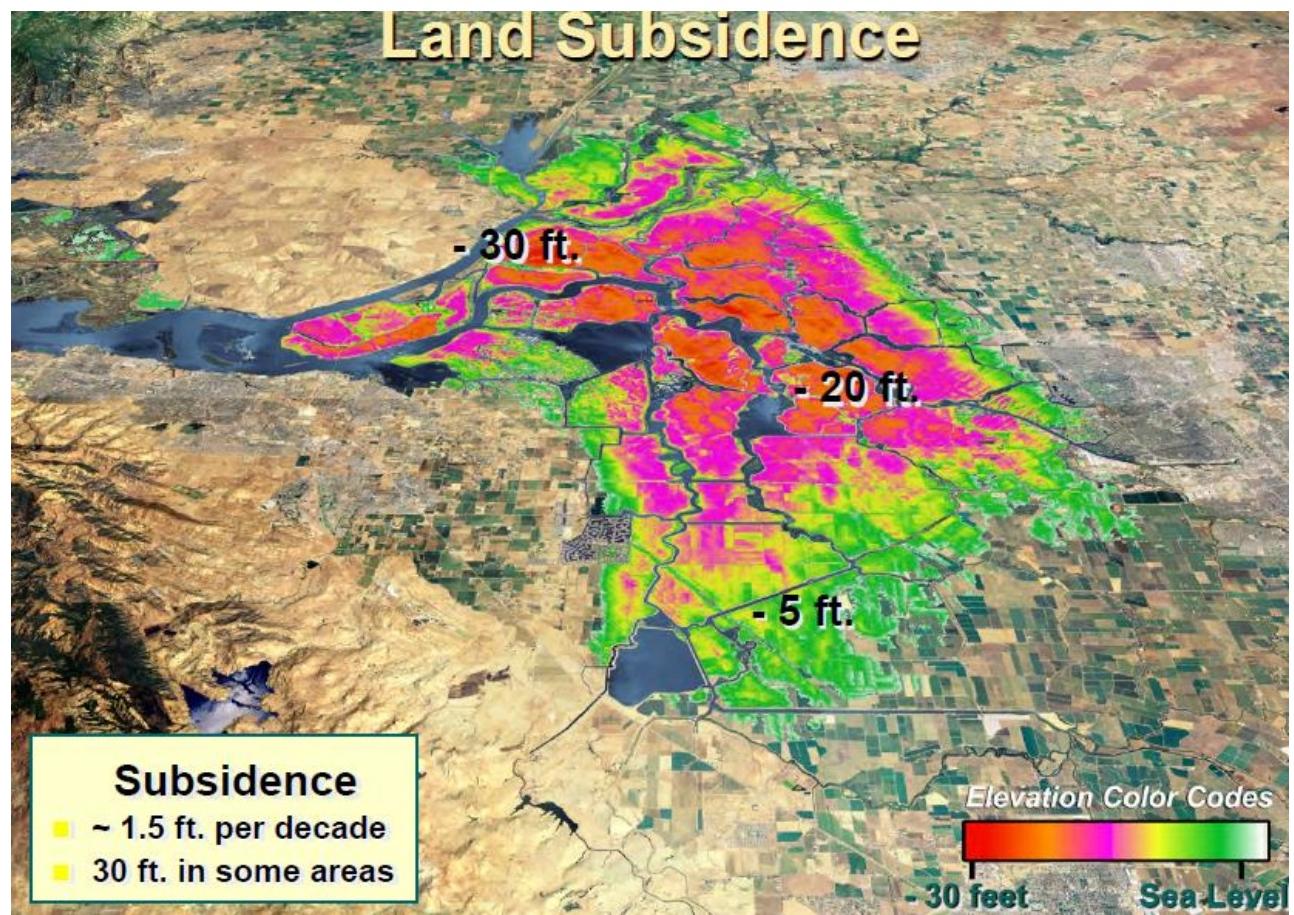

Designated Uses at Stake

- Agriculture – In Delta and broader
- Drinking Water
- Aquatic Life
 - Fisheries – Commercial & Recreational
 - Waterfowl
- Recreation

Delta Hazards

- Land subsidence
- Earthquakes
- Sea Level Rise,
Less Snowpack &
Extreme Storms
- Wave action
- Gophers
- Levee collapse
means salt water
for S. CA. & Ag
Lands

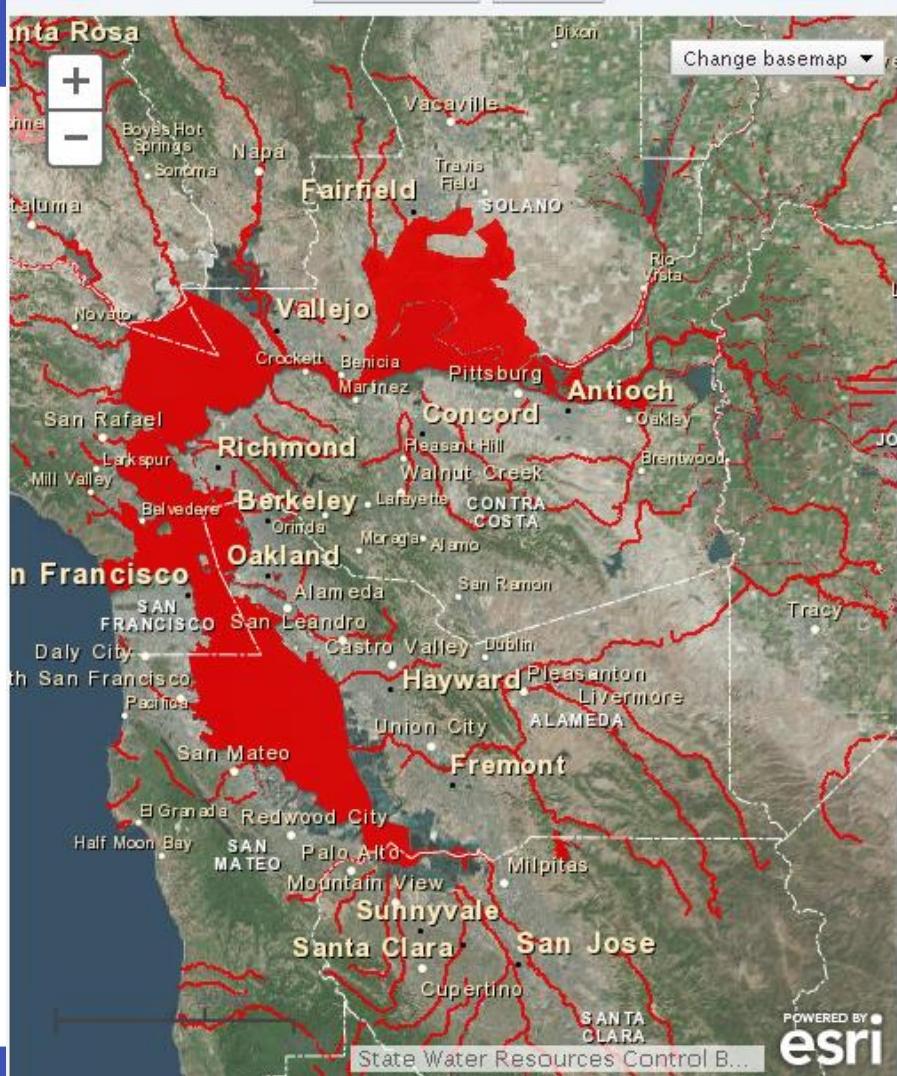

Impaired Waterways

Waterways in the SF Bay and Delta are impaired for:

- Pesticide-caused aquatic toxicity
- Low dissolved oxygen/nutrient enrichment
- Metals – selenium & mercury
- Salinity
- Sediment
- Pathogens
- Invasive species
- Tributaries: temperature

Emerging Issue: Harmful Algal Blooms

Invasive Species

- 185 alien aquatic and plant species in the Delta
- Of particular note: Striped Bass, Asian clams & aquatic weeds

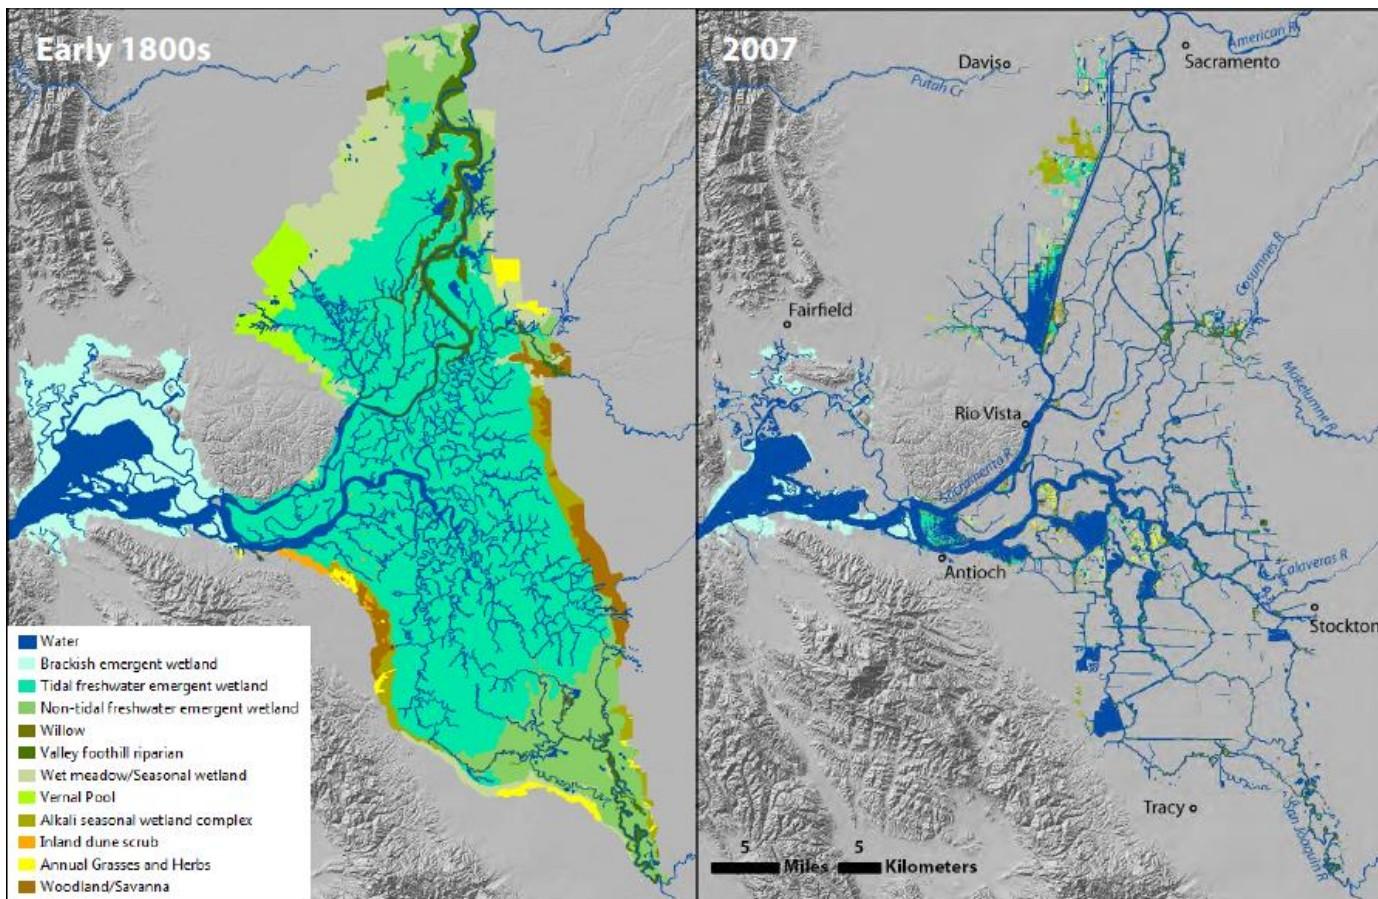

Picture: Mechanical harvesting of water hyacinth at the Stockton Yacht Club, 2014.

Photocredit: <http://baynature.org/article/water-hyacinth-thrives-drought-stricken-delta/>

Habitat Loss

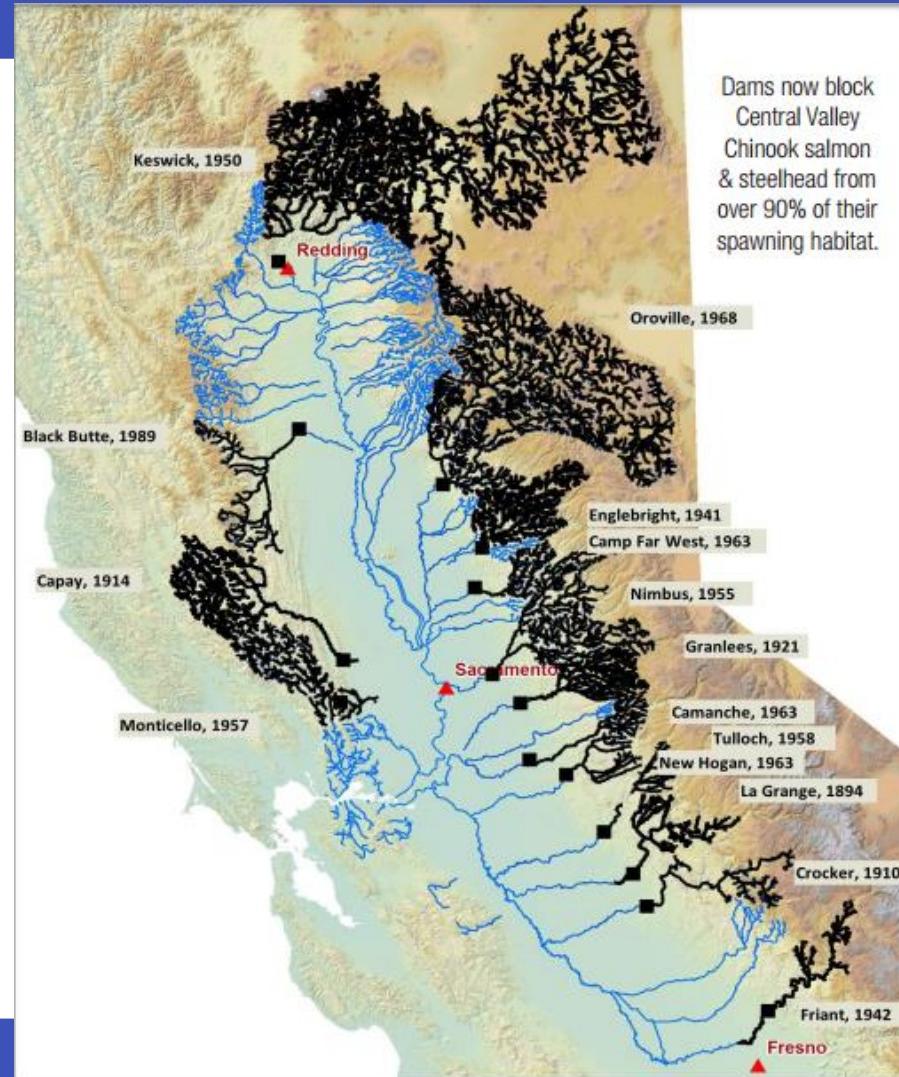

95% of the tidal wetlands in the Bay Delta have been leveed and/or filled

Source: SFEI 3/27/12 Presentation at LSZ Workshop available at <http://www.epa.gov/sfbay-delta/pdfs/hist-estuarine-gradient-epa-grossinger.pdf>

Upstream Habitat Loss

Dams now block
migratory fish
species from over
90% of their
spawning habitat.

Endangered Species

- Winter Run Chinook Salmon
- Spring Run Salmon
- Central Valley Steelhead
- Green Sturgeon
- Delta Smelt

Delta Smelt Juveniles

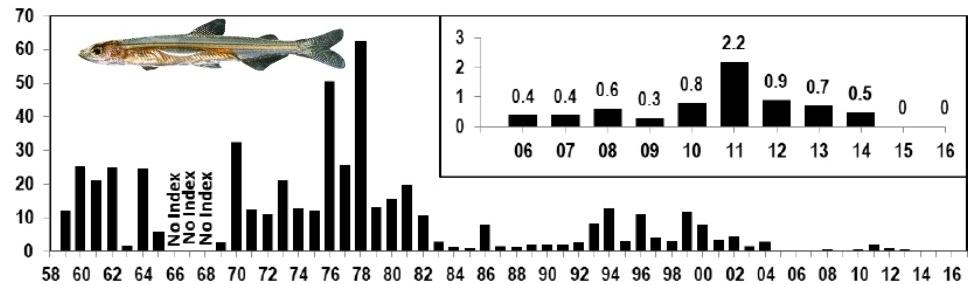

Figure 1. Summer Trawl Survey annual abundance indices 1959-2016 with inset showing indices from 2006 to 2016.

- Close to zero Delta smelt juvenile index for a decade. Zero last 2 years.

Multiple Stressors, Acting in Concert

- Habitat Modification
- Flow Regime
- Entrainment at the Pumps
- Contaminants
- Invasive Species

(Taken from EPA's Action Plan and Related Material, 2012)

WaterFix (aka the Tunnels)

EPA's Upcoming Roles

- Review of NEPA documents for WaterFix
- Review of State Water Board's revised water quality standards

EPA's 309 Review of WaterFix

NEPA Actions

- DEIS Comment Letter August 2014
- SDEIS Rating Letter October 2015
- FEIS Letter Jan. 2017

Ex. (b)(5): Internal Deliberative

Water Quality Standards (CWA 303) Overview

- Water Quality Standards (WQS) include (a) designated uses, (b) water quality criteria (numeric or narrative) to protect those designated uses, and (c) antidegradation requirements.
- States are primarily responsible for setting WQS. EPA has an oversight role, and MUST review and approve or disapprove any “new or revised” WQS.
- EPA required to consult with Services (ESA Section 7) for standards actions.

Water Quality Standards Updates

- California (State Water Board) is updating Water Quality Standards in the Bay-Delta; Board has stated that existing standards are not protective of aquatic life
- These WQS are contained in a special purpose Water Quality Control Plan (WQCP) for the Bay and Delta
- Phase I – South Delta & San Joaquin River and its tributaries
- Phase II – Sacramento-San Joaquin Delta

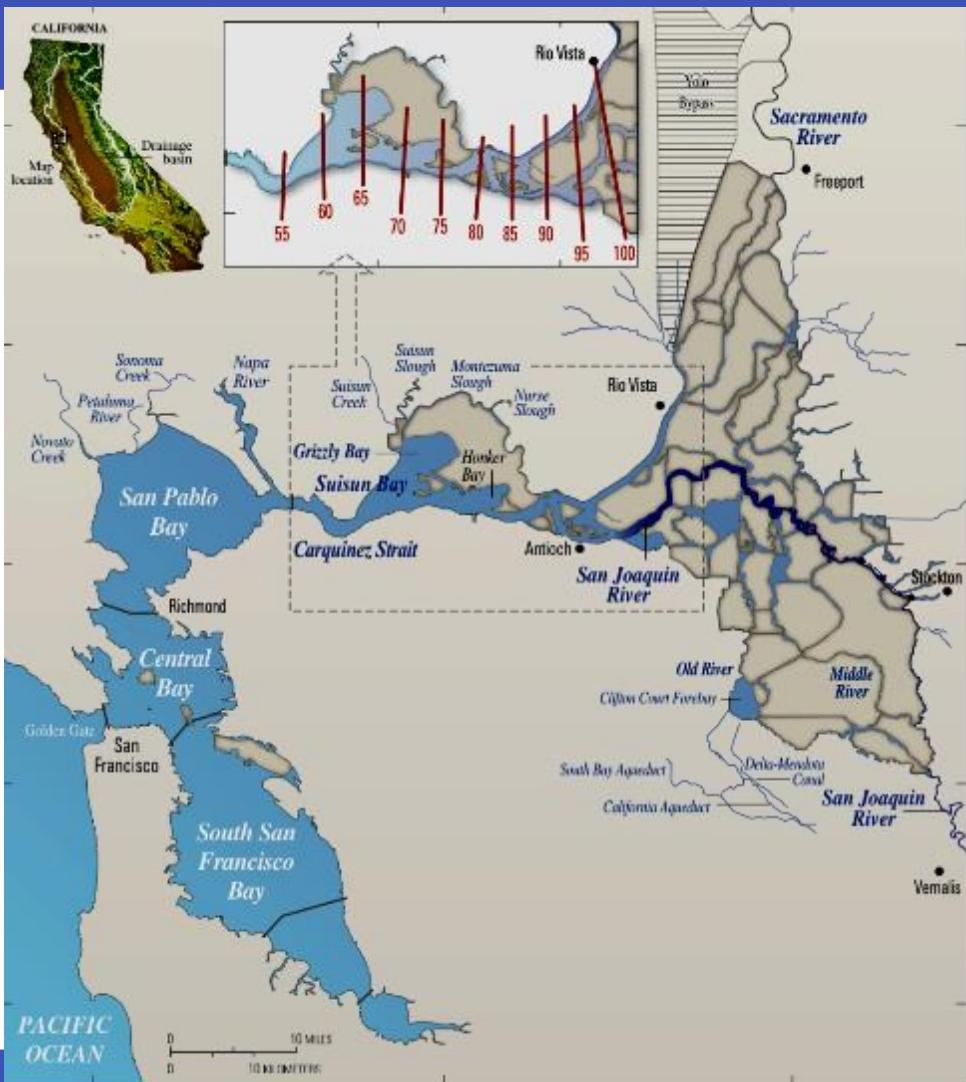

Phase I: Water Quality Standards Updates

Ex. (b)(5): Internal Deliberative

Phase II WQS Updates

Mike Stoker Meet and Greet

July 24, 2018, 4pm

CBRT – 1301 I Street, Sacramento, CA 95814

Attendees

<u>Name</u>	<u>Company</u>	<u>Title</u>	<u>Brief Bio</u>
Christina Sistrunk	Aera Energy	Chief Executive Officer	Became president and CEO in 2015. Prior to that she worked at Shell, where she held several key technical and management positions at both the national and international level.
Nicole Parra	Andeavor	Manager, State Government Affairs	Former state legislator (2002-2008) representing the central valley. Andeavor is a premier marketing, logistics and refining company with operations primarily located in the western and mid-continent United States.
Rock Zierman	CA Independent Petroleum Association	Chief Executive Officer	Rock Zierman, Chief Executive Officer, has worked with CIPA since October 2002. Prior to being appointed CEO, Rock served as both the Director of Public Affairs for CIPA, and the Executive Director of the California Natural Gas Producers Association (CNGPA), a wholly owned subsidiary organization of CIPA. Prior to joining CIPA, Rock served as Chief of Staff to Assemblyman Mike Briggs (Fresno). Rock has also served in the offices of Assemblymembers Chuck Quackenbush (San Jose), Tom Bordonaro (Paso Robles), and Robert Prenter (Hanford).
Rex Hime	California Business Properties Association	President and CEO	Prior to joining California Business Properties Association (CBPA), Rex served on then Governor Reagan's educational staff and as Assistant to the Director for the State Department of Consumer Affairs. Later he was the Executive Director of the California State Commission for Economic Development, Director for the California Commission on Agriculture and as a Special Assistant to the Lieutenant Governor. His legislative experience includes service as

			the Senior Assistant to the Minority Leader of the California State Assembly.
Dorothy Rothrock	California Manufacturers & Technology Association	President	Before coming to CMTA in February 2000 she consulted on energy and telecommunications regulatory issues for industrial energy users, policy advocates, and economic research firms. She began her career at Portland General Corporation as an attorney, moving to management positions in commercial operations, public affairs and power marketing prior to relocating to California in 1990.
Todd Stevens	California Resources Corporation	President and CEO	Prior to CRC, Mr. Stevens worked for 20 years in various management positions at Occidental Petroleum Corporation and most recently served as Vice President, Corporate Development. During his career with Occidental, he led most of Occidental's growth initiatives and his responsibilities included mergers and acquisitions, evaluating and developing finance-related strategic and business opportunities, restructuring alternatives and asset dispositions, land management activities and worldwide exploration activities.
Paul Deiro	California Resources Corporation	Vice President, Government Affairs	
Henry Perea	Chevron	Manager, California Government Affairs	Elected to the State Assembly in 2010, representing the 31st district, encompassing western Fresno. He served on the Fresno City Council from 2003 to 2010. He was most recently with Western States Petroleum Association.

Cliff Moriyama	Cliff Moriyama Consulting	Owner	Prior to forming Cliff Moriyama Consulting, Mr. Moriyama was the senior vice president of governmental affairs for California Business Properties Association. Prior to joining CBPA, Mr. Moriyama was the legislative advocate on environmental and water issues for the California Building Industry Association. From 1996 to 2001, he was responsible for issues ranging from the California Environmental Quality Act and the State and Federal endangered species laws to wetlands, water quality and water supply. Prior to joining CBIA, Mr. Moriyama was the director of agriculture and resources for the California Chamber of Commerce.
Steve Layton	E&B Natural Resources	President	Steve Layton is President of E&B Natural Resources. He is also Chairman of the California Independent Petroleum Association (CIPA) which represents 500 members and over 70% of California's total oil production. Steve is a member of the Board of Directors of the Independent Petroleum Association of America and the Louisiana Independent Oil and Gas Association. He is also a member of the National Petroleum Council, an advisory committee to the U.S. Secretary of Energy. Steve has previously served as Governor of the Houston Region for the Independent Petroleum Association of America and President of the National Stripper Well Association.

Francesco Galesi	E&B Natural Resources	Owner	During the 1960s, Mr. Galesi purchased and transformed surplus military depots in upstate New York and converted them into major industrial parks. The conversion of these properties subsequently led Mr. Galesi into the warehousing and distribution business. His visions led to further corporate growth and diversification with the acquisition and development of additional real estate holdings, including residential and commercial sites, the acquisition and restoration of the historic Equinox Resort in Manchester, VT, and ownership in E&B Natural Resource Management Corporation, an oil and gas company. Mr. Galesi's work has impacted states coast to coast, earning him the Presidential "Award of Achievement" for his contribution to the economic development of the United States.
Justin Salters	Grimmway Farms	Senior Account Executive	
David Frankel	McKinsey & Company	Partner	David helps electric power and industrial companies in North America to transform their operations, focusing on the development of sustainable commercial approaches. Against a backdrop of market evolution, he guides executives on staying ahead of trends in renewable energy and new grid technologies. David also advises private equity investors as they evaluate possible acquisitions, conducting due diligence assessments of promising businesses (including solar equipment and installation companies) across the sector.
Tom Koehler	Pacific Ethanol	Vice President	In addition to his work as co-founder of Chinook Book and Pacific Ethanol, a leading renewable fuel company in the West, Koehler has served as a city councilor for Corvallis and has a history of community organizing. He graduated from Oregon State University with a bachelor's in economics.

Clint Schelbitzki	Union Pacific	Assistant Vice President - Public Affairs - West	Clint leads a team that represents America's largest class one freight railroad before the legislatures and communities in California, Oregon, Washington, Idaho, Montana, Nevada and Utah. Clint started at Union Pacific Railroad in 2005 in the Marketing and Sales Department. In 2008, Clint became UP's director-Public Affairs for Oklahoma and Texas.
Francisco Castillo	Union Pacific	Director, Public Affairs – Northern California	Francisco Castillo assumed the role of director, public affairs in Northern California effective Jan. 2016. In this capacity, he is responsible for managing Union Pacific's (UP) state legislative strategy and community relations activities. More than a decade ago, Francisco began his career helping young people prepare for successful careers. He served as a job developer at the non-profit Mission Language & Vocational School in San Francisco. He broadened his commitment to public service by joining the administration of then-Mayor Gavin Newsom in 2004. Since then, he has served in senior roles for First Lady Maria Shriver, in the Office of California Governor Arnold Schwarzenegger, and again for Gavin Newsom in the Lieutenant Governor's Office. In each of those roles, Francisco has served as a representative to California's Latino community and as a liaison to local governments and state agencies.
Scott Folwarkow	Valero	Executive Director Government Affairs	
CBRT STAFF			
Brooke Armour	CA Business Roundtable	Communications Director	
Kirk Clark	CA Business Roundtable	Vice President	
Mike Kahoe	CA Business Roundtable		
Rob Lapsley	CA Business Roundtable	President

OFFICE OF THE
REGIONAL ADMINISTRATOR

MEMORANDUM

SUBJECT: Casmalia Resources Superfund Site Record of Decision

FROM: Michael Stoker
Regional Administrator

TO: E. Scott Pruitt
Administrator

DATE: June 18, 2018

Attached for your review is the Record of Decision (ROD) selecting the site-wide remedial actions for the Casmalia Resources Superfund Site in Santa Barbara County, California. I look forward to participating with you in the signing event for this ROD at the Site on June 28, 2018.

If you have questions, please feel free to contact me at (415) 972-3421, stoker.michael@epa.gov, or Enrique Manzanilla, the Region 9 Superfund Division Director, at (415) 972-3843, manzanilla.enrique@epa.gov.

DATE: June 18, 2018

Attached for your review is the Record of Decision (ROD) selecting the site-wide remedial actions for the Casmalia Resources Superfund Site in Santa Barbara County, California. I look forward to participating with you in the signing event for this ROD at the Site on June 28, 2018.

If you have questions, please feel free to contact me at (415) 972-3421, stoker.michael@epa.gov, or Enrique Manzanilla, the Region 9 Superfund Division Director, at (415) 972-3843, manzanilla.enrique@epa.gov.

Casmalia Resources Superfund Site—ROD Signing Event Talking Points

Site Specific Talking Points:

- The Casmalia Resources Superfund Site is a complex 252-acre site that contained various waste management areas that resulted in a mix of contaminants entering the groundwater, surface water and soils.
- The company operated from 1972-1989.
- By the time the company ceased operations, it had received more than 5.6 billion pounds of waste.
- In 1992, EPA stepped in and began emergency response work helping to stabilize the site through continued critical maintenance and monitoring activities until it was officially placed on EPA's National Priorities List, or NPL in 2001
- Many successes have already been achieved at the site since it was listed on the NPL, including implementation of interim actions to protect of the public.
- Landfills have been capped; open pits, ponds, and lagoons have been reconsolidated and closed; and liquids collection treatment and disposal systems have been established.
- Today we are here to announce the end of one chapter in Casmalia site's history and the beginning of a new one that will bring us closer to the finish line.
- EPA is here to announce the selection of the final cleanup and closure plan for the Casmalia Resources Superfund Site which includes further capping of waste disposal areas, removal of contaminated liquids and soils, and the design and construction of an upgraded groundwater collection and treatment system.
- Our goal is to complete this work in the next five to six years. This will involve detailed engineering design that will be followed by construction of new systems.
- Once the systems are up and running, EPA will ensure they will operate correctly and provide long-term protection to public health and the environment.
- This is a great day for EPA, our partners, and especially for the nearby communities of Casmalia, Guadalupe, Santa Maria, and Orcutt that will greatly benefit from today's action.

Stakeholders to acknowledge:

- I want to thank the local community for your tireless efforts and for working closely with EPA throughout this process.
- Of course, we wouldn't be here without the close collaboration with our partner agencies and local community representatives that have supported these efforts all these years.
- I want to thank the California Department of Toxic Substances Control (DTSC), the Regional Water Quality Control Board (Water Board), the California Department of Fish and Wildlife, and the U.S. Fish and Wildlife Service.
- I also want to thank the Casmalia Steering Committee (better known as the CSC) who have been instrumental in running day-to-day operations at this site and who will continue operations at the site for years to come.
- It is important to also acknowledge the contractors who have worked so conscientiously. We wouldn't be here without your boots on the ground.
- I also recognize the efforts of our own EPA employees who have worked on Casmalia for the past 30 years -- from the early stages, later during the emergency work and most recently overseeing site investigations and interim actions.
- Finally, I want to thank Administrator Pruitt, who understands the important work that needs to be done at Superfund sites nationwide.
- Through his Superfund Task Force effort, we are identifying and expediting remediation at sites like this to protect the health of surrounding communities and eventually revitalize these properties.

The North American Emissions Control Area

Briefing for Regional Administrator
MARPOL ANNEX VI
Marine ECA Compliance Overview
July 12, 2018
Air Enforcement Section

North American ECA Boundaries

Ocean Going Vessels

- 2-3x's NO_x + SO₂ emissions than South Coast refineries
- NO_x emissions - half of all cars/SUVs (SC + USA)
- Pre-2015 emissions uncontrolled
 - Highway truck ULSD = 15 ppm S
 - World-wide OGV fuel=35,000 ppm S
- 2020 SC SO₂ inventory > 50% from OGV

What vessels are we talking about?

- BIG vessels
 - Container ships
 - Tankers
 - ROROs
 - Bulk Carriers
 - Cruise Ships

What it looks like on the inside

EPA-18-0425-A-000067

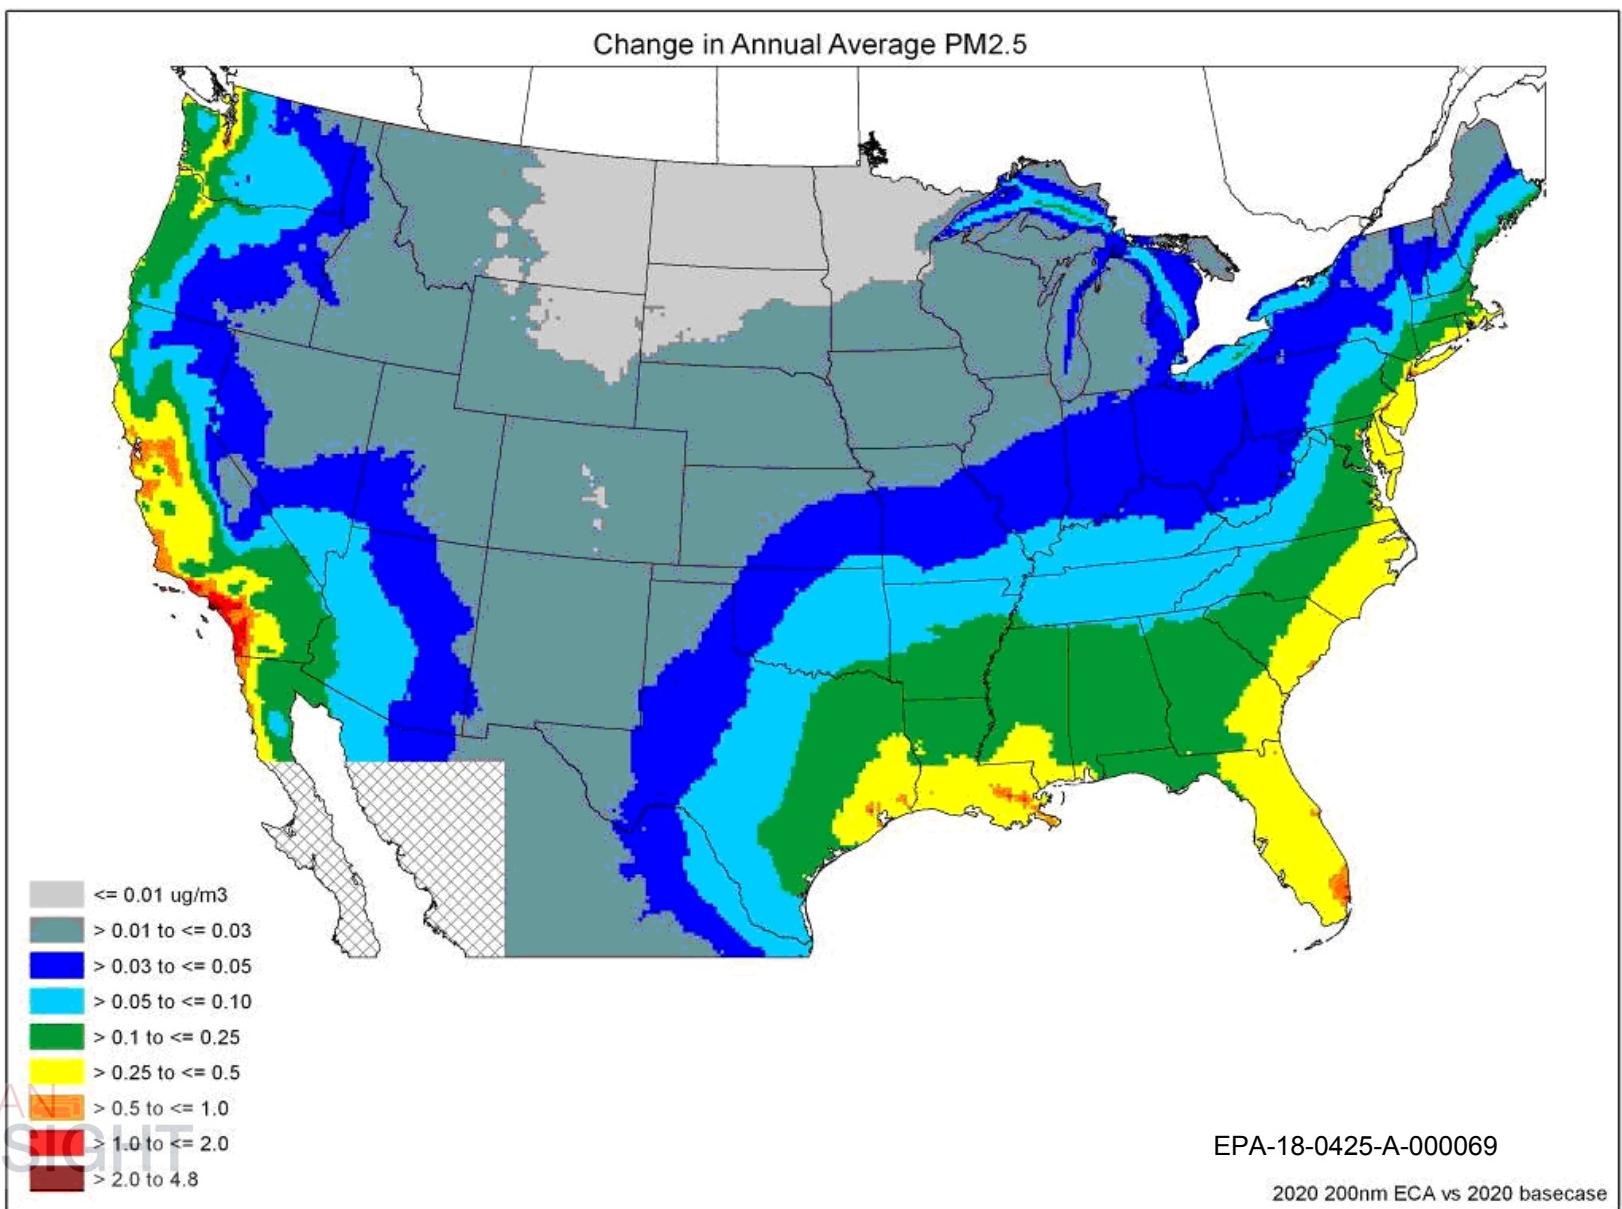

North American ECA – Benefits

- Effective Aug. 2011
- Annual reductions (post-2020):
 - 320,000 tons of NOx
 - 90,000 tons of PM2.5
 - 920,000 tons of SOx
 - 23%, 74% and 86% reduction of predicted levels absent the ECA
- For 5 million people every year, 14,000 premature deaths prevented and respiratory symptoms lessened

ECA Benefits—PM-2.5

ECA Enforcement

- Act to Prevent Pollution from Ships (APPS) applies the ECA requirements
 - EPA Regulations in 40 CFR Part 1043
- CAA not directly relevant
 - *Except* that enforcement against fuel suppliers and U.S. flagged vessels became possible in 2015
- Cooperative enforcement - USCG & EPA

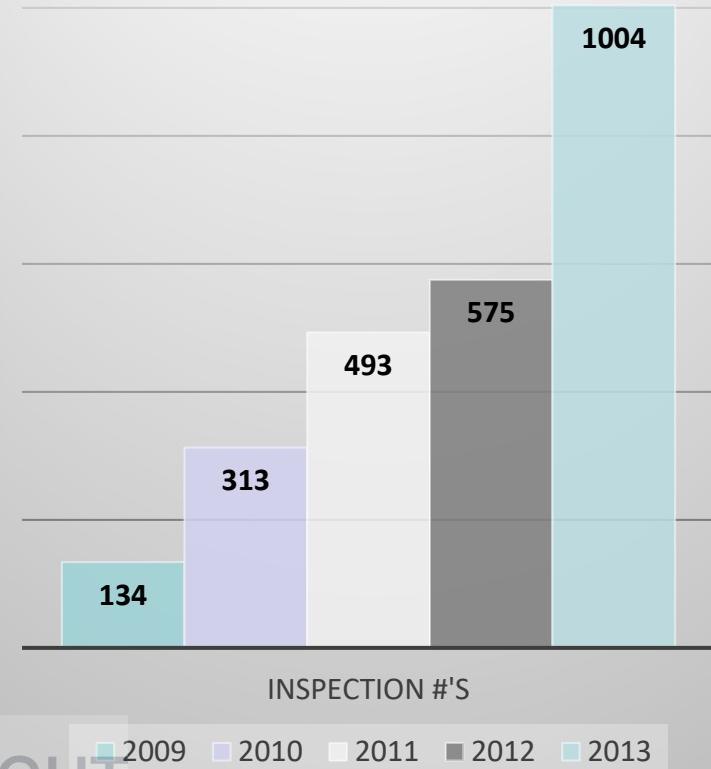

USCG Enforcement

- Enforcing ECA nationally
- Inspects ~ 9,500 vessels annually
- 83 deficiencies (<1% non-compliance) documented
 - ~4 years (July 2014 through Dec. 2017)
- Complying industry
 - Vessels overcame issues of fuel non-availability and abilities to safely use compliant fuels

CARB Enforcement

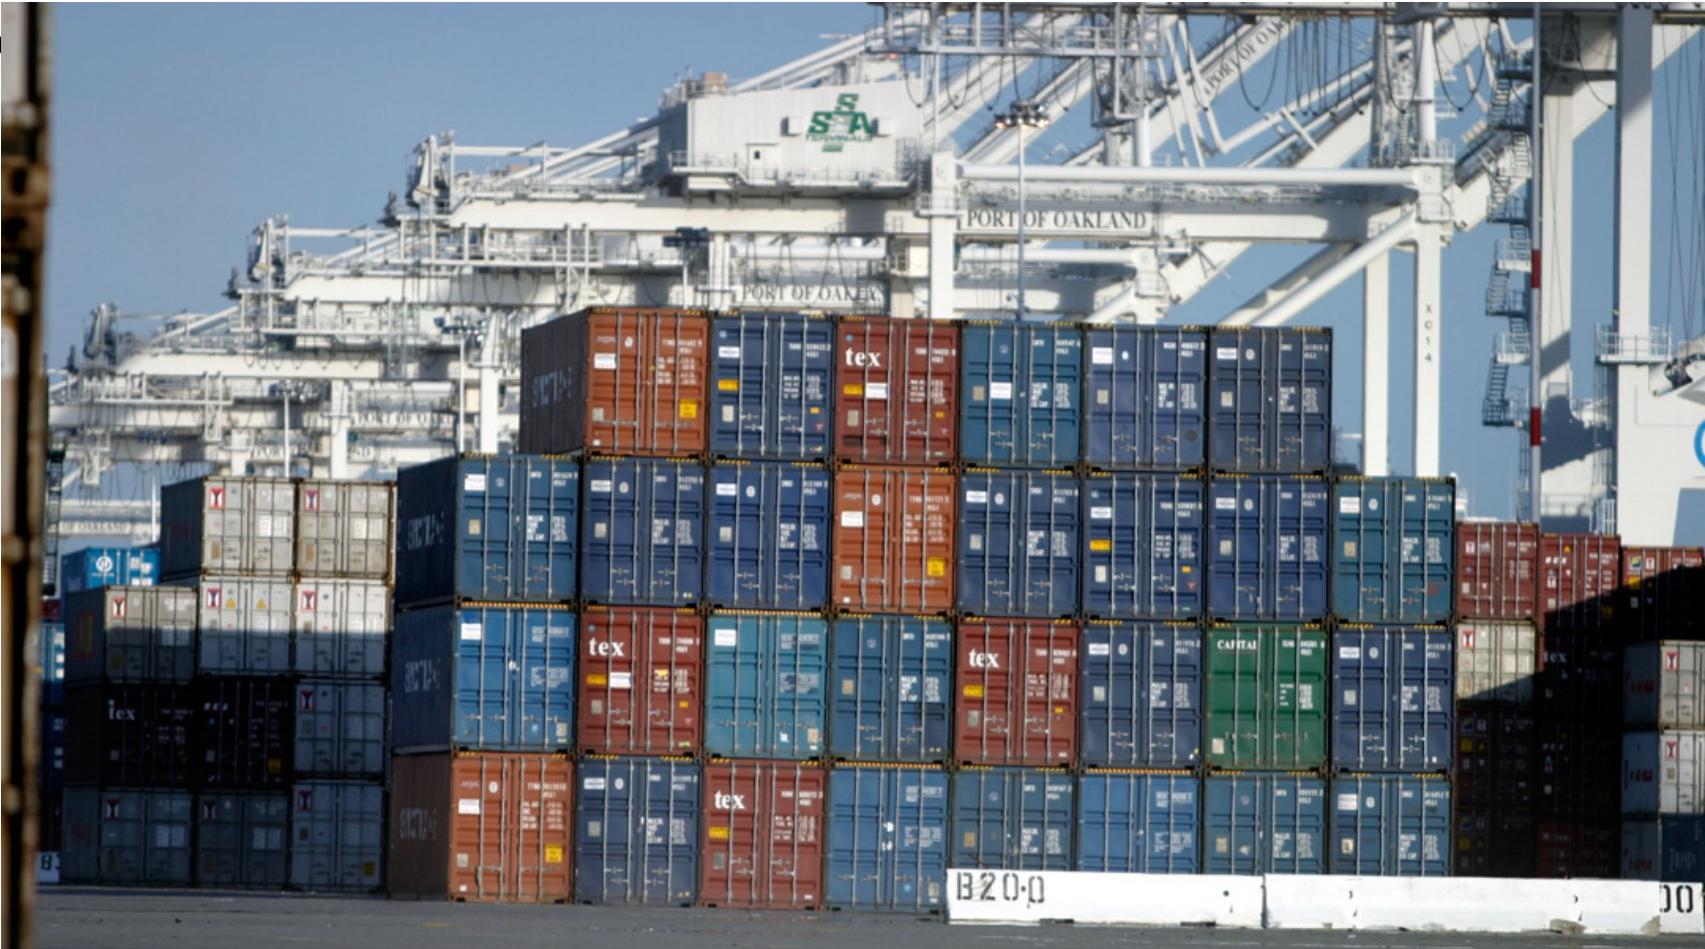

ARB Inspections

- Over 5,600 inspections with sampling since 2009
- Types of Violations (~200)
 - Late Changeover
 - Using non-compliant fuel at berth. Non-compliance fee not paid
 - Fuel did not meet specs
- > 95 % Compliance.
- Over \$2M in penalties collected.

Questions?

EPA-18-0425-A-000073

MARPOL ANNEX VI – U.S. Act to Prevent Pollution from Ships Marine ECA Compliance and Enforcement

MARPOL ANNEX VI

- MARPOL, the International Convention for the Prevention of Pollution from Ships, is concerned with preventing marine pollution from ships. Specifically, Annex VI of MARPOL addresses air pollution from ocean-going ships. The international air pollution requirements of Annex VI established limits on nitrogen oxides (NOx) emissions and require the use of fuel with lower sulfur content, protecting people's health and the environment by reducing ozone-producing pollution. The requirements apply to vessels operating in U.S. waters as well as **ships operating within 200 nautical miles** of the coast of North America, also known as the North American Emission Control Area (ECA).

Act to Prevent Pollution from Ships (APPS)

- **US Coast Guard has authority to board and inspect ships.**
- **Shoreside Matters** - EPA has authority concerning fuel reception facilities, fuel oil availability, and quality.
- **Other Matters:** EPA involvement for inspecting ships at sea or in port requires a USCG Referral (e.g., SCAQMD odor complaints in Huntington Beach).

Sulfur standard, 2008 Annex VI Amendments

- Standards require increasingly low sulfur content. New very low ECA standard became applicable in 2015.
- "Global standard" applicable beyond 200 nautical miles of the coastal zone
 - 4.5% < 2012
 - **3.5% 2012-19**
 - 0.5% 2020
- Emission Control Area (ECA) standard
 - 1.5% < Jul. 2010
 - 1.0% Jul. 2010-14
 - **0.1% 2015**

US Coast Guard

- Currently enforcing ECA nationally ~ 9,500 vessels annually.
- > 99% compliance from 2014-17.

CARB Compliance

- CARB regularly conducts inspections and initiates enforcement cases under state law.
- Greater than 95% compliance from 2009-17.

Public Health Benefits

- For 5 million people every year, 14,000 premature deaths prevented and respiratory symptoms lessened.
- Annual reductions (post-2020):
 - 320,000 tons of NOx
 - 90,000 tons of PM2.5
 - 920,000 tons of SOx
 - 23%, 74% and 86% reduction of predicted levels absent the ECA

MARPOL ANNEX VI – U.S. Act to Prevent Pollution from Ships Marine ECA Compliance and Enforcement

MARPOL ANNEX VI

- MARPOL, the International Convention for the Prevention of Pollution from Ships, is concerned with preventing marine pollution from ships. Specifically, Annex VI of MARPOL addresses air pollution from ocean-going ships. The international air pollution requirements of Annex VI established limits on nitrogen oxides (NOx) emissions and require the use of fuel with lower sulfur content, protecting people's health and the environment by reducing ozone-producing pollution. The requirements apply to vessels operating in U.S. waters as well as **ships operating within 200 nautical miles** of the coast of North America, also known as the North American Emission Control Area (ECA).

Act to Prevent Pollution from Ships (APPS)

- **US Coast Guard has authority to board and inspect ships.**
- **Shoreside Matters** - EPA has authority concerning fuel reception facilities, fuel oil availability, and quality.

 - 920,000 tons of SOx
 - 23%, 74% and 86% reduction of predicted levels absent the ECA

Greenaction Meeting with Regional Administrator, July 12, 2018
Hunters Point Naval Shipyard Talking Points

Parcel A

- The Navy is working with CDPH to provide a health and safety screening of Parcel A to ensure the protection of the residents, visitors, and workers at Parcel A.
- Based on site history and testing done, EPA does not believe anyone living or working at HPNS faces health risks due to fraudulent data collection work by Tetra Tech EC Inc. The areas in question are enclosed, and ongoing monitoring and dust control protect the community.
- CDPH is taking public comments on its workplan through its website and can adjust plans if major issues are identified. CDPH is balancing the need for transparency and public participation with the residents' requests for data as soon as possible.
- After the initial scanning, EPA and other agencies will closely evaluate results to determine next steps. If CDPH confirms a significant high scan result, Navy contractors are on call and will evaluate the area right away, before the report is issued.

Tetra Tech EC Inc.

- Outside Parcel A, EPA agrees that retesting -- not just scanning – all survey units (a section of the site) where Tetra Tech EC Inc. did work is essential, including in Parcels D-2, UC-1, and UC-2 already transferred. We saw that in mid-June, Greenaction and others submitted an open letter to the San Francisco Board of Supervisors calling for core sampling. We agree that core sampling is a helpful approach.
- EPA, at the same time as the public, received the Navy's June 15, 2018, draft workplan for Parcel G. We are reviewing it while you are. We look forward to seeing your comments, and EPA will submit written comments by the August 14 deadline.
- The community's confidence in the upcoming work is very important. The Navy hired an independent technical advisor to help the community meaningfully engage in the cleanup. We encourage your group to use this resource to better engage with the on-going work.

Parcel E/E2

- We told the Navy to include the most current science and regulatory requirements on sea-level rise in its 2018 Five-Year Review. The Navy is posting online this week its draft Five-Year Review for public and regulator comments at the same time. We look forward to seeing your comments by the September 7 deadline, and EPA will also submit comments.
- I hope you provided your comments at the Navy's meeting yesterday on Parcel E.
- Meanwhile, the following measures are already included in the landfill plans:
 - When complete, the combined size of the revetment wall and sea wall will be 35-feet wide and 12-feet higher than the current average sea level. The walls will withstand future sea-level rise, severe earthquakes, and waves as high as any experienced in the past one hundred years. The walls are just one part of a comprehensive sea-level rise protection system, which also includes a six-foot thick cover.
 - The Navy routinely tests groundwater twice a year for contaminants at the entire site to monitor for any increases in contamination due to sea-level rise or any other reason.
 - In addition, for the landfill and shoreline areas in Parcels E and E-2, CDPH will do confirmatory radiological scans after grading before the Navy installs final cover materials.

AGENDA

- 8:45 a.m. **Introductions**
- 8:50 a.m. **West Oakland Title VI complaint**
- 9:00 a.m. **Laytonville Rancheria**
- 9:10 a.m. **Kettleman permit**
- 9:20 a.m. **Evoqua permit**
- 9:30 a.m. **Hunter's Point Shipyard**
- 9:45 a.m. **adjourn; option to continue NPL site discussion with Superfund managers.**

PARTICIPANTS

- Mr. Bradley Angel, Greenaction for Health and Environmental Justice
- Mr. Miguel Alatorre, El Pueblo Para el Aire y Agua Limpia (People for Clean Air and Water), Kettleman City
- Ms. Margaret Gordon, West Oakland Environmental Indicators Project
- Ms. Michelle Pierce, Bayview Hunters Point Community Advocates
- Mr. David Sanchez, on behalf of the Wailaki Tribe, Laytonville Rancheria
- Mr. Igor Tregub, Sierra Club
- Mr. Dave Harper, Mojave Elder, Colorado River Indian Tribe (via telephone)
- Mr. Mike Stoker, Regional Administrator
- Ms. Sylvia Quast, Regional Counsel
- Mr. Enrique Manzanilla, Superfund Director
- Mr. Jeff Scott, Land Division Director
- Ms. Laura Ebbert, Tribal Office Manager, Land Division
- Mr. Richard Grow, Air Division
- Ms. Deldi Reyes, Environmental Justice Program Leader
- Mr. Desean Garnett, Attorney-Advisor, Office of Regional Counsel
- Ms. Alexis Strauss, Senior Policy Advisor

Greenaction Meeting with Regional Administrator, July 12, 2018
Hunters Point Naval Shipyard Talking Points

Parcel A

- The Navy is working with CDPH to provide a health and safety screening of Parcel A to ensure the protection of the residents, visitors, and workers at Parcel A.
- Based on site history and testing done, EPA does not believe anyone living or working at HPNS faces health risks due to fraudulent data collection work by Tetra Tech EC Inc. The areas in question are enclosed, and ongoing monitoring and dust control protect the community.
- CDPH is taking public comments on its workplan through its website and can adjust plans if major issues are identified. CDPH is balancing the need for transparency and public participation with the residents' requests for data as soon as possible.
- After the initial scanning, EPA and other agencies will closely evaluate results to determine next steps. If CDPH confirms a significant high scan result, Navy contractors are on call and will evaluate the area right away, before the report is issued.

Tetra Tech EC Inc.

- Outside Parcel A, EPA agrees that retesting -- not just scanning – all survey units (a section of the site) where Tetra Tech EC Inc. did work is essential, including in Parcels D-2, UC-1, and UC-2 already transferred. We saw that in mid-June, Greenaction and others submitted an open letter to the San Francisco Board of Supervisors calling for core sampling. We agree that core sampling is a helpful approach.
- EPA, at the same time as the public, received the Navy's June 15, 2018, draft workplan for Parcel G. We are reviewing it while you are. We look forward to seeing your comments, and EPA will submit written comments by the August 14 deadline.
- The community's confidence in the upcoming work is very important. The Navy hired an independent technical advisor to help the community meaningfully engage in the cleanup. We encourage your group to use this resource to better engage with the on-going work.

Parcel E/E2

- We told the Navy to include the most current science and regulatory requirements on sea-level rise in its 2018 Five-Year Review. The Navy is posting online this week its draft Five-Year Review for public and regulator comments at the same time. We look forward to seeing your comments by the September 7 deadline, and EPA will also submit comments.
- I hope you provided your comments at the Navy's meeting yesterday on Parcel E.
- Meanwhile, the following measures are already included in the landfill plans:
 - When complete, the combined size of the revetment wall and sea wall will be 35-feet wide and 12-feet higher than the current average sea level. The walls will withstand future sea-level rise, severe earthquakes, and waves as high as any experienced in the past one hundred years. The walls are just one part of a comprehensive sea-level rise protection system, which also includes a six-foot thick cover.
 - The Navy routinely tests groundwater twice a year for contaminants at the entire site to monitor for any increases in contamination due to sea-level rise or any other reason.
 - In addition, for the landfill and shoreline areas in Parcels E and E-2, CDPH will do confirmatory radiological scans after grading before the Navy installs final cover materials.

Hoopa Valley Tribe

Elected Officials

Chairman: Ryan P. Jackson (elected 2015)

Vice Chair: Oscar "Tyke" Billings

Other Council: The Council consists of seven representatives, elected from their respective Districts, plus one generally elected Chair. The Council appoints a Vice-Chair.

Ryan P. Jackson, Chairman

Environmental Director: Ken Norton directs Hoopa's Tribal Environmental Protection Agency (TEPA), which has been in existence since the 1990s.

Land Base: 89,572 acres (a 12 mile X 12 mile square)

Primary Economy: Timber, firefighting, government

EPA Funding FY19 (2018-2019)

CWA 106	\$180,000
CWA 319	\$30,000
GAP	\$201,500
Superfund 128A	\$134,000
	\$545,500

Two Rivers Run Through It - The Klamath and Trinity (largest tributary to the Klamath) Rivers run through the Reservation. Salmon Dependent on the Rivers are core to Hupa culture, subsistence, and religion. Consequently, the Tribe forcefully and successfully champions water quality protection and restoration of the Klamath Basin.

Capacity Building: The Tribe has long been a recipient of General Assistance Program funding, which has supported development of the TEPA more broadly, and the programmatic development of many of the Tribe's current capacities. The Tribe continues to receive GAP funding to support program administration, strategic planning, solid waste implementation, and cross-tribal engagement.

Approximate Location of Tribal Land

General Information – The Hoopa Tribe is a compact tribe, meaning they have assumed responsibility for many services that were traditionally administered by the BIA and IHS. Hoopa is the only Tribe in California that manages their own sanitation construction projects, a function they compacted from the IHS. They administer a host of programs that were derived from the BIA to support, programs such as fire-fighting, realty, forestry, wildlife, and fisheries. They run the Hoopa Valley Public Utilities District (HVPUD), which manages a transfer station, and drinking water and wastewater programs. The Tribe also operates businesses, such as a hotel and rock aggregate operation, as well as their own police force and court system. The Tribe is one of the largest employers in Humboldt County and the Hoopa Valley Reservation is the biggest tribal land base in California. Hoopa will receive funding from four EPA programs in FY2019 and has received funding from other EPA programs in the past. The Tribe initiated a performance partnership grant (PPG) in 1999, which folds qualified EPA funding sources into a single grant. Region 9 coordinates most closely with TEPA and HVPUD, who manage most of the Tribe's EPA-related issues.

Solid Waste Management – Hoopa has been closing illegal dumps, recycling scrap metal and educating their members about proper waste disposal since the mid-1990s. Illegal dumping has been curtailed to a large degree, but the Tribe continues to prosecute individuals who violate solid waste laws. TEPA works with Council and all enforcement entities to maintain a team approach to curbing illegal storage and dumping of waste.

Superfund National Priorities list (NPL) – The abandoned Cetor Chemical Works copper ore mill in the northern end of Hoopa Valley was the first site on tribal land to be added to the NPL. EPA worked with Hoopa to clean and delist the site. TEPA and R9 Superfund Division (SFD) staff recently identified mine tailings adjacent to the Site along the bank of the Trinity River. SFD initiated a Remedial Investigation in coordination with TEPA. The investigation is ongoing and included extensive field sampling in 2017. SFD staff have also been working with the Tribe to evaluate another Site, the Copper Bluff Mine, for proposal to the NPL. Acid mine drainage has been flowing into the Trinity River since the mine closed in 1962, potentially exposing tribal and non-tribal fisherman to heavy metals and threatening the fishery on which the Hupa People depend. In July 2018, EPA received a letter of concurrence from Hoopa for proposing the site to the NPL.

Superfund Brownfields - The Tribe has worked with EPA to clean and redevelop several Brownfields sites. Hoopa's CERCLA 128(a) Tribal Response Program, initiated in 2011, has been providing resources to identify and revitalize brownfields and other contaminated sites on the Reservation and to support TEPA in protecting public health and the environment (including NPL-related work described above). For example, the Tribe recently used 128(a) funding to abate lead and asbestos to help renovate their Tribal Court House that had been shuttered in 2014 due to structural issues. The Court House's redevelopment was completed in 2018 and allows TEPA to effectively enforce environmental ordinances. In 2018, Hoopa successfully applied to receive assistance to assess and develop cleanup plans for several more sites through EPA's Targeted Brownfields Assessment Program.

Drinking Water: The Tribe's drinking water system is complex with two surface water treatment plants and multiple pressure zones, storage tanks, and booster stations. Ex. (b)(5): Internal Deliberative [REDACTED]

The Tribe has two current Drinking Water Tribal Set-Aside grants, one for \$59,000 to update chlorination facilities, the second for \$411,000 to install ultraviolet light and hydrogen peroxide combination to inactivate cyanotoxins, which were detected in the drinking water supply in the summer of 2014.

Wastewater: In FY15, under the Clean Water Indian Set-Aside Program, EPA in coordination with the Indian Health Service (IHS) funded a "pilot" greywater system as part of a wastewater project listed on the IHS Sanitation Deficiency System (SDS). The Project was in response to a severe drought. The greywater systems were completed in Fall 2016. They divert sink and wash water to the gardens of each selected property. Each property owner was provided training on how to utilize the greywater systems. The top septic waste priority for the Tribe is a septic facility, which is currently listed on the SDS. Hoopa is conducting a feasibility study for the facility under a California Prop 1 grant. The Tribe currently hauls the septic waste and dumps in an open pit.

Relicensing the Klamath Hydroelectric Project (KHP) -

The KHP included eight developments. A traditional relicensing process originally ended in FERC recommending an alternative that did not involve dam removal. Dissatisfaction with the alternative spawned a parallel mediation process that led to development of two linked agreements that called for dam removal; the Klamath Hydroelectric Settlement Agreement (KHSA) identified PacifiCorp's obligations and the Klamath Basin Restoration Agreement (KBRA) identified complimentary restoration plans that would be funded by other parties. In October 2009, Hoopa wrote a letter to the EPA expressing concerns about the KHSA and KBRA. The Tribe felt the Agreements, a) undermined the purposes of the Clean Water Act, b) limited PacifiCorp's obligations to implement TMDLs, and c) allowed the 401 Certification process to be held in abeyance, which exempted PacifiCorp from meeting new water quality requirements. The EPA responded to Hoopa's letter, indicating we shared their concern with point c, but disagreed with points a and b. The Tribe attempted to assert CWA 401 certification authority over the KHP during relicensing proceedings, but was not successful in that effort. Congress did not authorize the KBRA, so KHP relicensing reverted to a new path under an amended KHSA. The new path involves decommissioning four dams under direction of the Klamath River Renewal Corporation (KRRC). The KRRC submitted a comprehensive removal plan to FERC in June 2018. The Project, if completed, would be the largest dam removal project in U.S. History and would be expected to improve water quality and help restore fisheries.

Water Quality Program – TEPA has conducted water quality

monitoring on the Trinity and its tributaries since 1993 and initiated water quality monitoring on the Klamath River in 2010. The Hoopa Valley Tribe was one of the first regional tribes to receive "Treatment as State" approval in 1996 under the Clean Water Act and has EPA-approved water quality standards for the Trinity and Klamath Rivers. Their Klamath standards include numeric objectives for dissolved oxygen, nutrients, temperature, *microcystis* and microcystin. The Tribe helped CA develop cultural and subsistence fishing beneficial use standards. Hoopa's persistent and insightful leadership in water issues also resulted in the Trinity Basin Fish and Wildlife Management Act, which paved the way for significant restoration in the Trinity sub-basin.

Hoopa Valley Tribe and Iron Mountain Mine Itinerary – Mike Stoker

July 23 – 24, 2018

Contact Information:

- | | |
|--|--------------|
| • Laura Ebbert, Manager, Tribal Section, Land Division | 415-947-3561 |
| • John Lyons, Deputy Director, Superfund Division | 415-265-0908 |
| • Dana Barton, Associate Director, Superfund Division | 415-972-3087 |
| • Lily Tavassoli, Iron Mountain Mine Project Manager, Superfund Division | 415-972-3146 |

Notes:

- Weather in interior California is dry and hot.
- Sturdy shoes appropriate for walking on uneven ground are recommended.
- For the mine tour, wear layered clothing (long sleeves suggested). Underground mine conditions can cause drips that may discolor clothes.
- The tribe may provide you with a small token gift. It would be appropriate to bring an edible item to share in return – this could be fresh fruit, chocolate, or similar.

July 23, 2018 – Mike Stoker, Laura Ebbert

- 8:05 AM** Depart LAX
- 10:10 AM** **Land Arcata, California**
You'll meet Laura Ebbert at the airport; Laura will have a rental car curbside.
Call Laura at 415-947-3561 when you land!
- 10:15 AM** **Buffer time to leave airport**
- 10:45 AM** **Depart for lunch in Willow Creek, California**
Raging Creek Pub; 38939 Highway 299, Willow Creek
- 11:30AM** **Arrive Raging Creek Pub, have lunch**
- 12:45 AM** **Depart Willow Creek for Hoopa, California**
12 Cannery Road, Hoopa
- 1:00 PM** **Arrive Hoopa Valley Tribe, buffer time for transitions**
- 1:15 PM** **Meeting with Hoopa Valley Tribal EPA**
Attendees: Chairman Ryan Jackson
Ken Norton, Sr.
Discussion Topics: GAP
Water Quality Program
Tour: GAP and Water Quality Program
- 3:15 PM** **Discussion and tour of Copper Bluff Mine**
- 5:00 PM** **Depart for Redding California**
Sheraton Redding Hotel
Drive Time: 2 hours, 30 minutes
Mike will travel to Redding with Dana Barton; Laura will depart for Arcata Airport
- 7:30 PM** **Arrive at Sheraton Redding Hotel**
820 Sundial Bridge Drive

July 24, 2018 – Mike Stoker, John Lyons, Dana Barton, Lily Tavassoli

- 8:00 AM** **Check out and Depart Sheraton Redding Hotel for Iron Mountain Mine**
14000 Iron Mountain Road
Drive Time: 20 minutes
- 9:00AM** **Iron Mountain Mine Superfund Site Tour**
Logistics: Wear light, layered clothing. Long sleeves if possible. Underground mine conditions can cause drips that may discolor clothes. Wear something you don't care too much about!
- 12:00PM** **Depart for Sacramento**
Will stop for lunch and then depart Redding. Dana will drop RA in Sacramento (**location TBD**)

Subject: Hoopa and Copper Bluff

Start: Mon 7/23/2018 10:00 AM
End: Mon 7/23/2018 1:30 PM

Recurrence: (none)

Organizer: Stoker, Michael B.

Incident Command System Briefing

Emergency Response, Preparedness and Prevention

July 11, 2018

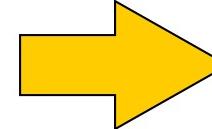

Important Considerations in Incident Management: Executive Responsibility

- Every incident is unique and requires specific objectives to be established by executives
- EPA has experienced and trained response personnel but executives have ultimate responsibility for every response
- Mastery of response strategy within 24 hours is essential to success
- National Incident Management System (NIMS) requires the Incident Command System (ICS) structure used by all federal response agencies

What is NIMS?

NIMS provides a set of core concepts, terminologies, and technologies covering:

- Incident Command and Management Structure;
- Preparedness;
- Resource Management;
- Communication and Information Management;

What Is ICS?

- The Incident Command System:
 - Is a standardized, on-scene, all-hazards incident management framework.
 - Allows its users to adopt an integrated organizational structure to match the complexities and demands of single or multiple incidents without being hindered by jurisdictional boundaries.

Important Considerations in Incident Management: Benefits of ICS Structure

➤ Adherence to the ICS structure:

- is critical to successful incident management
- enables clarity in dialogue among executives and responders/communication staff in the field; provides common language between EPA and all response partners
- enables maximum use of trained personnel for advice in complex decision-making
- enables accurate/rapid response to information requests from the White House, Congress, state and local officials
- enables accurate recordkeeping/response for IG/GAO audits, investigations, FOIAs and litigation which often follow large-scale responses

Incidents Managed Using ICS

- Fire, both structural and wildland
- Natural disasters, such as tornadoes, floods, ice storms, or earthquakes
- Human and animal disease outbreaks
- Search and rescue missions
- Hazardous materials incidents
- Terrorist incidents, including the use of weapons of mass destruction
- National Special Security Events, such as Presidential visits or national sports events

ICS Benefits

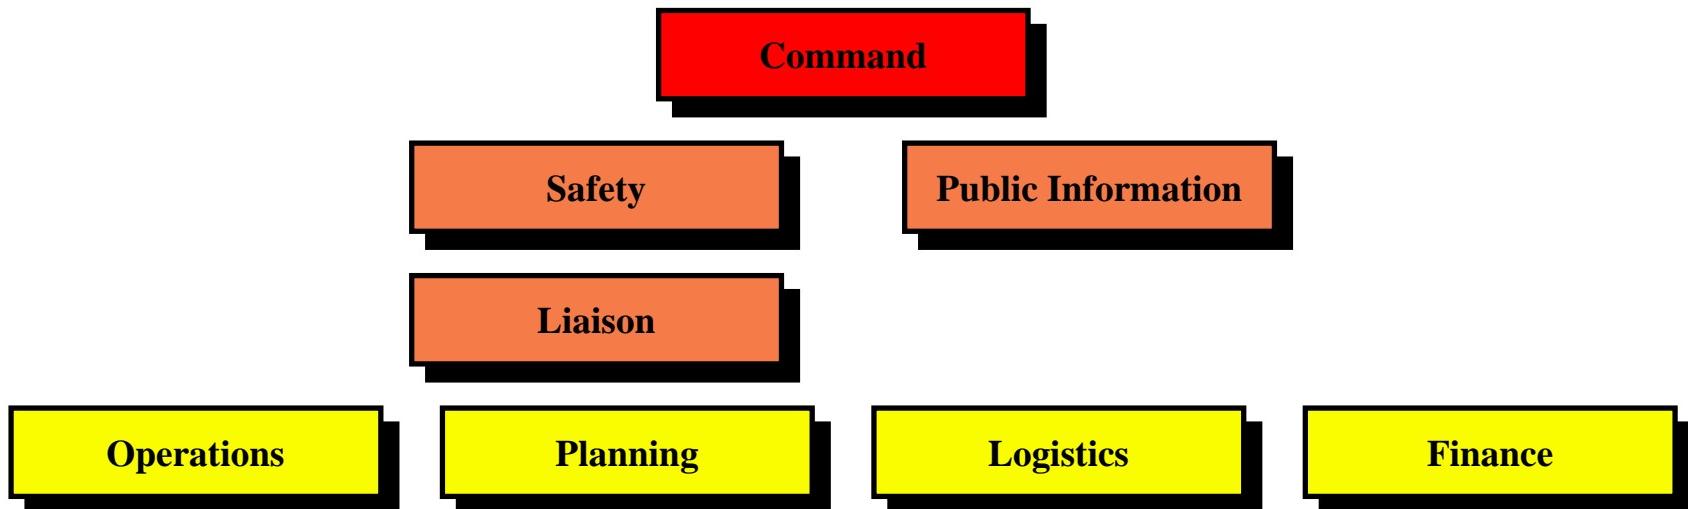

- Meets the needs of incidents of any kind or size.
- Allows personnel from a variety of agencies to meld rapidly into a common management structure.
- Provides logistical and administrative support to operational staff.
- Is cost effective by avoiding duplication of efforts.

Incident Command System (ICS)

- Designed to integrate resources from numerous organizations into a single response structure using common terminology and processes

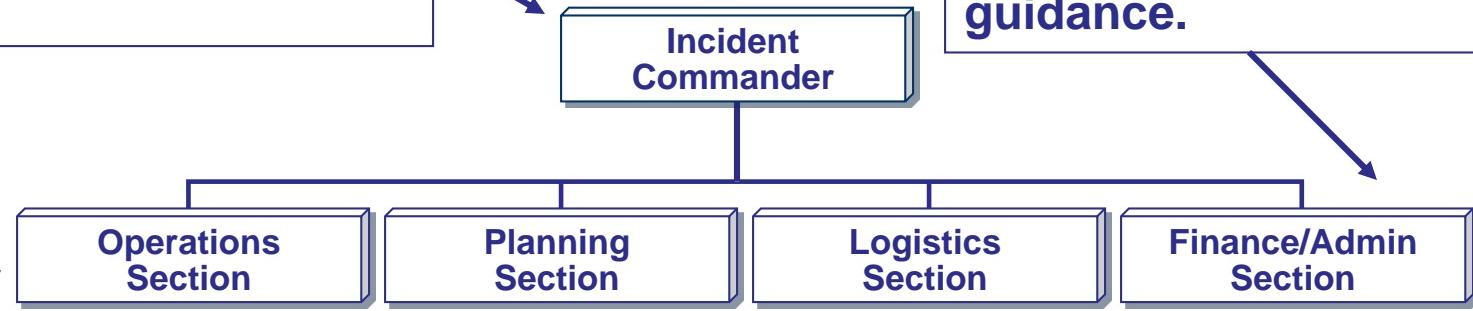

Who Does What?

Command: Overall responsibility for the incident. Sets objectives.

Finance/Admin:
Monitors costs related to the incident.
Provides overall fiscal guidance.

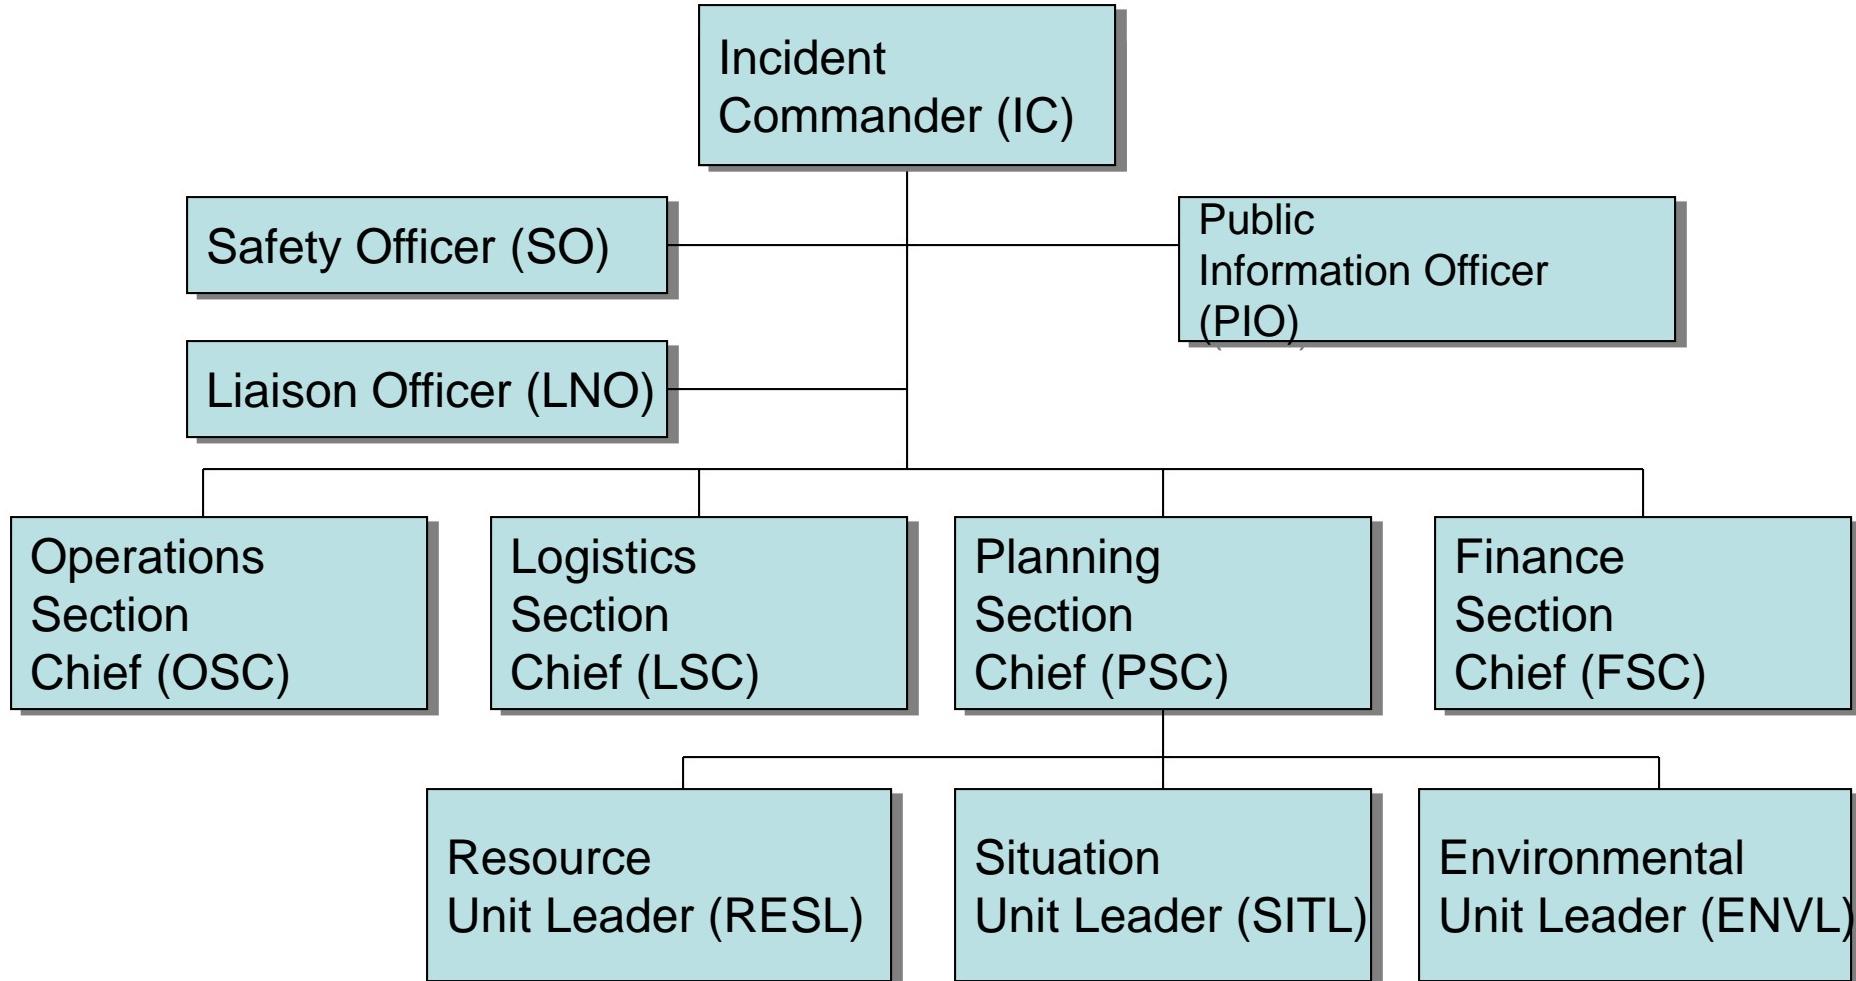

Operations: Develops the tactical organization and directs all resources to carry out the Incident Action Plan.

Planning: Develops the Incident Action Plan to accomplish the objectives.

Logistics: Provides resources and all other services needed to support the incident.

EPA Incident Management Team (IMT) Key Leadership Positions (KLPs)

Senior Leadership Roles and Responsibilities

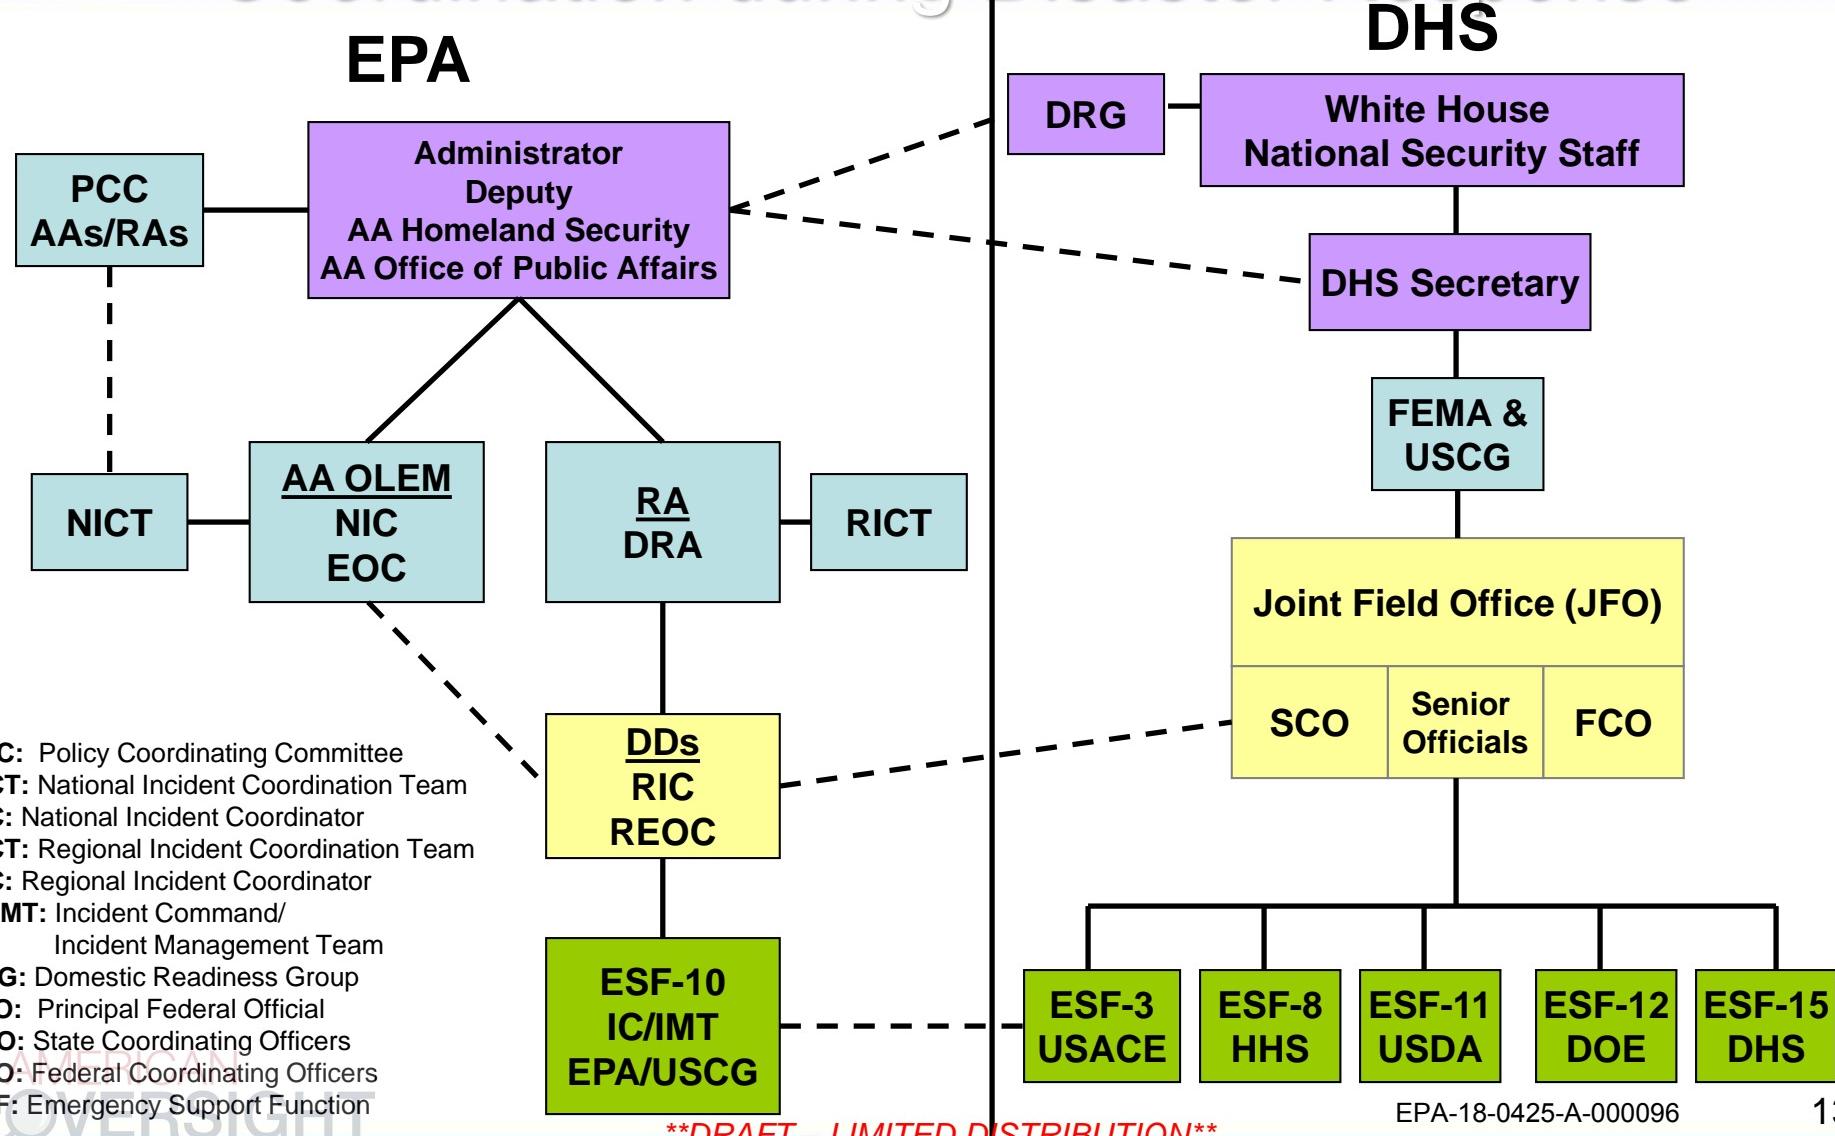

Roles and Responsibilities in Incident Management: Administrator/AA for OLEM

- Administrator addresses policy issues through Policy Coordinating Committee
- AA for OLEM oversees National Incident Coordinator, provides national direction on Superfund/RCRA/response issues
- National Incident Coordinator oversees National Incident Coordination Team and Emergency Operations Center, official channel for all **internal** information between headquarters and regions
- AA/RA can appoint a Senior Official to represent political appointees and senior Agency managers and to articulate Agency interests and assets

EPA Model for Internal and External Coordination during Disaster Response

Roles / Responsibilities in Incident Communications: AA for OPA

- AA for OPA is the focal point for incident communication policy issues
- The communications representatives in the ICS structure are Liaison Officers and Public Information Officers who report through Incident Commander to headquarters
- AA for OPA sets direction for Communications Strike Teams
 - 3 geographically-based teams establish standardized communication module to support key agency communications objectives
 - Deploy within 24 hours of a release to establish communications infrastructure

Roles and Responsibilities in Incident Communications

➤ Crisis Communications Plan

- Identifies procedures to handle communications in high-profile events, including process for rapid response incorporating review/concurrence at numerous organizational levels including White House
- Reliance on proactive communications to drive balanced narrative, recognizing need to assess, decide and execute quickly

➤ Process for dissemination of data to response partners and public developed and coordinated closely with OPA

- Direction of response is driven by data
- Quick dissemination of accurate data is a critical priority throughout any response

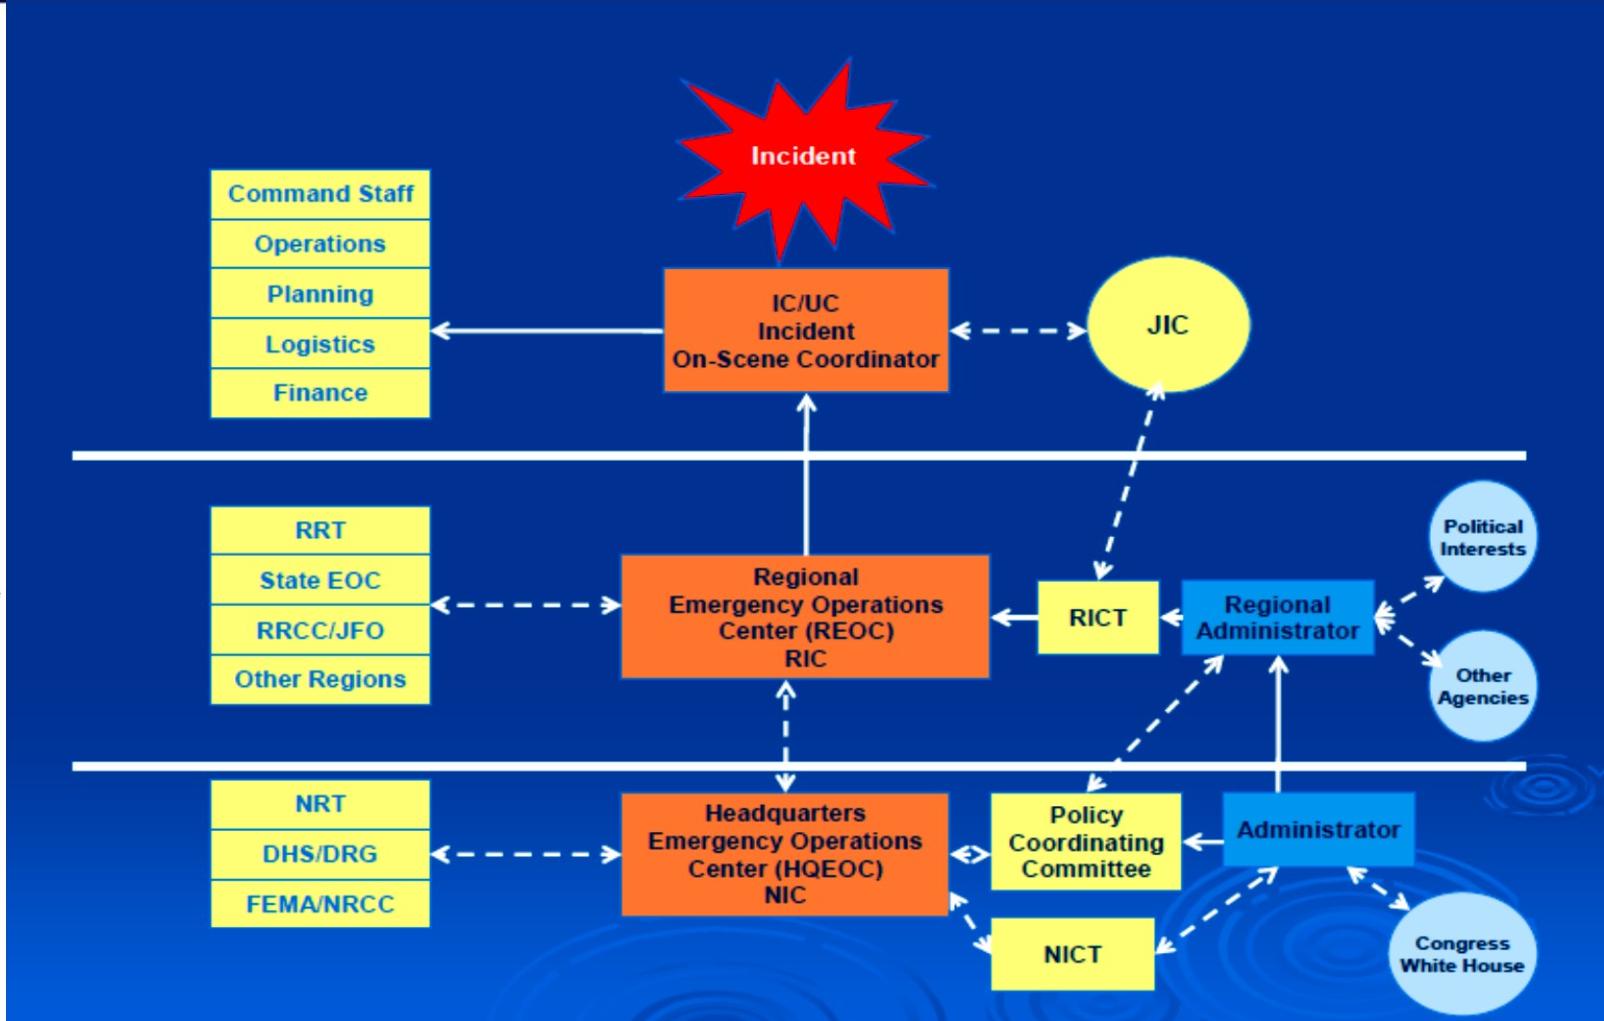

Roles and Responsibilities in Incident Management: Regional Administrator

- RA in consultation with headquarters sets overall management objectives/priorities at regional level
- **RA designates Regional Incident Coordinator who is primary contact with Incident Commander in response.**
- RA or designee, in close coordination with regional PAD and AA for Public Affairs, serves as regional spokesperson and coordinates with response partners at political and strategic level
- RA utilizes regional Public Affairs Director/staff within ICS structure for maximum communication and response capability

Disaster Response Structures and Relationships

IC: Incident Command
UC: Unified Command
JIC: Joint Information Center
RICT: Regional Incident Coordination Team
RIC: Regional Incident Coordinator
RRT: Regional Response Team
RRCC: Regional Response Coordination Center
JFO: Joint Field Office
NRT: National Response Team
DRG: Domestic Readiness Group
NRCC: National Response Coordination Center
NICT: National Incident Coordination Team
NIC: National Incident Coordinator

QUESTIONS

Iron Mountain Mine Superfund Site - Redding, CA

- ❖ Iron Mountain Mine was once the largest industrial discharger of pollution into surface waters of the United States. Prior to any response actions, six tons of metals were released into the Sacramento River every day
- ❖ NPL listing and extensive enforcement has allowed for EPA and its partners to spend over 30 years investigating and cleaning up this toxic mine
- ❖ The site today consists of a complex, engineered remedy that effectively treats over 275 million gallons of highly contaminated water every year and prevents impacts to the Sacramento River, a critical component of California's water supply and crucial habitat for California's salmon population

Site Overview

- 4,400 acre property mined 1890-1963 for copper, zinc, gold, silver, and pyrite
- Flows directly into Sacramento River (above Keswick Dam, afterbay to Shasta Dam)
- Shasta Dam/Sacramento River water system
 - Most critical spawning habitat for salmon in California
 - ~20% of California's water supply
 - Major source of hydroelectric power

Impact on the Environment

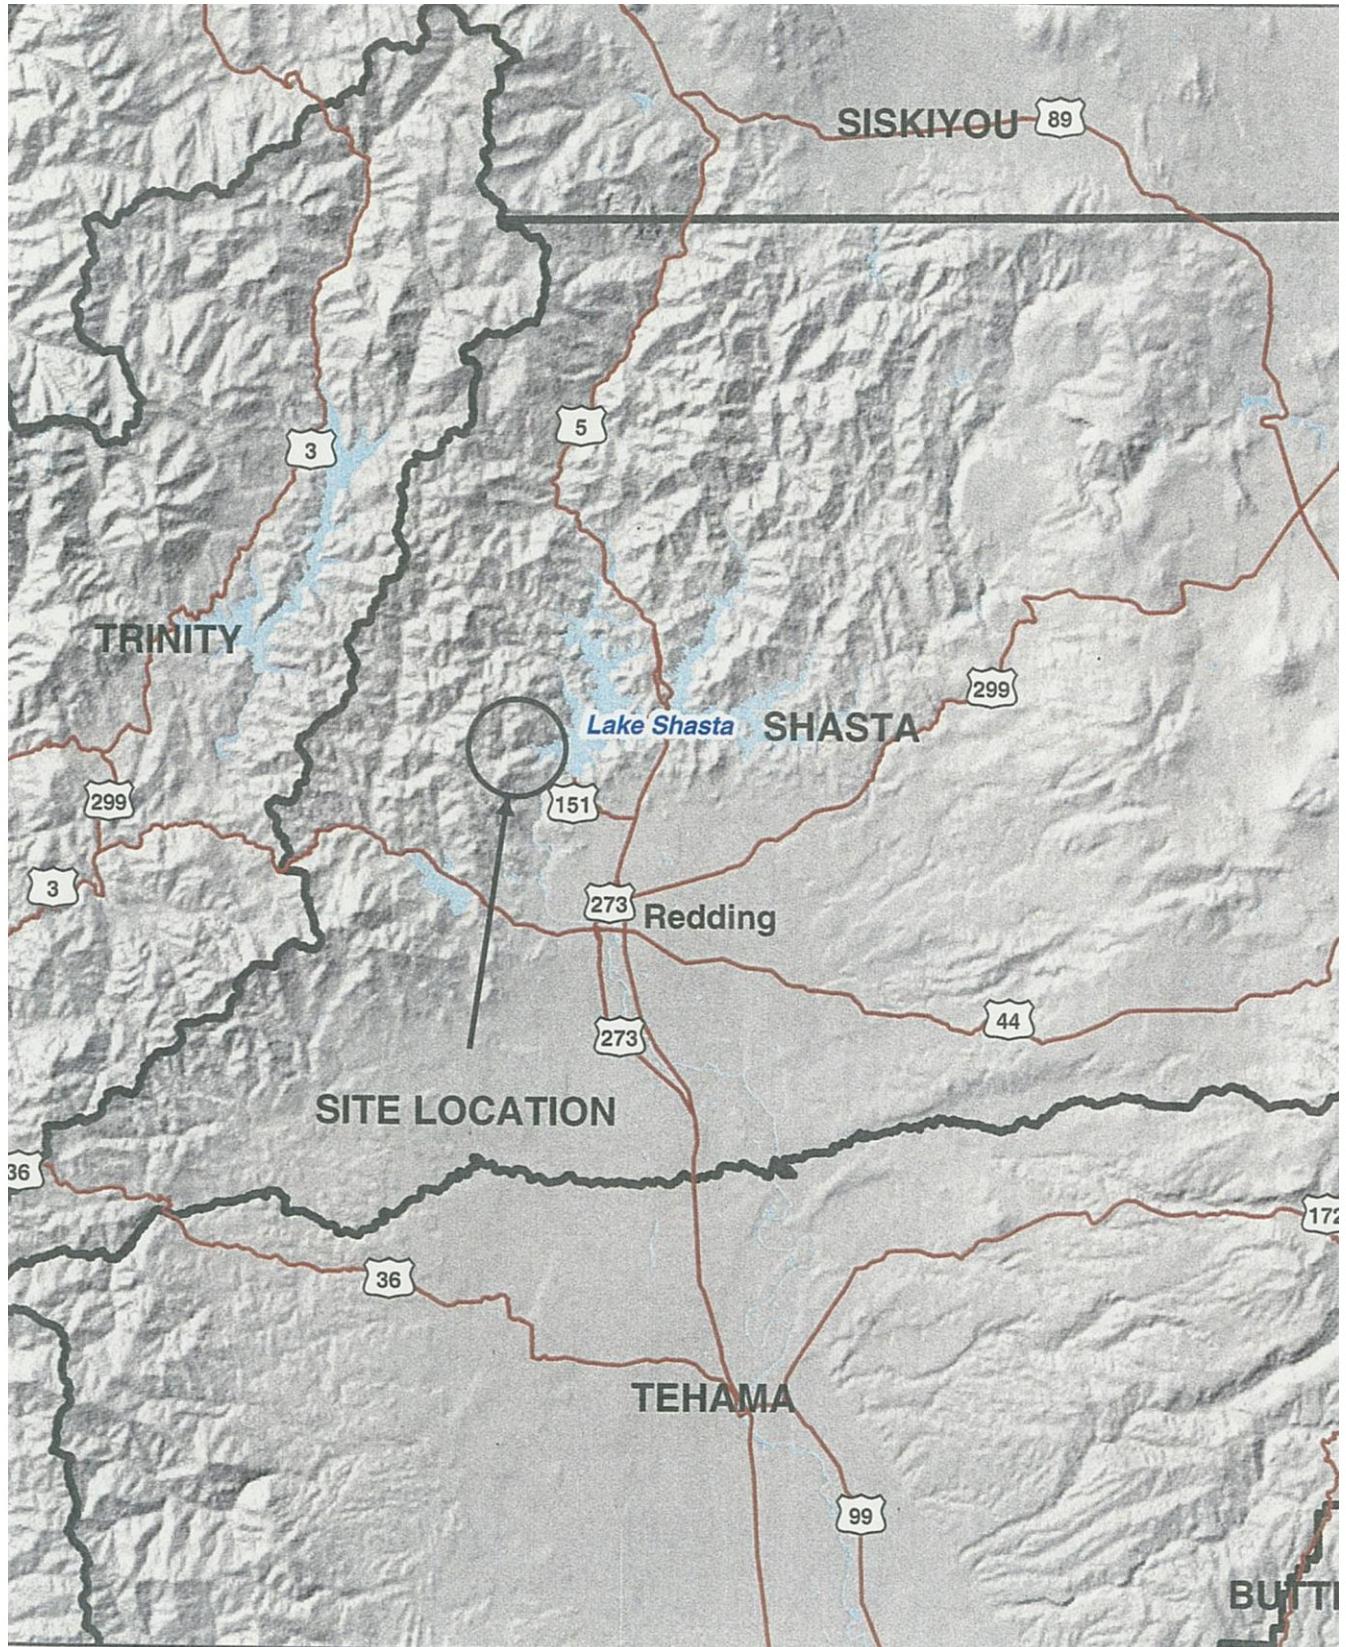

- Mineralized ore in underground mine working come into contact with air and water to produce extremely low pH water with high concentrations of heavy metals
- Mine historically discharged 6 tons metal (Iron, Copper, Cadmium, and Zinc) into Sacramento River per day
- Discharges have historically affected Sacramento River water quality. Impacts have been traced all the way down to the San Francisco Bay and effect people, agriculture, and fish
- 30 documented large-scale fish kills: Habitat for steelhead and four runs of Chinook Salmon (including endangered Winter-Run Chinook Salmon)

Site Cleanup

- Extensive cleanup activities have resulted in 97% reduction of metals leaving the site
 - Approximately 275 million gallons of contaminated water treated annually
 - 100% achievement of cleanup objectives in Sacramento River. No exceedances in over 14 years
- Remedial actions performed to date consist of the following primary components:
 - Treating contaminated water: High Density Sludge lime neutralization plant treats up to 6,000 gallons of contaminated water per minute
 - Preventing clean water from becoming contaminated: two water diversion pipelines route creeks around impacted areas of mine to prevent water from coming into contact with mine workings, thereby preventing this water from becoming contaminated
 - Waste pile and tailings consolidation, capping, and removals
 - Dredging and storage of contaminated sediment from the Spring Creek Arm of Keswick Reservoir

Enforcement

- 2000 Consent Decree is one of largest settlements in Superfund history, valued at over \$1 billion
- Reimbursed EPA \$500 million dollars of past costs and ensured responsible party would operate the remedy until the year 2030, when EPA will take over and receive over \$500 million dollars for future operation costs
- Site operator spends approximately \$5 million dollars per year implementing the cleanup work

Date updated: July 2018

EPA-18-0425-A-000123

Morro Bay National Estuary Program Pre-Trip Briefing

July 25, 2018

Morro Bay

- Encompasses a 75-square-mile watershed including residential communities, ranch land, crop land, National Guard base and wild lands (see Map)
- Impacts from agriculture, urban development, recreation and other upstream land uses have resulted in bacterial and nutrient pollution, reduced freshwater flows, habitat loss and sedimentation in the Bay.

Morro Bay National Estuary Program (NEP)

- Is one of 28 NEPS nationwide (and one of 3 in Region 9) convened under Section 320 of the Clean Water Act to develop and implement a Comprehensive Conservation Management Plan to protect and restore water quality and habitat;
- NEPs complete restoration and conservation projects to reduce pollution and protect natural areas; support research and monitoring to assess changes in the estuary; and educate residents and visitors on how to keep Morro Bay clean and healthy.
- EPA provides grant funding (~\$600K annually) and technical assistance to the Morro Bay NEP to support restoration and protection of the Morro Bay Estuary. The NEP matches federal funding dollar-for-dollar to implement its workplan.

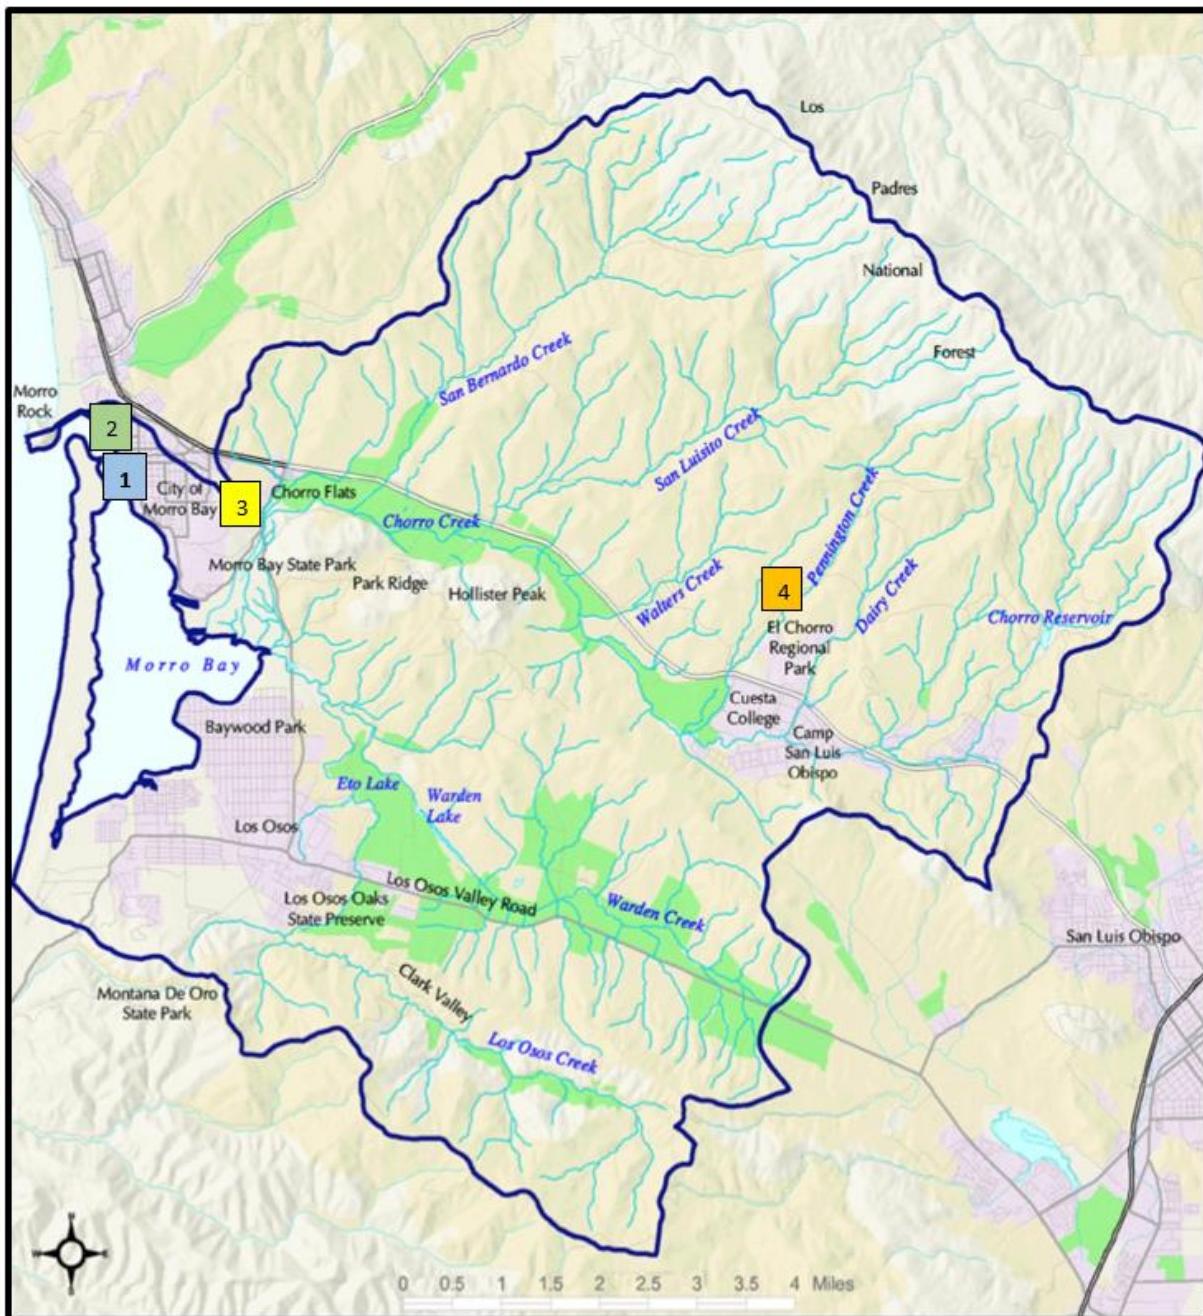

Partners

- Bay Foundation of Morro Bay – NEP host entity who receives EPA funding to implement the Comprehensive Conservation Management Plan
- Government-
 - Federal – EPA, NOAA, US Forest Service, National Guard at Camp SLO
 - State – CA Conservation Corps, Regional Water Board, Cal Poly Technical University at San Luis Obispo, California Department of Fish and Wildlife, California State Coastal Conservancy, Caltrans
 - Local - City of Morro Bay, San Luis Obispo County, Coastal San Luis Resource Conservation District, local school districts
- Local Businesses – oyster farmers, ranchers, fishermen
- Nonprofit Organizations – Land Conservancy of San Luis Obispo County, Mutts for the Bay, Morro Bay Commercial Fishermen's Organization, Morro Coast Audubon Society, Trout Unlimited

Map of Morro Bay Watershed

Site Visit Locations:

- 1 - Morro Bay National Estuary Program Office at 601 Embarcadero
- 2 - Morro Bay Harbor Department at 1275 Embarcadero
- 3 - Black Hill Trail Head at end of Black Mountain Road above State Park Golf Course
- 4 - Pennington Creek Rainwater Harvesting Demo. near Cal Poly Beef Center

Morro Bay National Estuary Program Site Visit Tour Itinerary
August 2, 2018

On August 2nd, staff from the Morro Bay National Estuary Program (NEP) will give us a tour of Morro Bay project area. The tour will include meetings with key NEP partners.

EPA Attendees and direct contact information:

1. **Mike Stoker**, Regional Administrator
 - a. Cell: 213-215-3104
2. **Suzanne Marr**, Project Officer, Water Division
 - a. Cell: 510- 418-8149

Schedule:

8:30 am - Meet at Morro Bay National Estuary Program Office

601 Embarcadero Street (x Marina)

Morro Bay, CA (805) 772-3834

Take Exit 278 off Highway 1 for Morro Blvd.

Drive down the hill towards the water, to Marina and Embarcadero Streets.

Park in the cul-de-sac near the water in the 3-hour parking zone.

Look for Suzanne Marr who will be waiting for you.

Back-up Plan: If you do not see Suzanne, go up the back stairs (closest to the water) and through the doors to the second story of the Marina Square building.

(The front stairs on Embarcadero are not unlocked until later.)

Once inside, turn right, through the double doors into the Morro Bay NEP Office and ask for Lexie Bell and Ann Kitajima.

8:45 am to 8:55 am - Meet with Morro Bay NEP Staff

Lexie Bell, Executive Director

Ann Kitajima, Deputy Director

9:00 am to 10:00 am - Bay / Harbor Tour

Boat tour of Morro Bay with Morro Bay Harbor Department to view Morro Bay waters up close including oyster farming (as tides allow), harbor, and eel grass habitat and multiple uses of the bay waters.

Morro Bay National Estuary Program staff

Eric Endersby, Morro Bay Harbor Department (tentative)

George Trevelyan, Grassy Bar Oyster Company (tentative)

10:00 am to 10:30 am - Drive to Black Hill

10:30 to 11:30 am - Hike up Black Hill (0.6 mi. round trip) to view Morro Bay from above

Morro Bay National Estuary Program staff

Jody Weseman, California Conservation Corps

11:30 to 12:30 – Lunch - Location TBD, likely at a restaurant at harbor.

Morro Bay National Estuary Program staff

Joel Neel, Bay Foundation Board President

Gary Ruggerone, Bay Foundation Board Member

Jamie Irons, Morro Bay Mayor (tentative)

Dwayne Oberhoff, Morro Bay Community Quota Fund for the Morro Bay fishery

12:30 to 1:00 - Drive to Cal Poly Rainwater Harvesting Site

1:00 to 2:00 pm - Cal Poly Rainwater Harvesting Tanks at Pennington Creek

Morro Bay National Estuary Program staff

Kevin Piper, Cal Poly Agricultural Sciences Department

At the Pennington Creek site, we will see:

- **Rainwater harvesting** to capture rainfall and store it for watering cattle during dry season to reduce dry-season creek diversions and minimize impacts to steelhead trout
- **Ranch road repairs** to reduce sediment erosion into creek
- **Riparian fencing** to reduce cattle impact on water quality (sediment, pathogens, nitrates)

2:00 pm - Drive back to Morro Bay NEP office

2:30 pm - Depart - (Alternatively, Mike can bring his car to Pennington Creek site and depart directly from there at 2:00)

Morro Bay National Estuary Program Pre-Trip Briefing

July 25, 2018

Morro Bay

- Encompasses a 75-square-mile watershed including residential communities, ranch land, crop land, National Guard base and wild lands (see Map)

SUPERFUND NATIONAL PRIORITY LISTING PROCESS
PROPOSED SITES: COPPER BLUFF MINE + ORANGE COUNTY NORTH BASIN

Superfund National Priority Listing Process

Key Takeaways:

- NPL listing is for the nation's largest and most complex sites that require long-term cleanup; states and local entities address most other sites
- NPL listing is an iterative process of scientific review, public input and notice and comment rulemaking
- NPL listing involves multiple stakeholders and can be controversial

Process: Sites are listed on the National Priorities List (NPL) upon completion of Hazard Ranking System (HRS) scoring, concurrence by the state or tribe, review by Office of Management and Budget (OMB) review, Administrator signature, publication of a proposed rulemaking, public comment period, EPA response to comments, and a final rulemaking.

Proposed and final NPL rules are published in the Federal Register, usually in the Spring and Fall. OLEM/OSRTI coordinates the process and timeline, which varies depending on the individual sites and reviewers

What Listing Means: When a site is listed on the NPL, the Remedial Process begins, usually with a detailed Potentially Responsible Party (PRP) search and Remedial Investigation/Feasibility Study (RI/FS). If no viable PRPs are found, appropriated funds are used for investigation and cleanup.

Key OLEM Decisionmakers: Barry Breen, Jim Woolford

Copper Bluff Mine – Proposed NPL Listing (not yet publicly proposed)

Key Takeaways:

- Acid mine drainage from the mine directly impacts fish, which are a key tribal cultural resource
- Request for cleanup came from the Hoopa Valley Tribe; EPA Region 9 supports NPL listing because the environmental impacts are significant, and cleanup could be costly and complex.
- The mine is entirely on tribal land and there are no viable responsible parties

EPA Supports Listing: Human health and environmental impacts are significant; tribal resources are insufficient to complete a potentially lengthy and complex mine cleanup.

Listing Status: The draft HRS Documentation Record is under technical review by OSRTI. Next step would be for the Regional Administrator send a letter to the tribal chairman, Honorable Ryan Jackson, requesting the tribe's formal concurrence to propose the site in Fall 2018. Headquarters requests the tribal response by mid-July 2018. We have advised the Bureau of Indian Affairs of the proposed listing. Once concurrence is received and the NPL Listing Package is reviewed by HQ and OMB, a rulemaking publication in the federal register begins a 60-day public comment period. Since there are no viable responsible parties and the tribe supports listing, we do not expect to receive substantial oppositional comments on the site. NPL listing could likely be finalized in next rulemaking update (Spring 2019), and EPA would initiate a RI/FS.

RA Action: Sign letter requesting tribal concurrence.

SUPERFUND NATIONAL PRIORITY LISTING PROCESS
PROPOSED SITES: COPPER BLUFF MINE + ORANGE COUNTY NORTH BASIN

Orange County North Basin – Proposed NPL Listing (publicly proposed on January 18, 2018)

Key Takeaways:

- Approximately 2.5 million people use this groundwater basin as a drinking water source.
- Industrial releases of Tetrachloroethene (PCE), trichloroethene (TCE), 1,1-DCE and 1,4-Dioxane and other solvents threaten the primary drinking water source for Orange County.
- The State is currently providing oversight on source site cleanups, but requested the listing because they could not adequately address the complex, comingled plume as a whole due to the number of sources and jurisdictions involved.
- Though not typical, this site is already undergoing an interim Remedial Investigation/Feasibility Study (RI/FS), with an anticipated completion date late in FY2020.
- Orange County Water District (OCWD) is conducting the interim RI/FS in the public interest with the expectations that PRPs will implement the remedy.
- OCWD supports listing, and the Orange County Business Council opposes it.

EPA Supports Listing: EPA added the site to the list of sites targeted for “immediate, intense action” in December 2017 (prior to NPL proposal) due to the seriousness of the threat to a large drinking water basin. Other cleanup programs were evaluated, but could not adequately address the plume due to the number of sources and jurisdictions involved.

Listing Status: The State of California concurred with listing the plume on the NPL. EPA proposed the site in January 2018 and accepted comments until May 2018. OSRTI, in coordination with Region 9, will prepare a support document that responds to the 93 comments received. If comments are easily addressed, OCNB will be included in the next rulemaking action, tentatively scheduled for Fall 2018.

RA Action: No required action now. However, we may receive meeting requests from OCWD or OCBC prior to the final rulemaking.

SUPERFUND NATIONAL PRIORITY LISTING PROCESS
PROPOSED SITES: COPPER BLUFF MINE + ORANGE COUNTY NORTH BASIN

Superfund National Priority Listing Process

Key Takeaways:

- NPL listing is for the nation's largest and most complex sites that require long-term cleanup; states and local entities address most other sites
- NPL listing is an iterative process of scientific review, public input and notice and comment rulemaking
- NPL listing involves multiple stakeholders and can be controversial

Process: Sites are listed on the National Priorities List (NPL) upon completion of Hazard Ranking System (HRS) scoring, concurrence by the state or tribe, review by Office of Management and Budget (OMB) review, Administrator signature, publication of a proposed rulemaking, public comment period, EPA response to comments, and a final rulemaking.

Proposed and final NPL rules are published in the Federal Register, usually in the Spring and Fall. OLEM/OSRTI coordinates the process and timeline, which varies depending on the individual sites and reviewers

What Listing Means: When a site is listed on the NPL, the Remedial Process begins, usually with a detailed Potentially Responsible Party (PRP) search and Remedial Investigation/Feasibility Study (RI/FS). If no viable PRPs are found, appropriated funds are used for investigation and cleanup.

Key OLEM Decisionmakers: Barry Breen, Jim Woolford

Copper Bluff Mine – Proposed NPL Listing (not yet publicly proposed)

Key Takeaways:

- Acid mine drainage from the mine directly impacts fish, which are a key tribal cultural resource
- Request for cleanup came from the Hoopa Valley Tribe; EPA Region 9 supports NPL listing because the environmental impacts are significant, and cleanup could be costly and complex.
- The mine is entirely on tribal land and there are no viable responsible parties

EPA Supports Listing: Human health and environmental impacts are significant; tribal resources are insufficient to complete a potentially lengthy and complex mine cleanup.

Listing Status: The draft HRS Documentation Record is under technical review by OSRTI. Next step would be for the Regional Administrator send a letter to the tribal chairman, Honorable Ryan Jackson, requesting the tribe's formal concurrence to propose the site in Fall 2018. Headquarters requests the tribal response by mid-July 2018. We have advised the Bureau of Indian Affairs of the proposed listing. Once concurrence is received and the NPL Listing Package is reviewed by HQ and OMB, a rulemaking publication in the federal register begins a 60-day public comment period. Since there are no viable responsible parties and the tribe supports listing, we do not expect to receive substantial oppositional comments on the site. NPL listing could likely be finalized in next rulemaking update (Spring 2019), and EPA would initiate a RI/FS.

RA Action: Sign letter requesting tribal concurrence.

SUPERFUND NATIONAL PRIORITY LISTING PROCESS
PROPOSED SITES: COPPER BLUFF MINE + ORANGE COUNTY NORTH BASIN

Orange County North Basin – Proposed NPL Listing (publicly proposed on January 18, 2018)

Key Takeaways:

- Approximately 2.5 million people use this groundwater basin as a drinking water source.
- Industrial releases of Tetrachloroethene (PCE), trichloroethene (TCE), 1,1-DCE and 1,4-Dioxane and other solvents threaten the primary drinking water source for Orange County.
- The State is currently providing oversight on source site cleanups, but requested the listing because they could not adequately address the complex, comingled plume as a whole due to the number of sources and jurisdictions involved.
- Though not typical, this site is already undergoing an interim Remedial Investigation/Feasibility Study (RI/FS), with an anticipated completion date late in FY2020.
- Orange County Water District (OCWD) is conducting the interim RI/FS in the public interest with the expectations that PRPs will implement the remedy.
- OCWD supports listing, and the Orange County Business Council opposes it.

EPA Supports Listing: EPA added the site to the list of sites targeted for “immediate, intense action” in December 2017 (prior to NPL proposal) due to the seriousness of the threat to a large drinking water basin. Other cleanup programs were evaluated, but could not adequately address the plume due to the number of sources and jurisdictions involved.

Listing Status: The State of California concurred with listing the plume on the NPL. EPA proposed the site in January 2018 and accepted comments until May 2018. OSRTI, in coordination with Region 9, will prepare a support document that responds to the 93 comments received. If comments are easily addressed, OCNB will be included in the next rulemaking action, tentatively scheduled for Fall 2018.

RA Action: No required action now. However, we may receive meeting requests from OCWD or OCBC prior to the final rulemaking.

Re: Freedom of Information Act (FOIA) Request EPA-R9-2018-009963

Dear Mr. Evers:

This is in response to the above-referenced FOIA request which we received on July 25, 2018. You requested the following records:

All records reflecting communications including emails, email attachments, text messages, messages on messaging platforms (such as Slack, GChat or Google Hangouts, Lync, Skype, or WhatsApp), telephone call logs, calendar invitations, calendar entries, meeting notices, meeting agendas, informational material, draft legislation, talking points, any handwritten or electronic notes taken during any oral communications, summaries or any oral communications, or other materials reflecting communications) between Mike Stoker, Region 9 Administrator (or anyone acting on his behalf, such as an administrative assistant), and any of the following persons or organizations:

- a. Greka, Greka Energy, Greka Oil & Gas, Greka Integrated Inc., HVI Cat Company Inc. (greka.com)
- b. Andrew DeVegvar
- c. Susan Whalen
- d. UnitedAg (unitedag.org)
- e. Randeep Grewal

EPA has conducted a reasonable search for the records responsive to your FOIA request. No responsive emails, text messages, call logs, agendas, notes, summaries, or other materials were found.

A portion of the records you have requested, specifically calendars and calendar items through July 26, 2018, have been previously uploaded and are publicly available on EPA's FOIAonline system found at: <https://www.foiaonline.gov/foiaonline/action/public/home>

To access these documents, search FOIA request EPA-R9-2018-009615.

EPA is withholding portions of the responsive records you requested because they are exempt from mandatory disclosure by virtue of 5 U.S.C. §552(b) (5). EPA has identified the basis for the redaction directly on the released record.

Because the records you are seeking are publicly available on FOIAonline, your FOIA request for this information is being administratively closed, in accordance with EPA's FOIA regulations which can be found at 40 C.F.R. Part 2, Subpart A.

This letter concludes our response to your request. You may appeal this response by email at hq.foia@epa.gov, or by mail to the EPA's National FOIA Office, U.S. EPA, 1200 Pennsylvania Avenue, N.W. (2310A), Washington, DC 20460 or through FOIAonline if you are an account holder. If you are submitting your appeal by hand delivery, courier service, or overnight delivery, you must address your correspondence to 1200 Pennsylvania Avenue, N.W., Room 5315, Washington, DC 20460. Your appeal must be in writing, and it must be received no later than 90 calendar days from the date of this letter. The Agency will not consider appeals received after the 90-calendar-day limit. Appeals received after 5:00 p.m. EST will be considered received the next business day. The appeal letter must identify the determination being appealed including the assigned FOIA request number. For quickest possible handling, the subject line of your email, the appeal letter, and its envelope, if applicable, should be marked "Freedom of Information Act Appeal."

Additionally, you may seek dispute resolution services from EPA's FOIA Public Liaison at hq.foia@epa.gov or (202) 566-1667, or from the Office of Government Information Services (OGIS). You may contact OGIS in any of the following ways: by mail, Office of Government Information Services, National Archives and Records Administration, Room 2510 , 8610 Adelphi Road, College Park, MD 20740-6001; email, ogis@nara.gov; telephone, (202) 741-5770 or (877) 684-6448; or fax, (202) 741-5769.

If you have any questions, please contact Chris Hage of this office at hage.christopher@epa.gov.

Sincerely,

Deborah Jordan
Deputy Regional Administrator

The Pacific Islands

3 US Territories:

American Samoa, Guam, CNMI

3 Freely Associated States:

Palau, Marshall Islands,
Federated States of Micronesia

450,000 people

10+ languages

Rich cultural heritage

US Pacific Islands

Territorial land area:
595 sq miles
= 12 x SF area

Ocean Exclusive Economic Zone:

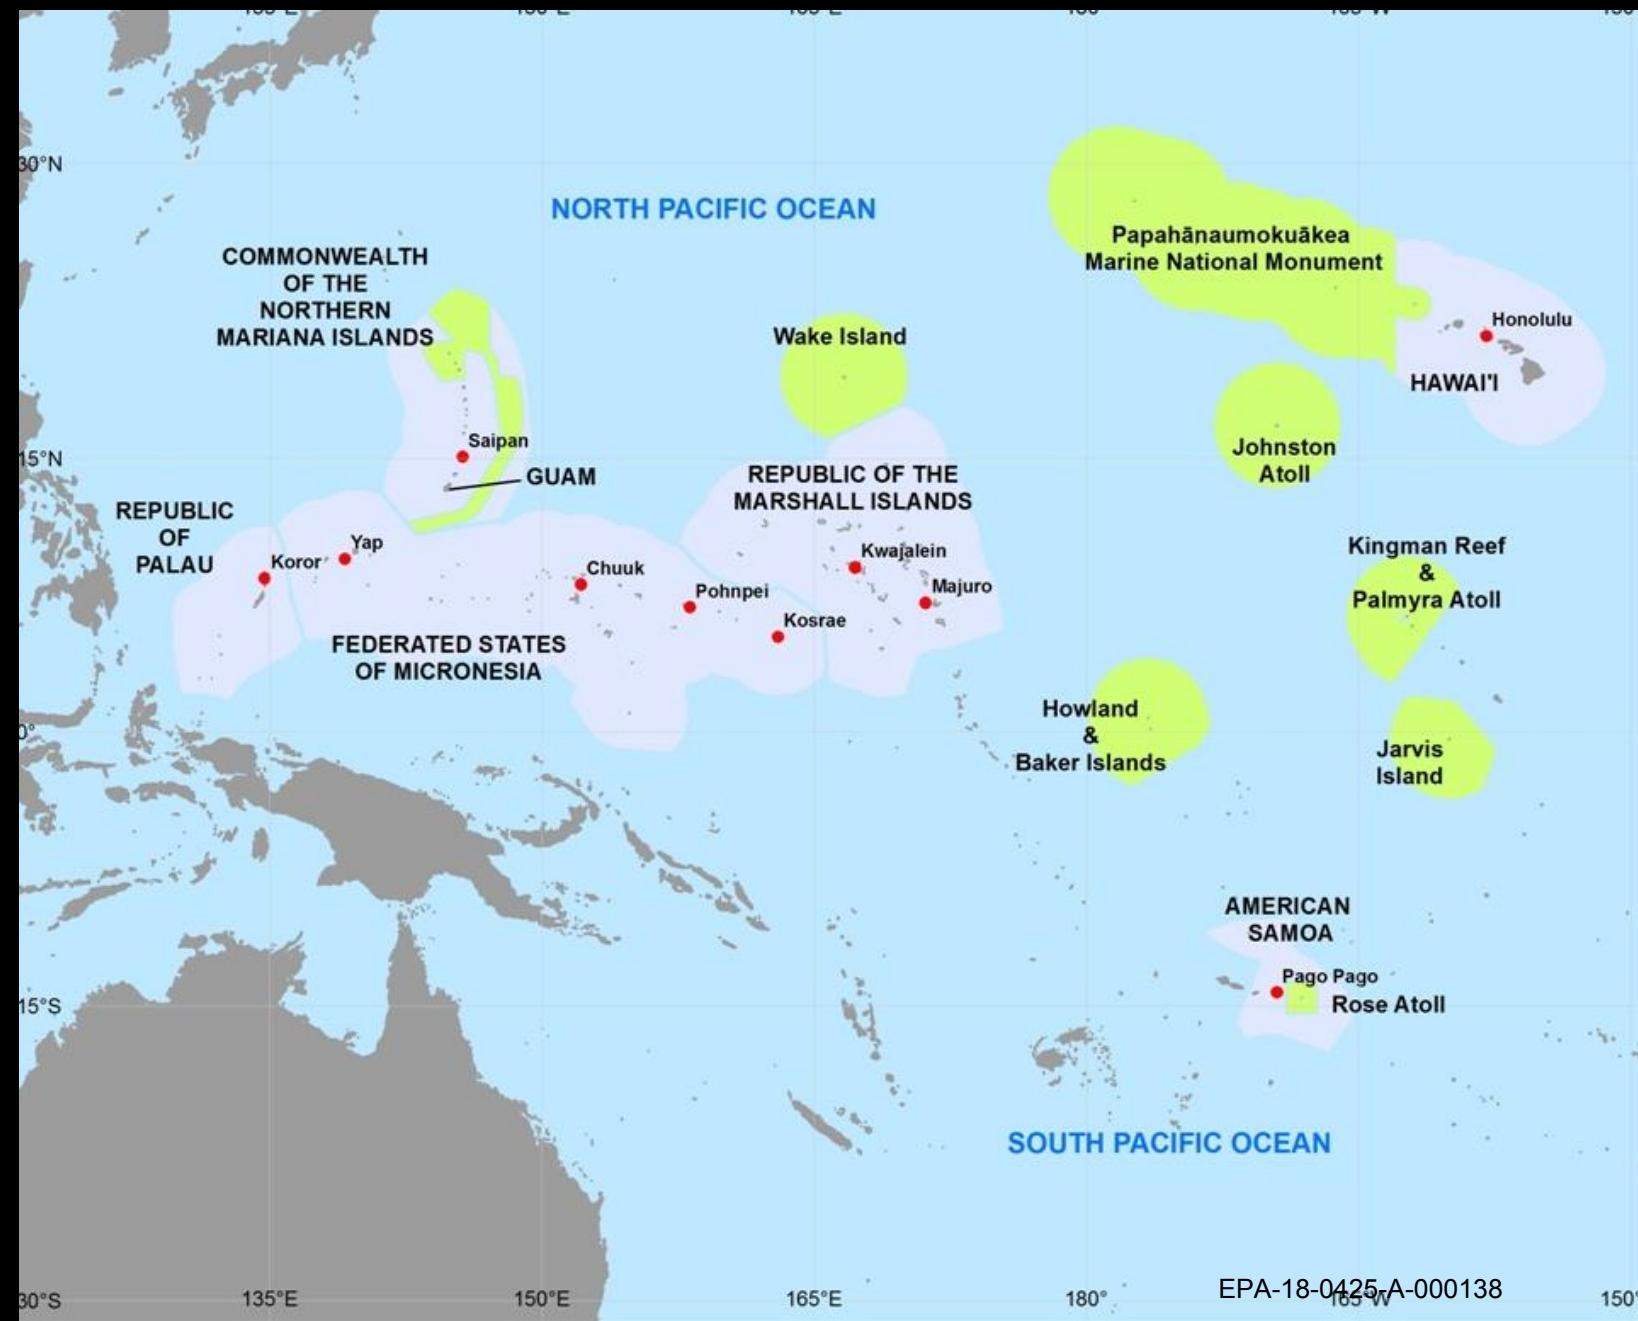

530,000 sq miles
24% US EEZ

Time zones:

GU: -7 hr (+ 1 day)

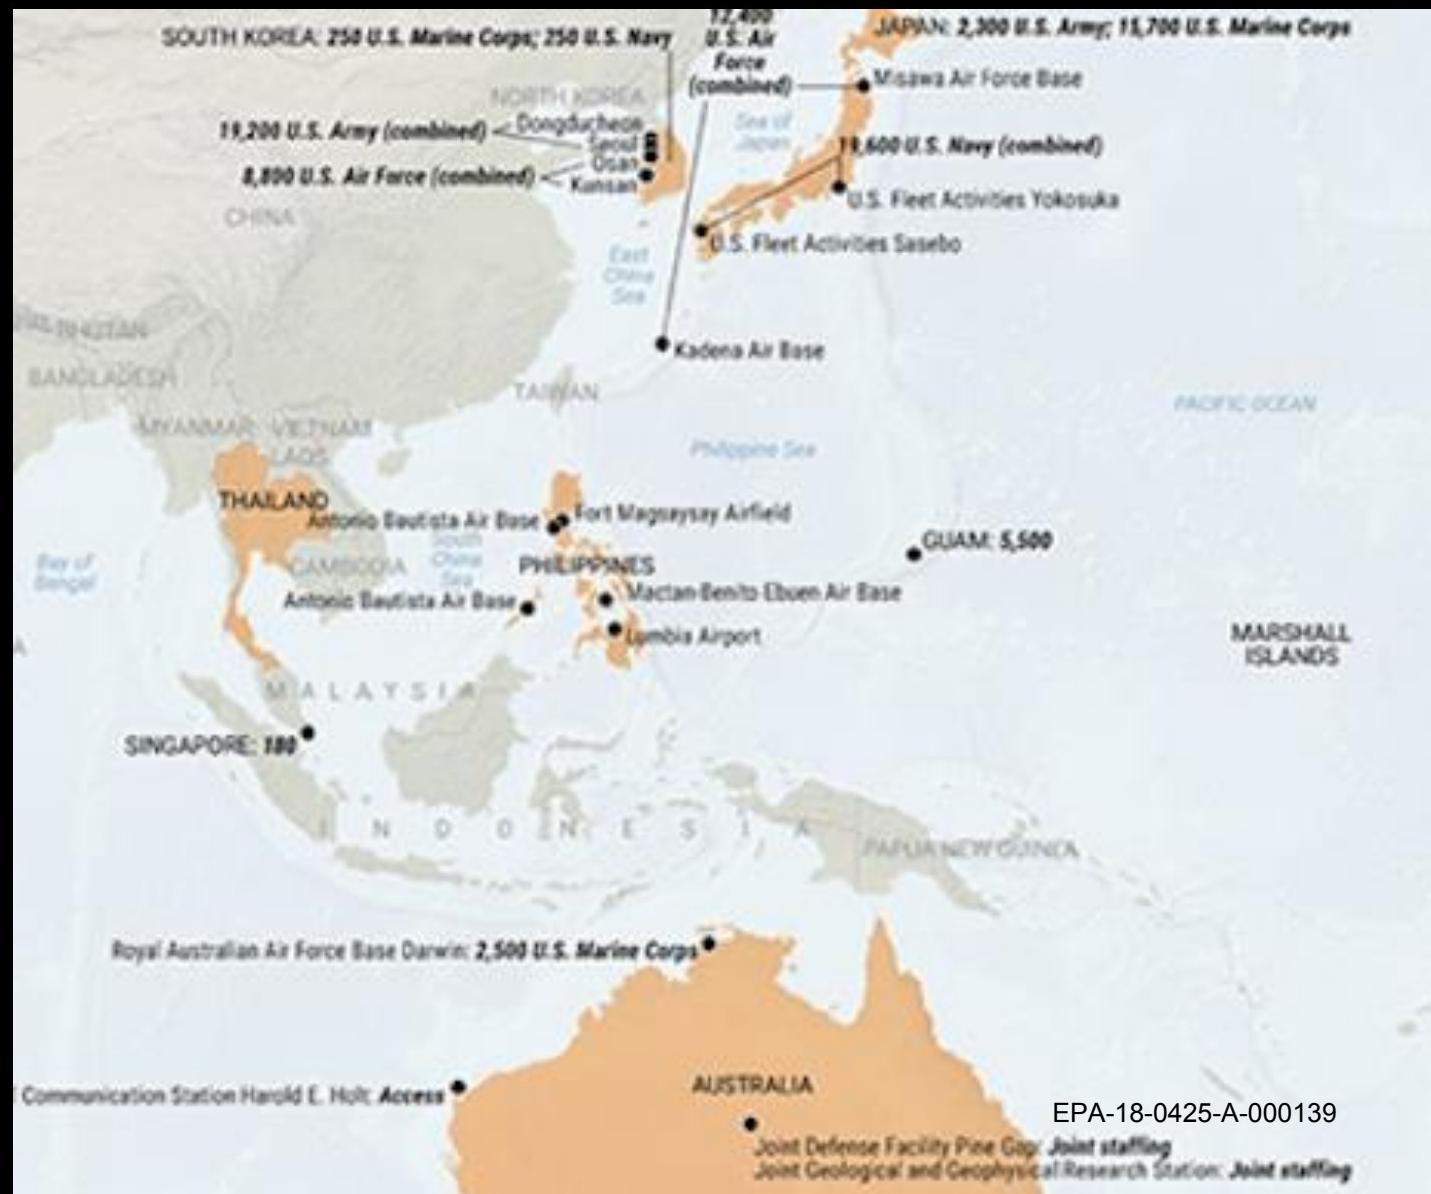

Same as Sydney

Palau: -8 (+1 day, same Tokyo)

National Security Importance

- Military bases
 - Guam – closest US soil to East Asia
- Strategic agreements
 - FAS – USG projects
- Missile Defense
 - Kwajalein Atoll, RMI
- Economic encroachment
 - China

Economic Considerations

Large ocean EEZ

Major revenue sources

- Military (Guam), & USG
- Tourism
- Gambling (CNMI)
- Transportation (Guam)
- Tuna (Am Sam)

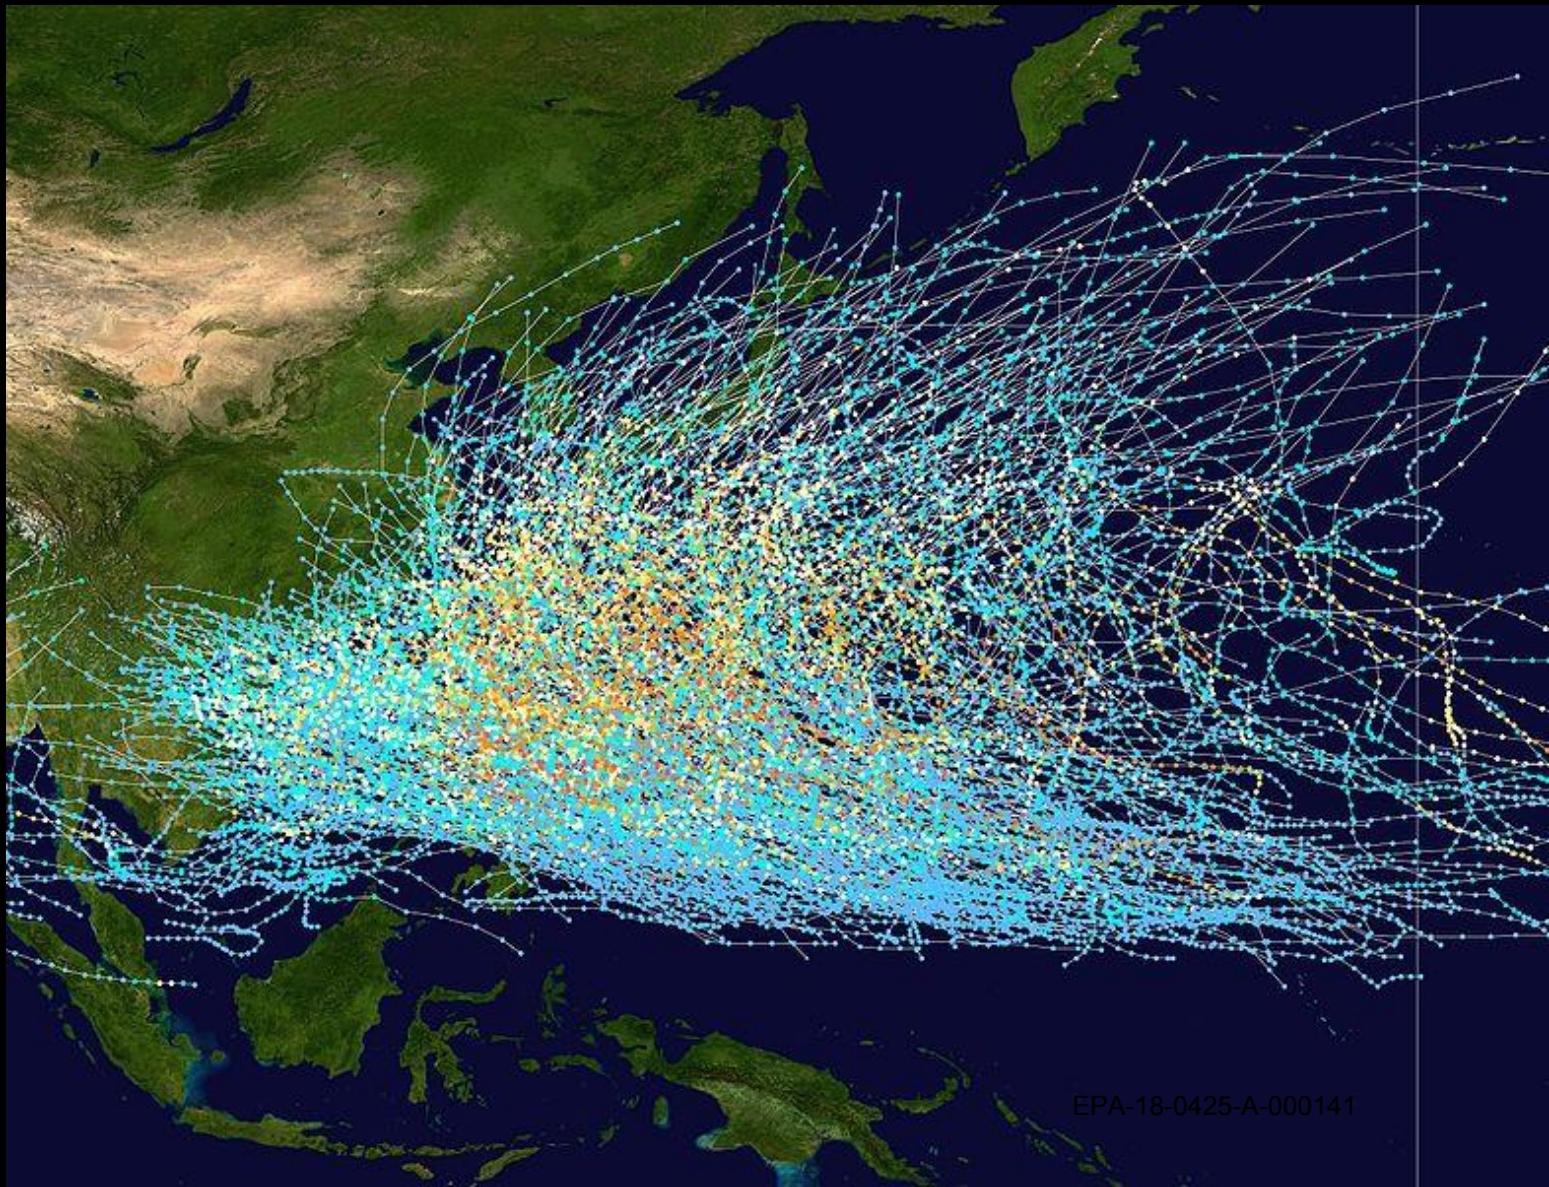

Poor economies, high
poverty rates

% of Population below poverty line
Pacific Islands and United States, 2009

Other Challenges in US Pacific Islands

- Remote, costly
- Small populations, talent pool
- Historically poor performing utilities, govt agencies
- Military, development pressure
- Highest concentration of Category 4 and 5 storms on earth
- => The US Pacific territories require awareness & assistance

EPA's Goal in the Pacific Islands: *Help the US Pacific Islands protect their environmental health.*

R9's Strategic approach:

- *Support Pacific Islands through funding, technical assistance, and capacity building*
- *EPA lead when Pacific Islands not positioned to do so (e.g., emergency response, certain permit and enforcement actions)*

R9's Internal Structure for Pacific Islands

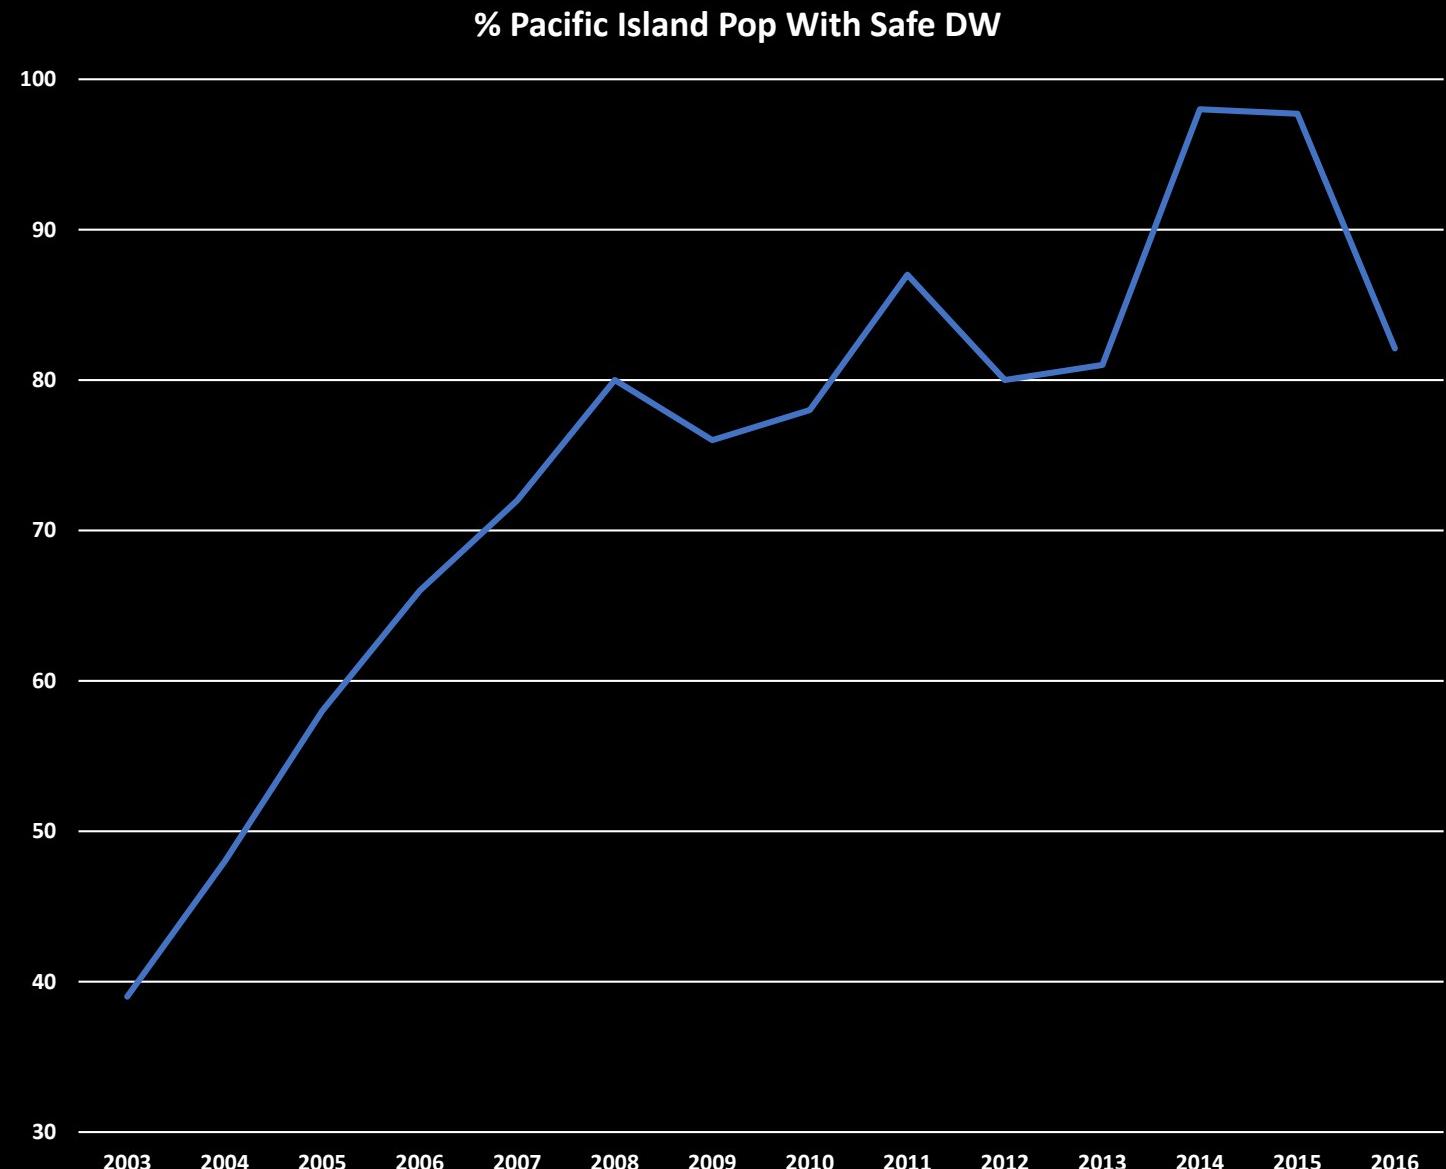

- *Pacific Islands Office (LND)*
 - *5 FTE (currently)*
 - *Efficient “one-stop shopping”*
 - *Face of EPA with Pacific Islands*
 - *Manage PPG-like grants (authorized by Congress)*
 - *No dedicated HQ/NPM support*
- *R9 Program Offices*
 - *PIO coordinates with all divisions on Pacific Island work*
 - *WTR, SFD, LND, AIR, ENF, EMD, ORC, OPA*

EPA Funding to Pacific Islands: \$33 M/yr

EPA Grants, FY2016	AS	CNMI	Guam	Totals
Consolidated Environmental Protection Grants	\$2,703,861	\$2,813,719	\$3,254,195	\$8,771,775
Water & Wastewater Construction Grants	\$8,894,536	\$6,410,000	\$8,800,000	\$24,104,536
Diesel Emission Reduction Act (DERA)	\$70,715	\$0	\$0	\$70,715
Totals	\$11,669,112	\$9,223,719	\$12,054,195	\$32,947,026

Success Story – Drinking Water Improvements

- Drinking water safety
 - From 39% to 85% of population, 2003-2018
 - Health violations were common, now rare
 - No violations last 5 years

Success Story – Disease Eradication, Leptospirosis

American Samoa – Leptospirosis risk nearly eradicated

- ID risk from piggeries
- Outreach to pig owners
- Enforcement
- Monetary incentives

=> liability to asset

EPA-18-0425-A-000146

Success Story – Wastewater Spills Reduced >99%

- Add'l \$200M in grants
- Upgrades to sewage systems & WWTPs
- Beaches are safer
- Public health improved

EPA-18-0425-A-000147

More Success Stories:

- Emergency responses
 - Typhoon Soudelor
- GEPA info mgmt. system: worth \$4M/yr to Guam
- Tau, Am Sam: 1st 100% RE island
- Am Samoa Brownfields: key to econ development
- Landfills – 2 major dumps closed: Guam & CNMI
- UXO & other WW II legacies
- Positive relationships

What to Expect in Director's Meeting

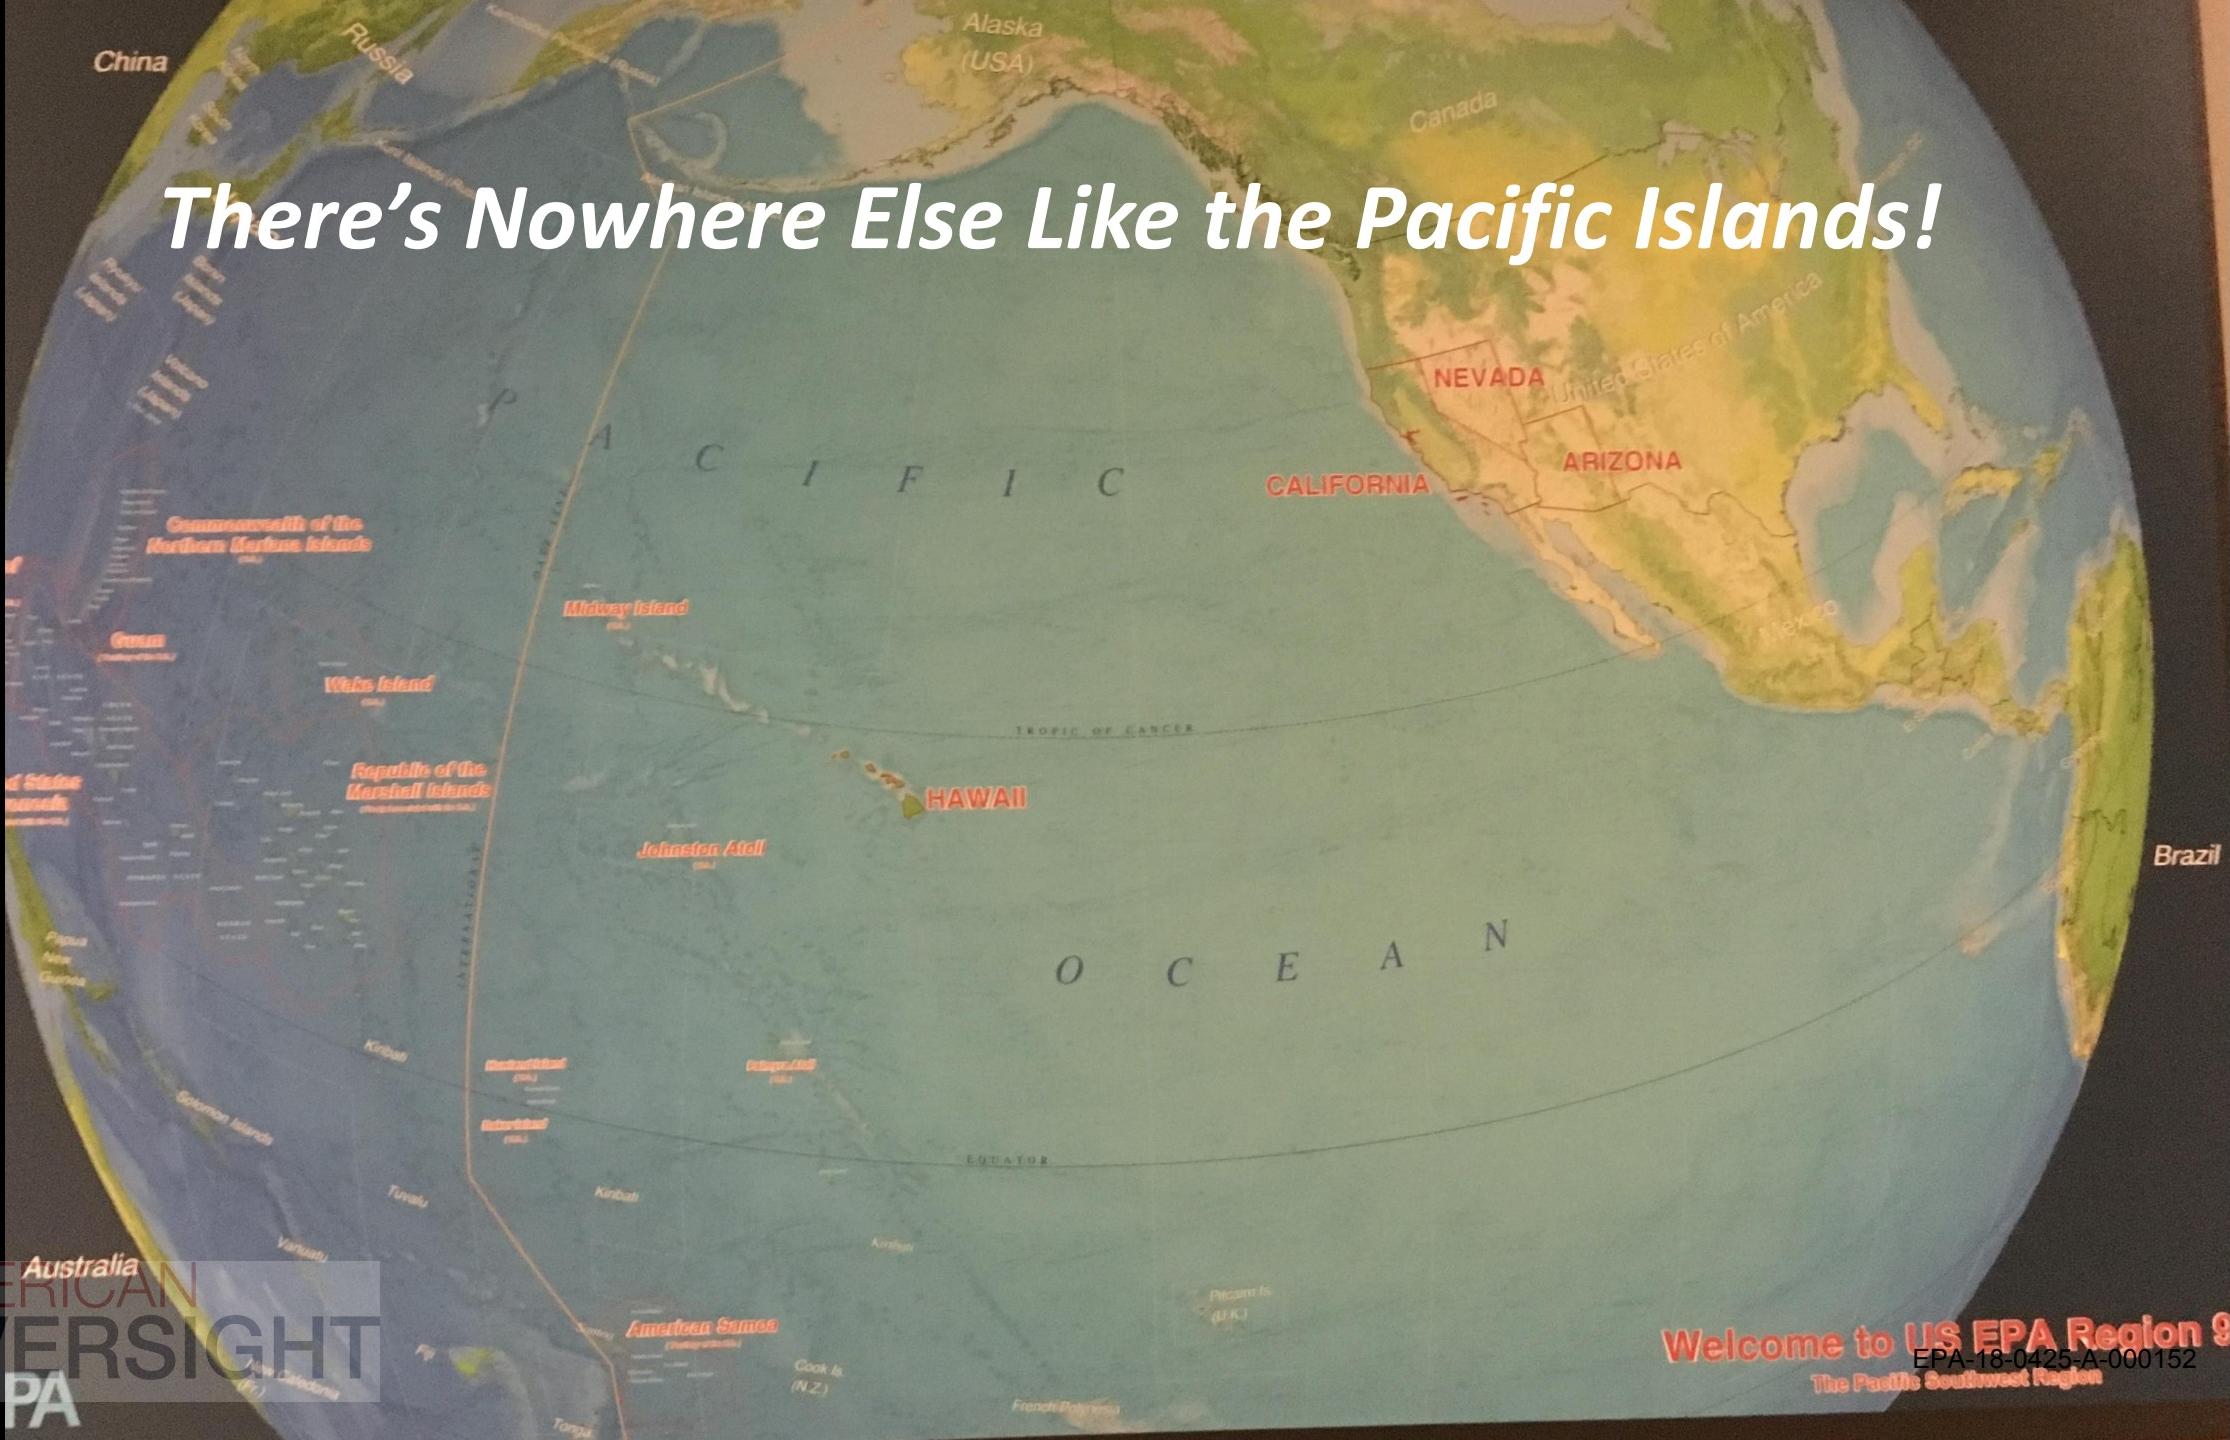

- Who's coming (attendee list handout)
- US Territories
 - Guam (11, including 3 Board members)
 - CNMI (4)
 - Am Samoa (3)
- Freely Associated States
 - Marshall Islands (3)
 - Palau (1)
 - FSM: (3, including 1 each from states of Pohnpei, Yap, Chuuk)

Agenda, Key Times for RA

- Tuesday 8:30-10:30 – Welcome, introductions, mingling
 - Draft Talking points
- Wednesday 8:30-10 – Speakers from private sector & nat'l orgs

Pacific Directors' Priorities

- Funding: territories rely heavily on US EPA grants
 - Proposed FY18 budget would have cut revenues up to 45%
- Continued technical & other support
- They value relationships with R9
- To hear from you that Pacific Islands are a priority for EPA
- Specific issues which may come up:
 - Need/want PHS engineers
 - Kwajalein: Marshall Islands wants continued EPA involvement with DOD
 - FAS: continued tech support for lab and other needs

Pacific Islands Environment Directors Meeting, San Francisco, June 19-21, 2018 AGENDA (v6.2)

EPA Region IX Office, 75 Hawthorne Street, San Francisco, CA 94105, 11th Floor Maui & Kauai Rooms

Overall outcomes: commit to collaboration; build stronger connections and relationships among and between Pacific Islands and EPA R9; and identify action items through FY 2019

Please coordinate with R9 Pacific Islands Office to set up side meetings, especially for Monday 6/18.

Issue	EPA Region 9 includes the strategically important U.S. territories of American Samoa, Guam, and the Commonwealth of the Northern Mariana Islands (CNMI); and Freely Associated States of Palau, Marshall Islands, and Micronesia. These remote islands, several thousand miles from the rest of Region 9, are important to US national security. The U.S.-affiliated Pacific islands have small populations, a high percentage of residents living in poverty, vulnerability to natural disasters, and unique legal relationships with the U.S.—making them different from the rest of Region 9 and requiring special consideration and attention.
Background	<p>The Pacific islands are home to two major military bases on Guam (the closest US soil to Korea and China), and the main facility to test the United States anti-ballistic missile defense system (Kwajalein Atoll, Marshall Islands). EPA partners with DOD and the Pacific islands to protect national security, and with local government to build capacity and address their most pressing needs: improving access to clean, safe water; increasing resilience to droughts, floods, typhoons and other natural disasters; enhancing joint preparedness for emergency response, and rehabilitating contaminated sites.</p> <p>EPA largely treats the U.S. territories as states, providing funding for local environmental programs and water infrastructure construction. EPA's \$33 million dollars in annual grants support economic development in the islands, including major water system improvements and hundreds of jobs.</p> <p>EPA Region 9 uses Congressionally-authorized policies specific to the islands to provide administrative efficiency and flexibility, including consolidating grants from multiple funding sources to minimize administrative burdens. Region 9 coordinates technical assistance to the Pacific islands as an in-kind service, and uses enforcement, when necessary, as a tool to improve public health.</p> <p>Major accomplishments in the Pacific islands include:</p> <ul style="list-style-type: none"> • Pacific Island residents with access to safe water increased from 39% in 2003 to 82% in 2017. • Sewage spills on Guam were reduced by over 99% from 2003 to 2017. • Pollution from municipal dumps into waterways on Guam and Saipan was eliminated in 2016. • New cases of the disease leptospirosis in American Samoa have been nearly eradicated by eliminating wastewater discharge from small pig farms. • EPA supported construction of the first LEED Platinum building in the Pacific—the new headquarters for American Samoa EPA. • In American Samoa, EPA helped the outer islands of Ta'u and Ofu gain energy independence by switching from high-priced diesel to 100% renewable energy. • EPA helped the CNMI improve safe handling of unexploded ordnance left over from WWII. • Recycling rate in Guam increased 18% to 34% from 2011 to 2017, with EPA technical assistance.
Stakeholders	<ul style="list-style-type: none"> • Guam Governor Eddie B. Calvo • Guam EPA Administrator Walter Leon Guerrero • CNMI Governor Ralph DLG Torres • CNMI BECQ Administrator Eli Cabrera • American Samoa Governor Lolo Moliga • American Samoa EPA Director Ameko Pato
Next Steps	<ul style="list-style-type: none"> • EPA will provide technical assistance to American Samoa, CNMI, and Guam as they implement FY18 grants which include \$33 million to water utilities and environmental programs. • EPA will host the Pacific Islands Environment Directors Meeting at the Regional Office in San Francisco June 19-21, 2018.

Draft Opening Remarks for Mike Stoker

Pacific Islands Environment Directors Meeting, June 19, 2018

[Opening ceremony begins at 8:30. Mike will follow John McCarroll's brief introduction. The allotted time for Mike is about 10 minutes, but flexible.]

- **[Welcome]**
 - Hello everybody. I want to give you a warm welcome to San Francisco.
 - I'm so happy to see you all here today.
 - I'm happy to be here myself.
 - I'm looking forward to meeting all of you, and getting to know you and your islands.
 - I'm especially looking forward to hearing how we can support you more.
- **[Personal connection]**
 - As you've probably heard, I just started here at EPA last month.
 - In my first week on the job, I met with Guam's Governor Eddie Calvo.
 - I'll tell you the same thing I told him: the Pacific islands have a special importance to me.
 - My grandfather was in the Seabees in Guam during WWII, and I grew up feeling a special connection with the Pacific Islands.
 - And as a resident of Santa Barbara, I also have a connection with the Pacific Ocean – just from the other side as you.
- **[More about my role as RA – (similar points as made during R9 all-hands)]**
 - Honor to be selected . . .
 - I take this job very seriously . . .
 - I see myself as an ambassador for the Region . . .
 - It's important for me to connect with as much of the Region as possible . . .
 - The Pacific islands are an important part of the Region. I hope to visit each of you.
 - I'm planning to visit American Samoa in August as part of the Coral Reef Task Force.
- **[Recognition & accomplishments]**
 - I'd like to thank Alexis Strauss for being an advocate for the Pacific Islands during her time as Acting Regional Administrator.
 - I'd also like to thank Jeff, Bridget and John, and our Pacific Islands Team, and the many other folks in this Region, who have been strong advocates for the Pacific islands.
 - I've learned that the partnership between EPA and the Pacific islands goes back a long way – nearly to the beginning of EPA Region 9.
 - I also heard about the good work you've done, and some of the big accomplishments we have made together in the Pacific over the past 15 years.
 - Drinking water is so much safer than it used to be 15 years ago. That's a major public health improvement.
 - Leptospirosis. In American Samoa, the risk from the disease Leptospirosis has been nearly eradicated. American Samoa EPA took a strong leadership role in that.
 - Wastewater and beaches. Wastewater spills have decreased by over 90% since the early 2000s, and beaches are safer – thanks again to teamwork from EPA and your offices.

- Solid waste handling has improved tremendously. Guam and CNMI have closed two large dumps, and opened compliant landfills. And Guam's recycling rate has jumped from 18% to 34%.
- **[Budget]**
- I'd like to talk for a moment about EPA's budget.
 - First, the FY18 budget – You're probably aware that after several Continuing Resolutions, our funding is now intact through the end of September.
 - We're in the FY19 budget process now, so we can't talk with certainty about next year.
 - I want to let you know the Administration's FY19 budget does propose cuts to EPA funding – including cuts to several of the funds we give to state and territorial EPAs.
 - But as we learned with the FY18 budget, Congress plays a major role in the budget process, and at least for FY18, Congress did not cut EPA's funding from prior levels.
 - The initial indications from Congress for FY19 are no major budget cuts to EPA grants.
 - In other words, we expect EPA's budget next year to look very similar to this year, other than internally we'll have a few less staff.
 - And if Congress doesn't pass a budget by September 30, we could start next fiscal year with another Continuing Resolution, which would also keep the status quo.
 - *[Note to Mike: Administration-proposed budget cuts would have severe impacts for the islands, with up to an overall 45% reduction in revenues to territories.]*
 - Even with all our budget uncertainties, I want to assure you the Pacific Islands will continue to be a priority for us at EPA.
- **[Closing]**
- In closing, I just want to say I am very happy that we are hosting you in San Francisco for this Pacific Islands Environment Directors meeting.
- In alignment with Administrator Scott Pruitt, our main job here is to support you – to help you do the job of protecting the environmental health of the Pacific Islands.
- The Pacific Islands will remain a priority for EPA for as long as I'm here.
- I look forward to seeing you over the next few days, and to working with you over the next several years to build upon our many great successes.
- Thank you again.

450,000 people

10+ languages

Rich cultural heritage

US Pacific Islands

Territorial land area:
595 sq miles
= 12 x SF area

Ocean Exclusive Economic Zone:

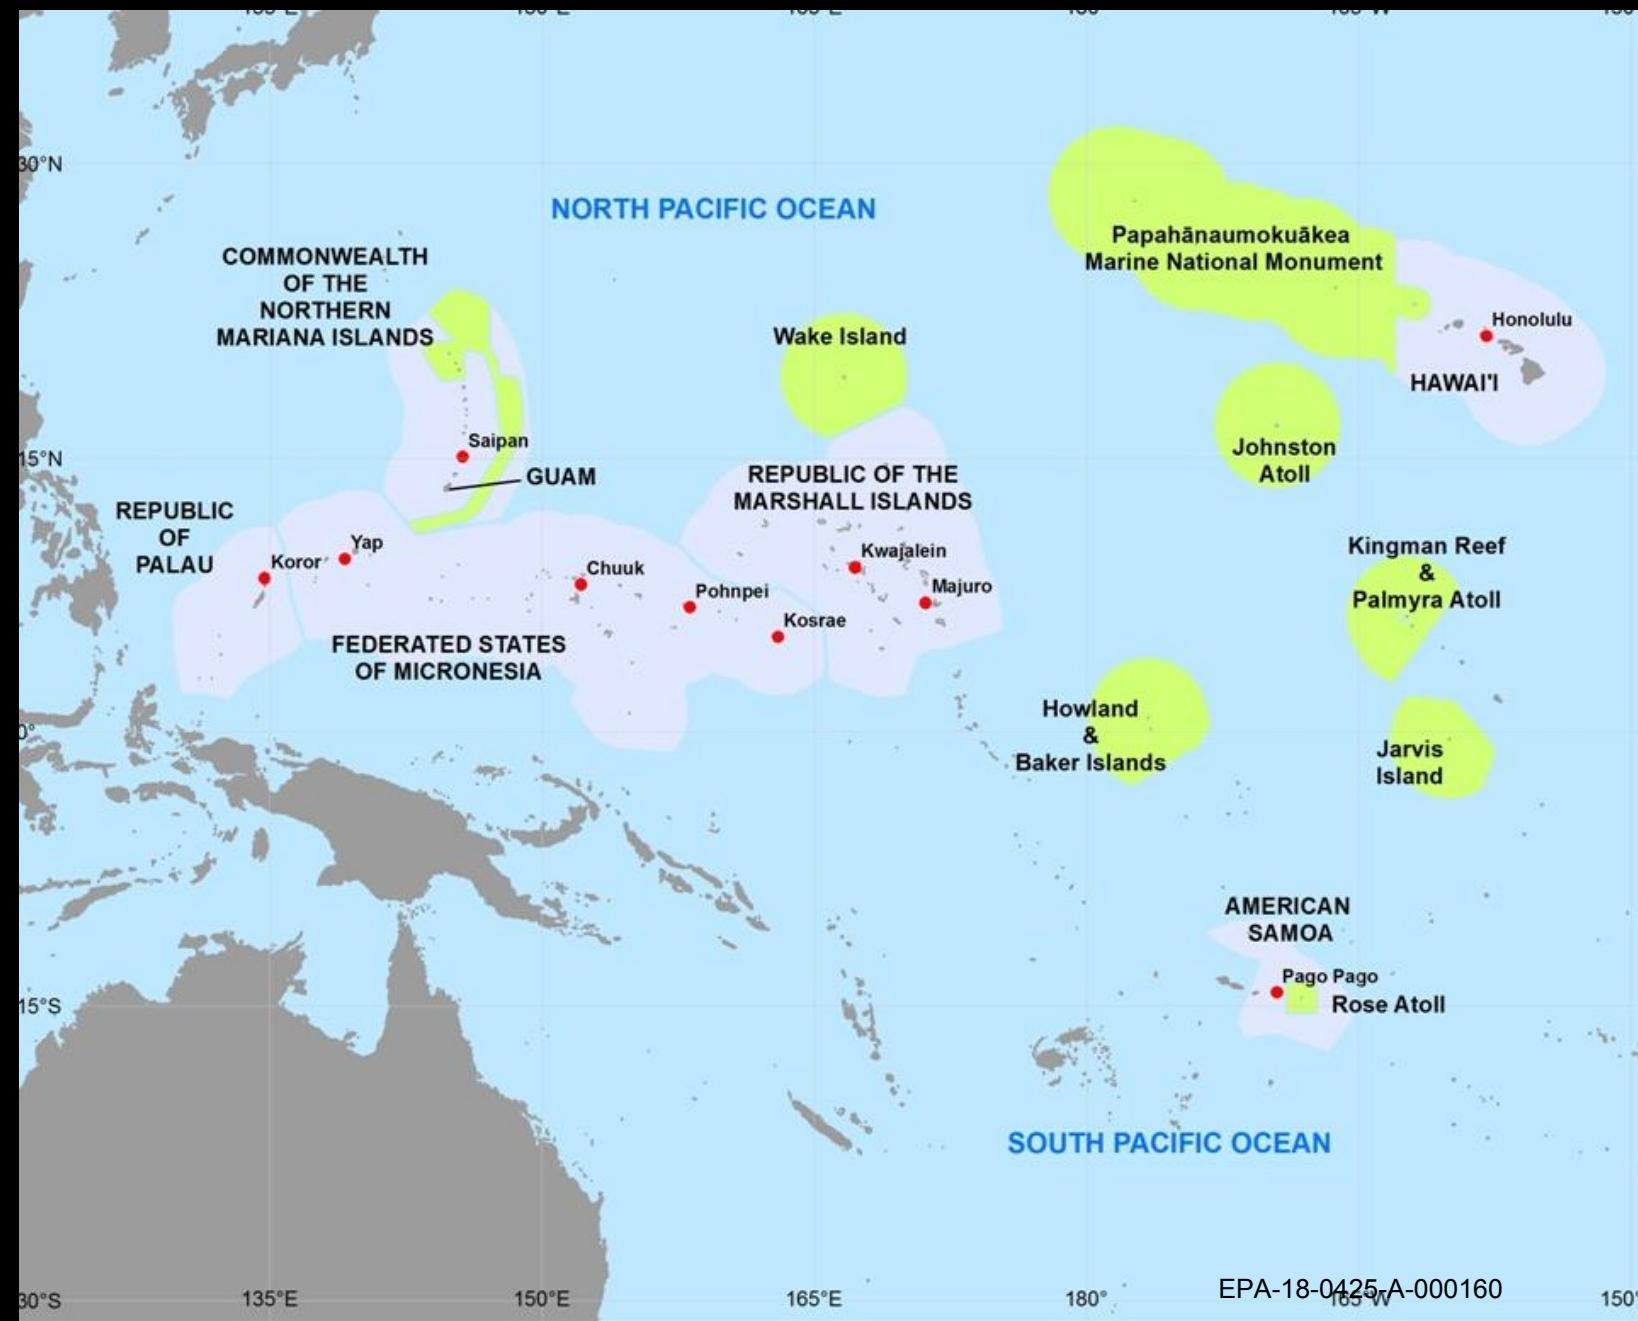

530,000 sq miles
24% US EEZ

Time zones:

GU: -7 hr (+ 1 day)

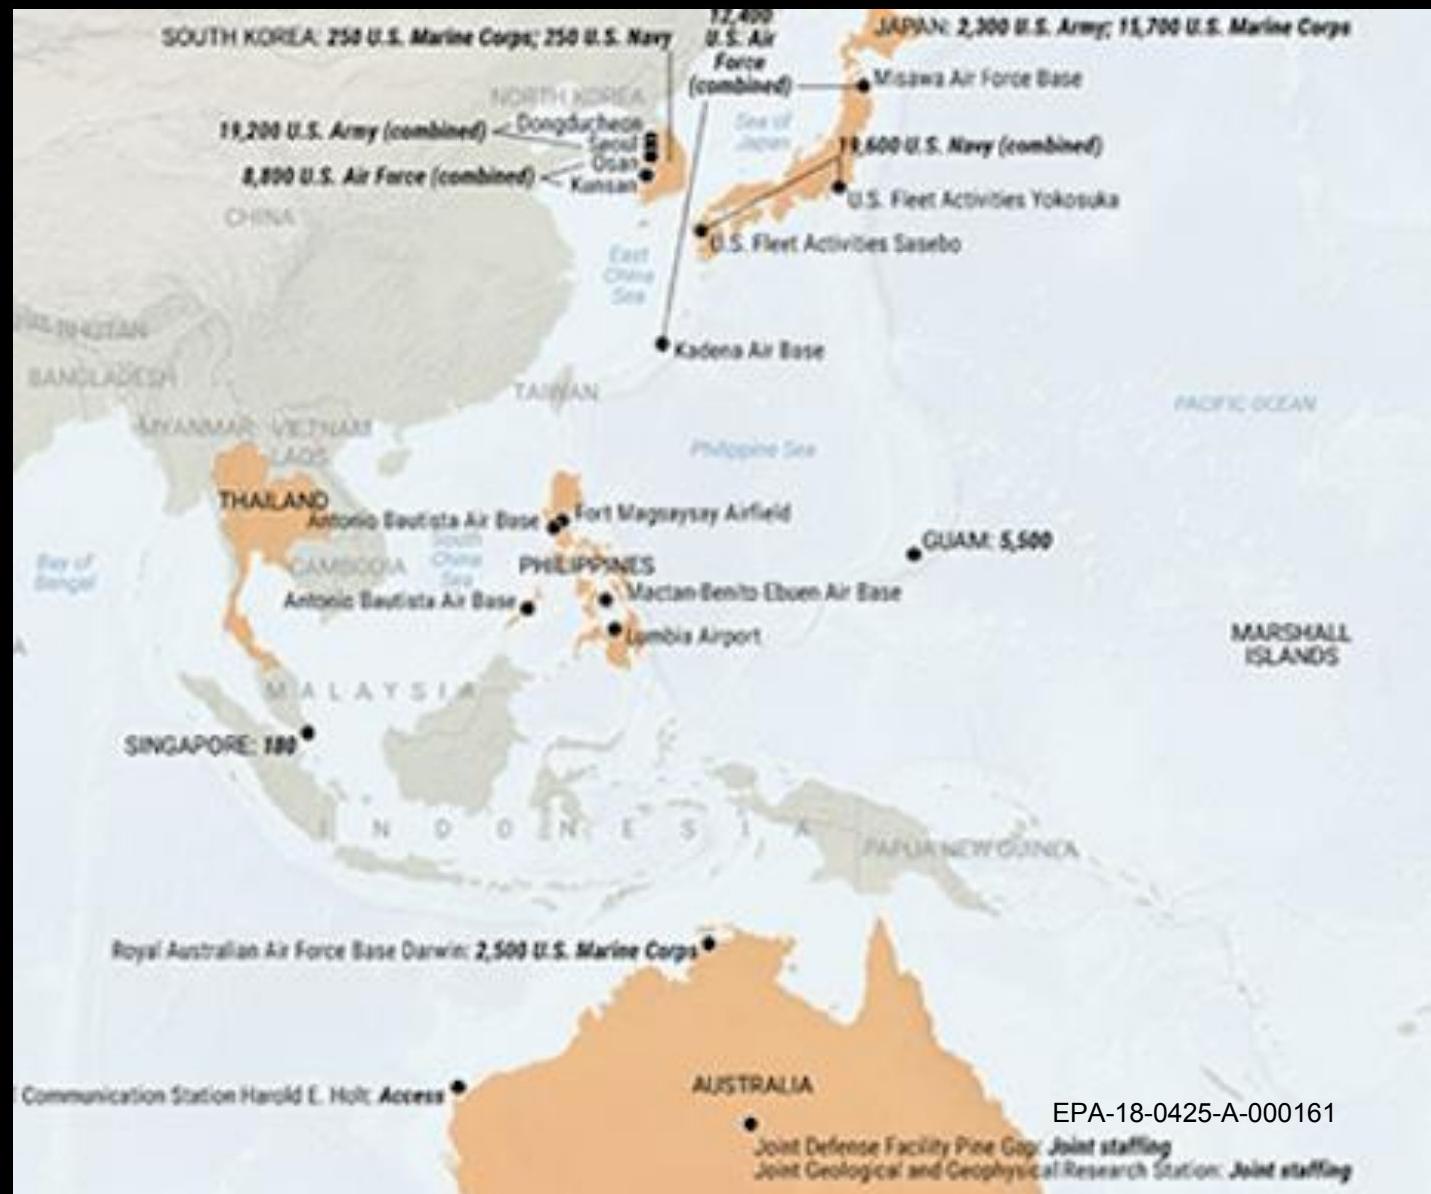

Same as Sydney

Palau: -8 (+1 day, same Tokyo)

National Security Importance

- Military bases
 - Guam – closest US soil to East Asia
- Strategic agreements
 - FAS – USG projects
- Missile Defense
 - Kwajalein Atoll, RMI
- Economic encroachment
 - China

Economic Considerations

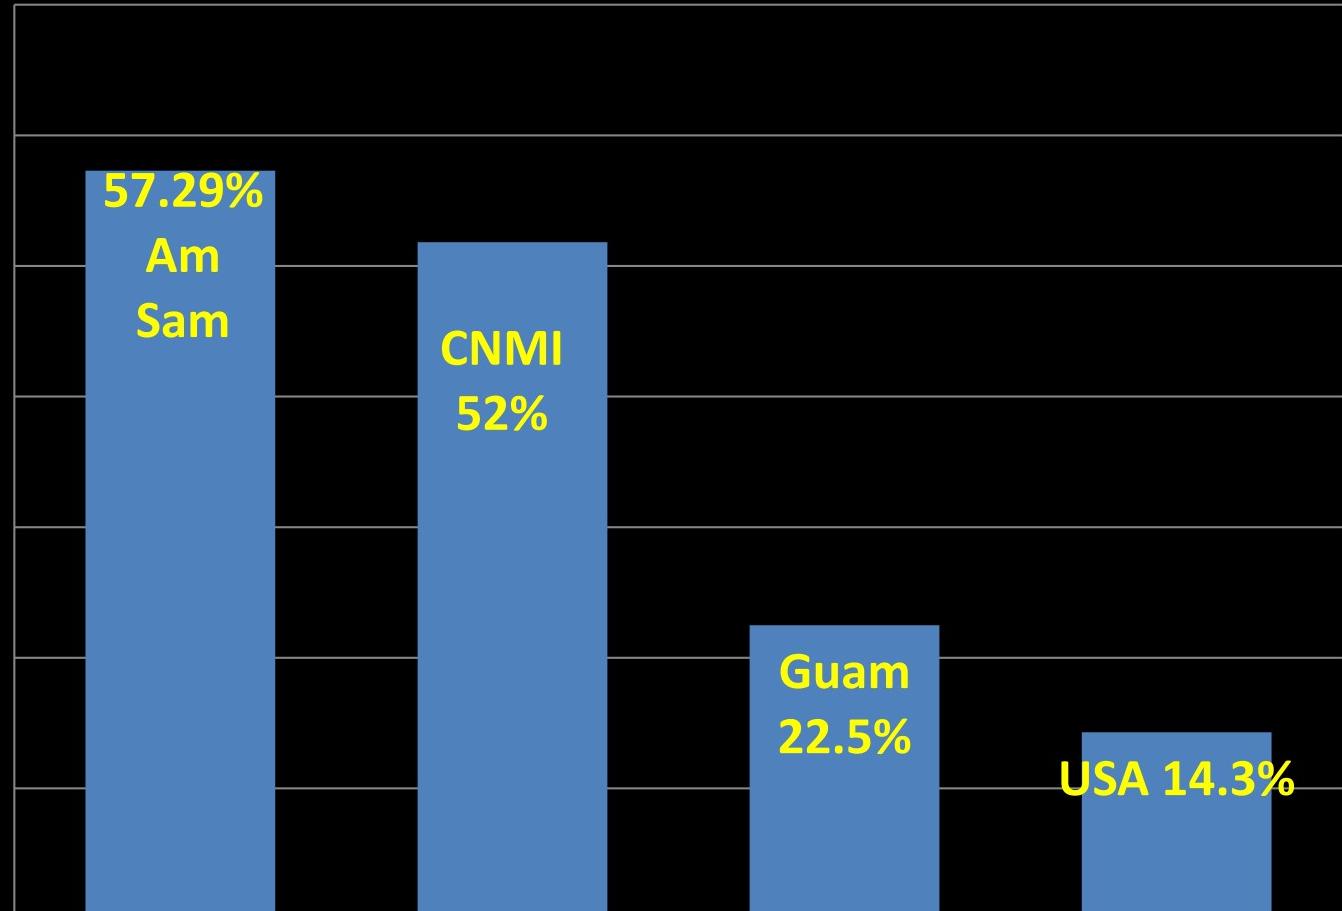

Large ocean EEZ

Major revenue sources

- Military (Guam), & USG
- Tourism
- Gambling (CNMI)
- Transportation (Guam)
- Tuna (Am Sam)

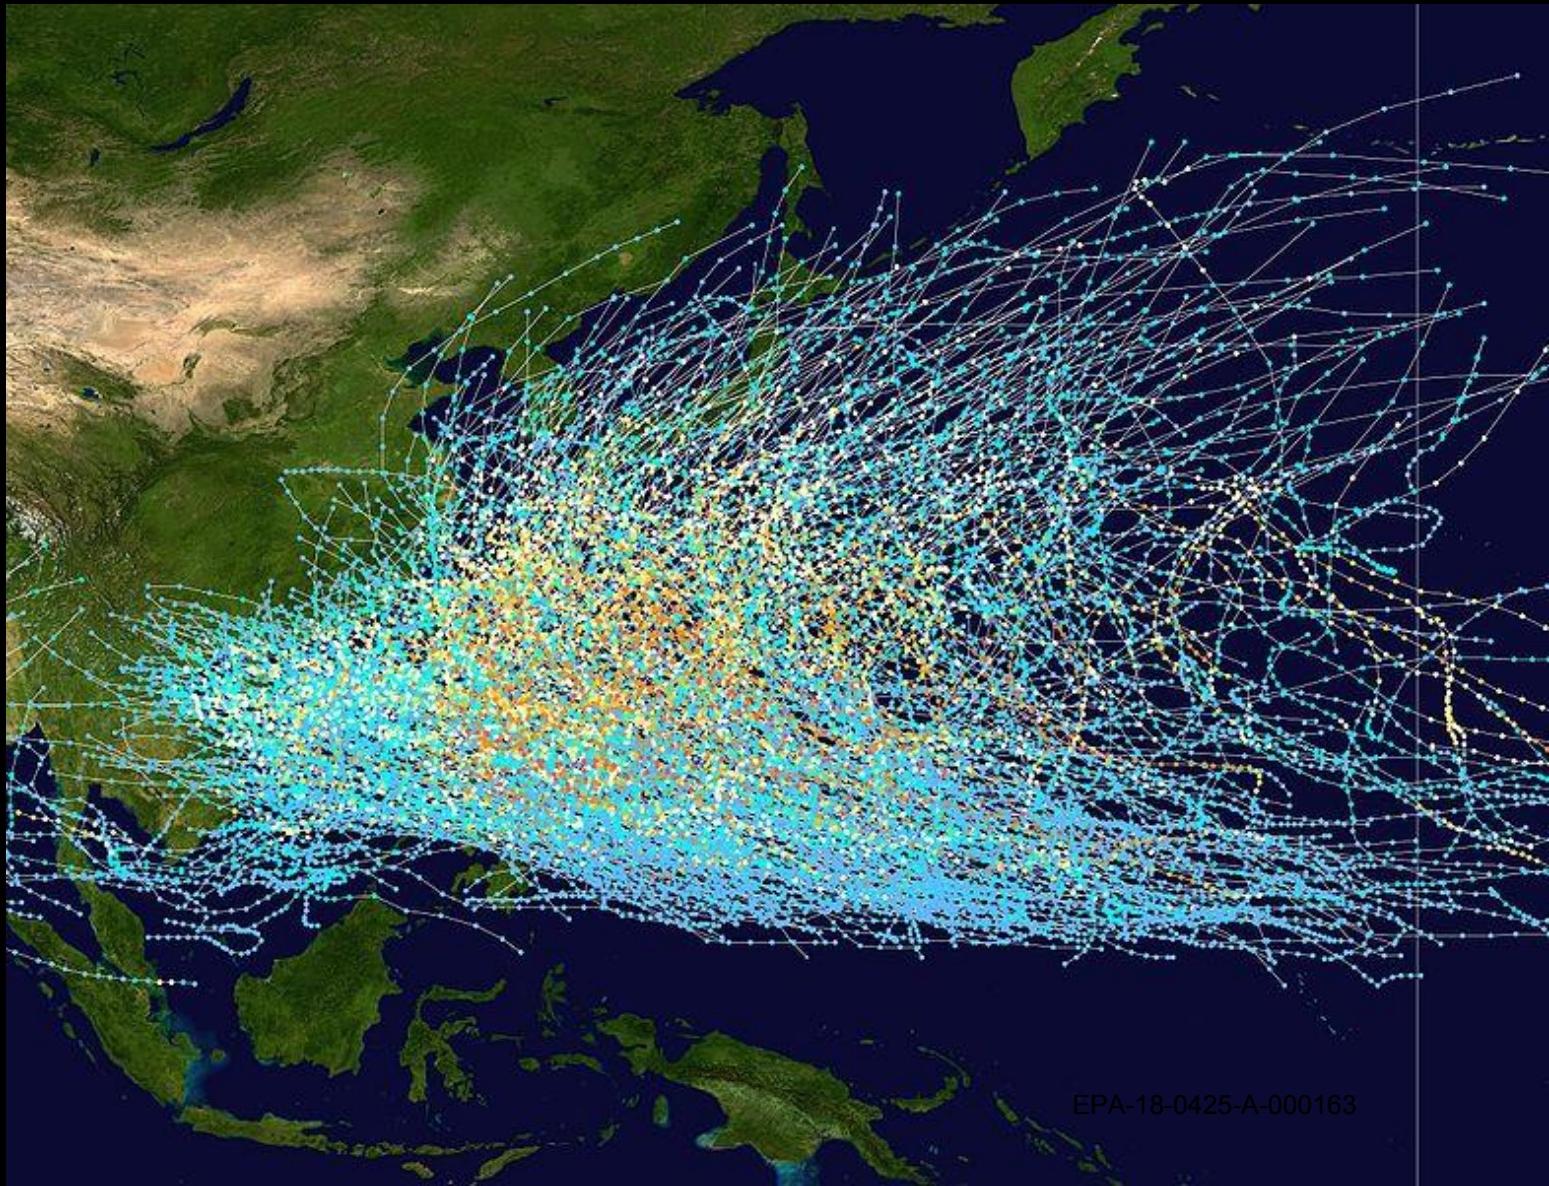

Poor economies, high
poverty rates

% of Population below poverty line
Pacific Islands and United States, 2009

Other Challenges in US Pacific Islands

- Remote, costly
- Small populations, talent pool
- Historically poor performing utilities, govt agencies
- Military, development pressure
- Highest concentration of Category 4 and 5 storms on earth
- => The US Pacific territories require awareness & assistance

EPA-18-0425-A-000163

EPA's Goal in the Pacific Islands: *Help the US Pacific Islands protect their environmental health.*

R9's Strategic approach:

- *Support Pacific Islands through funding, technical assistance, and capacity building*
- *EPA lead when Pacific Islands not positioned to do so (e.g., emergency response, certain permit and enforcement actions)*

R9's Internal Structure for Pacific Islands

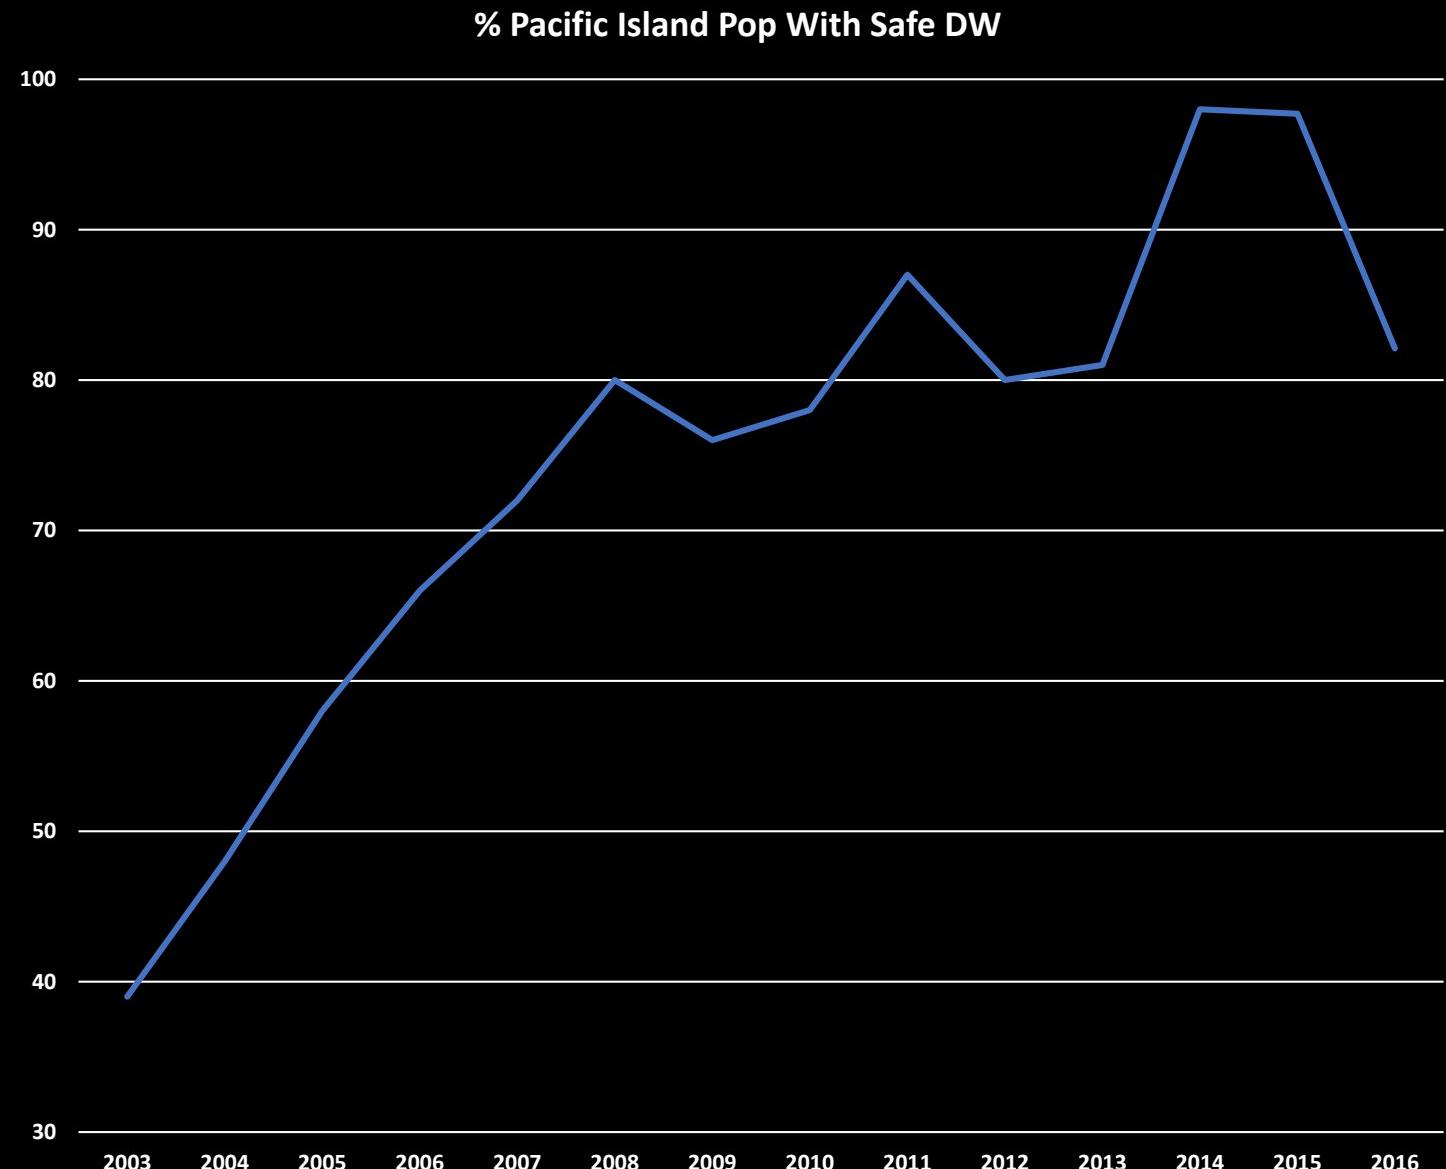

- *Pacific Islands Office (LND)*
 - *5 FTE (currently)*
 - *Efficient “one-stop shopping”*
 - *Face of EPA with Pacific Islands*
 - *Manage PPG-like grants (authorized by Congress)*
 - *No dedicated HQ/NPM support*
- *R9 Program Offices*
 - *PIO coordinates with all divisions on Pacific Island work*
 - *WTR, SFD, LND, AIR, ENF, EMD, ORC, OPA*

EPA Funding to Pacific Islands: \$33 M/yr

EPA Grants, FY2016	AS	CNMI	Guam	Totals
Consolidated Environmental Protection Grants	\$2,703,861	\$2,813,719	\$3,254,195	\$8,771,775
Water & Wastewater Construction Grants	\$8,894,536	\$6,410,000	\$8,800,000	\$24,104,536
Diesel Emission Reduction Act (DERA)	\$70,715	\$0	\$0	\$70,715
Totals	\$11,669,112	\$9,223,719	\$12,054,195	\$32,947,026

Success Story – Drinking Water Improvements

- Drinking water safety
 - From 39% to 85% of population, 2003-2018
 - Health violations were common, now rare
 - No violations last 5 years

Success Story – Disease Eradication, Leptospirosis

American Samoa – Leptospirosis risk nearly eradicated

- ID risk from piggeries
- Outreach to pig owners
- Enforcement
- Monetary incentives

=> liability to asset

EPA-18-0425-A-000168

Success Story – Wastewater Spills Reduced >99%

- Add'l \$200M in grants
- Upgrades to sewage systems & WWTPs
- Beaches are safer
- Public health improved

EPA-18-0425-A-000169

More Success Stories:

- Emergency responses
 - Typhoon Soudelor
- GEPA info mgmt. system: worth \$4M/yr to Guam
- Tau, Am Sam: 1st 100% RE island
- Am Samoa Brownfields: key to econ development
- Landfills – 2 major dumps closed: Guam & CNMI
- UXO & other WW II legacies
- Positive relationships

What to Expect in Director's Meeting

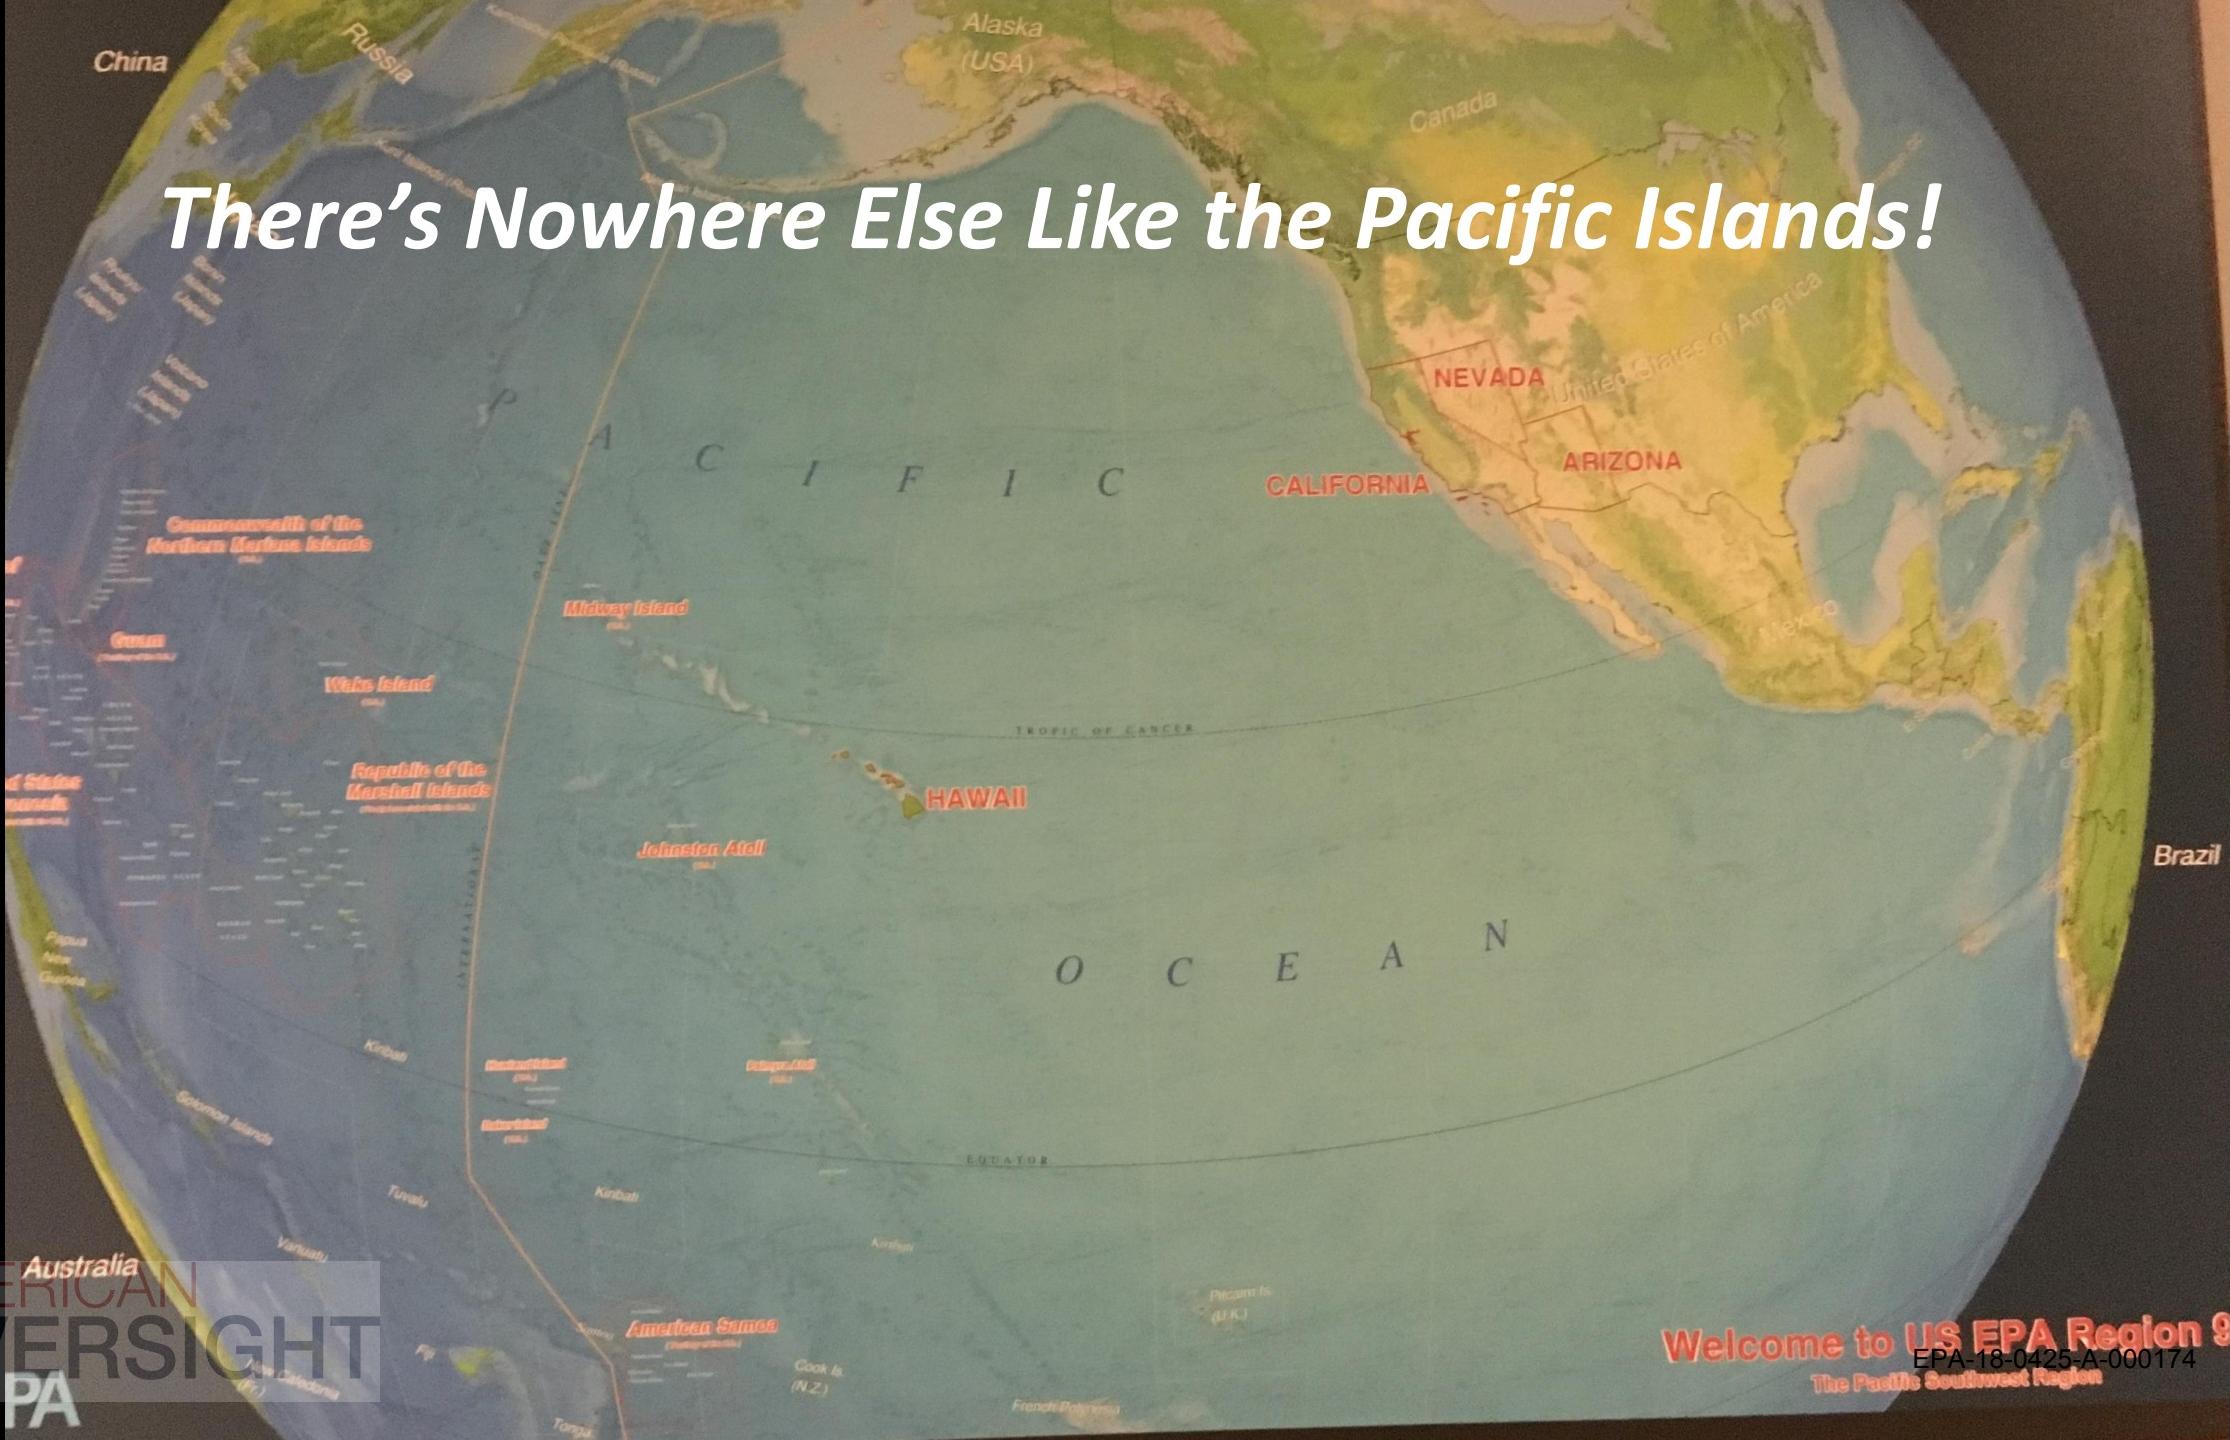

- Who's coming (attendee list handout)
- US Territories
 - Guam (11, including 3 Board members)
 - CNMI (4)
 - Am Samoa (3)
- Freely Associated States
 - Marshall Islands (3)
 - Palau (1)
 - FSM: (3, including 1 each from states of Pohnpei, Yap, Chuuk)

Agenda, Key Times for RA

- Tuesday 8:30-10:30 – Welcome, introductions, mingling
 - Draft Talking points
- Wednesday 8:30-10 – Speakers from private sector & nat'l orgs

Pacific Directors' Priorities

- Funding: territories rely heavily on US EPA grants
 - Proposed FY18 budget would have cut revenues up to 45%
- Continued technical & other support
- They value relationships with R9
- To hear from you that Pacific Islands are a priority for EPA
- Specific issues which may come up:
 - Need/want PHS engineers
 - Kwajalein: Marshall Islands wants continued EPA involvement with DOD
 - FAS: continued tech support for lab and other needs

EPA Region 9's Draft Lead Action Plan

June 21, 2018: 10am

Agenda:

1. Background: Why focus on lead?
 - a. Common sources of lead
 - b. Disparity in Exposure Outcomes
 - c. Administrator's War on Lead
2. Region 9 Plan: Commitments by Division
 - a. Superfund
 - b. Air
 - c. Land
 - d. Enforcement
 - e. Water
3. Other Actions/Opportunities

Briefing for Regional Administrator Mike Stoker, June 21, 2018 EPA Region 9's Draft Lead Action Plan

BACKGROUND - WHY FOCUS ON LEAD IN REGION 9?

There is no known safe level of lead in the blood. Even small amounts may cause learning and behavior problems in children. Lead exposure is also associated with other harmful effects in both children and adults, including neurological, cardiovascular, kidney, developmental, and reproductive outcomes. In 2012, the Centers for Disease Control lowered the reference value for blood lead level (BLL) to 5 ug/dL. CDC is currently considering whether to update the reference value from 5 to 3.5 µg/dL.

Common sources of lead include lead-based paint (pre-1978); lead-contaminated soil; lead-contaminated dust from paint or soil; lead in drinking water pipes; take-home exposure in dust brought home on clothing, equipment, or vehicles, and lead in certain imported products.

Childhood lead poisoning has commonly been viewed as a challenge for the Northeast and Midwest. CDC-funded research conducted by Tracking California (part of the Public Health Institute) suggests that *lead poisoning impacts children in all regions of the United States*, and finds that some states are reporting a higher percentage of the estimated universe of lead-poisoned children. Tracking California researchers estimated based on states' reporting to CDC that the Northeast and Midwest regions identified the highest number of lead-exposed children. The South had the highest number of children with lead exposure, yet identified only 25% of them. The West had the fewest number of lead-exposed children, but performed the worst at identification, *with only 22% of lead-exposed children identified*. Modeled estimates indicate that California identifies roughly four in ten lead-poisoned children while Nevada and Arizona identify less than 1% and about 1% of lead-poisoned children, respectively. Hawaii does not report data to the CDC so no estimate is available.

Lead exposure is not equal for all children—available data show disparities in exposure as a function of race/ethnicity, income, and geographic location. This exposure risk is disproportionately higher for racial/ethnic minorities, households living in poverty, and for children living in pre-1978 homes that do not receive government rental support. (See attachment, EJ and Lead.)

- Of the 113 National Priority List sites in R9, 36 sites tested positive for lead in soil and *17 have remedies that address lead as a contaminant of concern*.
- Of the hundreds of thousands of contractors who renovate and paint homes that might have lead-based paint and thus subject to the Lead Renovation, Repair and Paint rule, *approximately 70 thousand are based in Region 9*.
- OCSPP relies on a formula to determine a "lead burden score" based on the number of pre-1978 housing units, children under 5, percent of families below poverty with children under 5, and the number of low-income housing units with lead based paint. Only two states have scores greater than California's. Arizona's high score is also in the top 20 lead burden scores.

ABOUT THE R9 DRAFT LEAD ACTION PLAN

In support of the Administrator's "War on Lead", each region was asked to develop and publicize an action plan to implement the interagency Federal Strategy to Reduce Childhood Lead Exposures and Associated Health Effects. The current Strategy addresses lead comprehensively through multiple federal authorities and was developed by EPA's Office of Children's Health Protection, Health and Human Services and other Senior

Steering Committee members of the President's Task Force on Environmental Health Risks and Safety Risks to Children. [REDACTED] Ex. (b)(5): Internal Deliberative

US EPA Region 9's
Action Plan to Reduce Community Lead Exposure
[includes edits from DTSC]

Draft June 12, 2018

Lead exposure remains a significant public health concern for children because lead hazards in the environment persist. According to the Centers for Disease Control and Prevention, there is no known safe level of lead in blood. Even low levels of lead in blood have been shown to affect IQ, ability to pay attention, and academic achievement. And effects of lead exposure cannot be corrected. Lead exposure and its consequences disproportionately affect minority and low-income families and communities. Some factors that can contribute to this disproportionate burden include living in older housing with lead-based paint and other lead hazards, income level, and proximity to legacy lead sources such as soil near roadways and former industrial sites.

Safe Drinking Water

1. We will continue to conduct lead and copper rule training for states and water systems. As part of our updated Small System Action Plan, we will work with our states to ensure water system compliance with all drinking water standards, including compliance with lead and copper rule requirements.
2. We will sample drinking water at 133 tribal school facilities, with the support of the R9 laboratory and funds from the R9 Children's Health Program. If sampling identifies elevated lead levels (>15 ppb), we will work with the school/tribe to reduce lead levels and minimize exposure.
3. We will work with Arizona and California on a plan to address state implementation of the Lead and Copper Rule, which included file reviews of 34 water systems with repeat exceedances of the lead action level.

Clean Air

1. EPA will propose action on Arizona's air quality plan to meet the National Ambient Air Quality lead standard under the Clean Air Act. A consent decree between EPA and ASARCO (Hayden, Ariz.) requires controls by December 2018.
2. We will review lead monitoring data from five airports in Region 9. We use these data to compare against our health-based standard, to determine whether lead emissions from aircraft are likely to affect public health.

Lead-Based Paint in Homes and Residences

1. Training and Outreach - We will accredit 50 training providers who provide training on Lead Safe Work Practices to contractors and other professionals. We will audit 15-20 training providers to ensure the courses are taught according to EPA requirements and certification exams are properly administered.
2. We will conduct 8 free Lead-Based Training workshops including in Spanish, for low income individuals. If funding is made available, we will offer workshops in Sacramento, Calif., and in Phoenix and Tucson, Ariz.
3. We will reach more 100 organizations with outreach material and technical assistance to state, local and private health services organizations to develop local and tribal capacity to train

residents on lead hazards, conduct blood lead screenings, and provide treatment information for lead-poisoned children.

4. Technical Assistance and Grants to States - We will award \$500,000 in annual grants to California and Hawaii to support lead-based paint abatement programs.
5. We will reach young families with basic lead poisoning prevention information including in English and Spanish through mailings to the 732 public libraries in California, 87 public libraries in Nevada, 141 public libraries in Arizona and 50 public libraries in Hawaii.

Enforcement of the Lead Renovation, Repair and Painting Rule (RRP Rule)

1. We will conduct 70 inspections under the Lead RRP Rules and take enforcement actions to address noncompliance.
2. R9's enforcement programs, including our lead-based paint program, will continue to participate in CalEPA's Environmental Justice (EJ) Enforcement Task Force to focus the compliance and enforcement authorities (of state and local agencies and EPA) in communities with EJ concerns. We will focus on the Imperial Valley, Stockton and other locations selected by CalEPA.

Lead in Soil

1. Eureka Smelter (Nev.) – EPA plans to complete the residential soil cleanup of approximately 35 residential properties affected by the Eureka Smelter, where sampling data show some of the highest levels of lead concentrations in soils found in R9.
2. EPA will work with the California Department of Toxic Substances Control (DTSC) to evaluate lead-acid battery recycling facilities in California. DTSC's program for addressing contamination from lead-acid battery recycling facilities is based on California state law and will focus on 39 former lead smelter sites identified from a comprehensive review of site investigation and cleanup records maintained by EPA and DTSC. To support development of criteria for prioritization, DTSC and EPA Region 9 are conducting a pilot study in West Oakland to understand the distribution of lead and other heavy metals in soil. EPA and DTSC will review the results from the soil study and will coordinate on next steps. Community engagement is ongoing.
3. Cleanup of Exide (Vernon, Calif.) - - R9 will continue to coordinate with DTSC regarding the DTSC-led former Exide facility closure and corrective action. For the cleanup of sensitive land use properties in communities surrounding the former facility (Preliminary Investigation Area), EPA will provide technical support as needed.

Brownfields

1. R9 will offer technical assistance through the Targeted Brownfields Assessment program, and will prioritize requests focused on lead contamination, where EPA can test soil and buildings for the presence of lead and provide recommendations for cleanup.
2. EPA will administer Brownfields competitive grants to support communities in addressing soil contaminants (including lead) community outreach, soil sampling and cleanup/removal of contaminated soil. Examples include
 - o The City of Richmond, Calif. received a \$400,000 Brownfields Assessment grant focused primarily on determining the presence of lead in abandoned and foreclosed homes. The

- City will work with the nonprofit Richmond Community Foundation to abate lead and other contaminants, renovate the homes and make them available for first-time homebuyers.
- The San Francisco Recreation and Parks Department received a \$76,000 EPA Brownfields Cleanup grant to remove lead from the Shipwrights Cottage and environs, part of a larger cleanup effort in what will become a public park and open space.
3. EPA will administer grants awarded under the Brownfields Environmental Workforce Development and Job Training program to train and certify adults in environmental management, including lead abatement, preparing them for jobs in soil cleanup. EPA will award the Los Angeles Conservation Corps and Hunters Point Family \$200,000 each to conduct environmental training for unemployed and underemployed adults. By 2020, 108 students will be trained and state-certified in lead abatement.

Children's Health Program

1. We will reach 700 parents, school and childcare staff, community health workers and health professionals through training and outreach activities focused on protecting children from lead and other environmental hazards.
2. We will work with school districts in Northern California, Southern Nevada and Arizona to address environmental health challenges encountered during school renovations including lead-based paint and lead in drinking water hazards. With State and local partners, EPA will conduct 3 workshops in Ariz. in FY18 and depending on resources, may do more in FY19. Workshops will focus on disseminating best practices, compliance assistance, and developing strong peer-to-peer networks to address environmental health issues in schools.

ENVIRONMENTAL JUSTICE AND LEAD (Pb)

Discussion Paper for the Environmental Justice and Community Revitalization Council

BUILD ON PAST WORK

EPA has a long history of integrating environmental justice (EJ) into our work. We have demonstrated meaningful and measurable environmental and public health outcomes in minority, low-income, tribal and indigenous communities (areas of EJ concern). The following examples, as well as many others, provide lessons for future work.

- **Boston:** Multiple joint targeting efforts reduced the number of new childhood lead poisoning cases from 1,123 cases in 2001 to 163 cases in 2010.
- **Omaha Lead Superfund Site:** The percentage of children with elevated blood lead levels in the 27-square mile area (over 175,000 persons) around the site decreased from 25% in 1999 to 0.3% in 2017.
- **Region 9:** 38 of the 44 small public water systems that exceeded the lead action level in August 2016 were brought into compliance by the end of FY2017.

CONTINUE THIS WORK THROUGH REGIONAL LEAD ACTION PLANS

All EPA Regions will implement the National Lead Strategy through Regional Lead Action Plans. They should integrate environmental justice into this work in a manner that helps EPA work with partners to achieve shared goals of advancing EJ, improving public health, and revitalizing communities. Many Regions are already working on this integration, as well as on the processes and partnerships needed to support the work. Regional experience, networks and approaches can inform the National Lead Coordinator in developing a national strategic framework that integrates EJ and community revitalization. Key themes identified by Regions include:

1. **Focus on Tangible and Measurable Results:** We should focus our efforts on places where we can effectively contribute to meaningful and measurable environmental and public health outcomes in more efficient and robust ways through all appropriate media programs. Regions should be encouraged to consider this important factor when selecting the Administrator's initial ten areas for focused action on lead as well as for other initiatives.
2. **Targeting for High Risk Populations:** Scientific consensus exists that race, poverty and age of housing are the most critical indicators consistently highly predictive for lead exposure nationally. Consistent with environmental justice screening approaches, we will also consider cumulative impacts from multiple media in targeting for lead risk. Work with federal agencies, states and local government is essential for obtaining data needed for identifying hotspots for action and developing lead targeting tools useful for EPA programs and external partners. Over time, we should integrate existing targeting and modeling efforts (e.g., Region 5, OCSPP, ORD) to develop a OneEPA lead targeting tool, building on existing platforms such as EJSCREEN. Targeting takes place on a program-specific basis, within Regions and on a community scale.
3. **States and Cooperative Federalism:** Addressing lead exposure in a multi-media, multi-agency fashion is an ideal opportunity to practice a holistic approach to cooperative federalism that integrates public health and environmental programs across federal agencies, states, local governments, tribes and communities at both the vertical and horizontal levels. Our strategy will use states as a starting point, as they are critical to advancing our EJ mission and overall environmental governance. Initial engagement with states has surfaced working together to target areas of high risk with both federal and local data, joint planning and governance in development of EPA Regional lead action plans, and identification of areas for joint priority action as key issues. Every Region should engage in a proactive state engagement strategy that draws on a collective vision of best practices for engaging states and supports joint planning and shared governance of projects.
4. **Community-Driven Work:** Community-driven work is an incredibly robust and vital area that can be tied to our holistic approach to cooperative federalism. It enables proactive leadership from community groups, academia, philanthropies and other civil society groups. Every truly successful solution around lead has a strong community leadership element. EPA resources can include citizen science, EJ and other grants, technical assistance, and other resources – all taking lessons from lead successes such as Boston, MA, Omaha, NE, and Newburgh, NY. This work provides opportunities to promote innovative approaches to address lead through healthy homes, job training and creation, sustainable materials reuse and health care mechanisms. Attention should be given to a variety of contexts – including urban, rural and tribal.
5. **Communications and Engagement with Populations of Concern:** EPA will work to support the Federal Lead Strategy's outreach and communications goal through engagement with tribes and indigenous populations, key community-based projects, EJ organizations and stakeholder groups. One example is groups addressing retail outlets with products of high lead content that disproportionately impact minority and low-income populations.

EPA Region 9's Draft Lead Action Plan

June 21, 2018: 10am

Agenda:

RCRA and PCB Hazardous Waste Permitting

Hazardous waste permits are an essential part of the cradle to grave management of hazardous wastes allowing businesses to operate safely, create jobs and drive economic development. Permits ensure safe management of hazardous wastes, prevent dangerous releases and avoid costly Superfund cleanups. States and EPA cooperate to implement RCRA, and permits are issued by authorized states or the Region 9 office.

Land Division is responsible for three types of hazardous waste permitting: Hazardous waste and Coal Combustion Residuals (CCR) under RCRA, and PCBs under TSCA. EPA is the permitting agency for RCRA facilities on tribal land and for all PCB permits. The CCR program is a new permitting program under RCRA, and the requirements are under development.

Metrics

STATE	State Issued Permits				EPA Issued Permits		CCR Facilities

RCRA and PCB Hazardous Waste Permitting

Hazardous waste permits are an essential part of the cradle to grave management of hazardous wastes allowing businesses to operate safely, create jobs and drive economic development. Permits ensure safe management of hazardous wastes, prevent dangerous releases and avoid costly Superfund cleanups. States and EPA cooperate to implement RCRA, and permits are issued by authorized states or the Region 9 office.

Land Division is responsible for three types of hazardous waste permitting: Hazardous waste and Coal Combustion Residuals (CCR) under RCRA, and PCBs under TSCA. EPA is the permitting agency for RCRA facilities on tribal land and for all PCB permits. The CCR program is a new permitting program under RCRA, and the requirements are under development.

AGENDA

DRAFT FEDERAL PARTNERS TOUR – The Rio Reimagined

June 6, 2018

Event: 6:15am – 6:00pm

Wednesday – June 6, 2018

6:15am – 6:30am	Group Gathering - Federal Agencies Federal Agencies Arrive at SRP Flight Services Sky Harbor Airport - 2601 E. Air Lane, Phoenix, AZ	15 min.
6:30am – 6:45am	Introductions and Overview SRP Flight Briefing and Orientation	15 min.
7:00am – 8:00am	Helicopter Tour of the Project Area Federal Agencies	60 min.
8:00am – 8:30am	Travel back to ASU Fulton Center ASU Tempe - Fulton Center, 300 E University Drive, Tempe, AZ Lincoln Conference Center – 6th Floor	30 min.
8:30am – 9:00am	Continental Breakfast Breakfast Networking	30 min.
9:00am – 9:30am	Urban Waters Federal Partnership Mission Alignment of Goals and Objectives Agency Partners Non-Profit Partners	30 min.
9:30am – 10:15pm	Examples of UWFP in River Revitalization Agency Program Engagement AZ and Other River Pilot Projects	45 min.
10:15am – 11:15am	Community Projects and Planning Key River Restoration Projects River Corridor Initiatives	60 min.
11:15am – 12:15pm	Key Issues and Discussion USACE, ADEQ, Maricopa County, FCDMC, AZ Game + Fish, BLM	60 min.
12:15pm – 1:45pm	Tempe Project Tour Tempe Town Lake Tour with Brown Bag Lunch Provided	90 min.
1:45pm – 2:45pm	SRP-MIC Project Tour Va Shly' Ay Akimel	60 min.
2:45pm – 3:45pm	Mesa Projects Tour Granite Reef Dam Usery Mountain Park, Riverview, Recreation Connections	60 min.
4:00pm - 6:00pm	Casual Happy Hour Mixer Four Peaks Brewing Company - 1340 E 8th St #104, Tempe, AZ 85281	120 min.

AGENDA

June 7, 2018

Event: 6:00am – 1:45pm

Thursday – June 7, 2018

6:15am – 6:30am	Group Gathering Agencies Arrive at ASU Tempe Fulton Center, 300 E University Drive, Tempe, AZ Lincoln Conference Center – 6th Floor	15 min.
6:30am – 6:45am	Depart for Site Tours ASU Shuttle Bus	15 min.
6:45am – 7:45am	Buckeye Projects Tour Water Treatment Plant Floodplain Prototypical Redevelopment - Hidden Lake	60 min.
7:45am – 8:45am	Avondale Goodyear Buckeye - Joint Projects Tour El Rio Watercourse Lower Gila River Restoration Project	60 min.
8:45am – 9:45am	Gila River Indian Community Projects Tour Pee Posh Wetlands Gila River Wetlands	60 min.
9:45am – 11:15am	Phoenix Project Tour Rio Salado Oeste Rio Salado Phoenix Tres Rios Habitat Restoration Prototypical Brownfields	90 min.
11:45am – 1:15pm	Lunch + Closing Discussion Nina Mason Pulliam Rio Salado Audubon Center 3131 S Central Ave, Phoenix, AZ 85040	90 min.
1:15pm – 1:45pm	Shuttle back to ASU Tempe – Fulton Center	30 min.

MISSION ALIGNMENTS WITH THE URBAN WATERS FEDERAL PARTNERSHIP

US Department of Agriculture | USDA

The missions of USDA Forest Service and the Partnership are strategically aligned based on the following goals:

- Promote all-lands conservation
- Connect the US along the rural-urban gradient
- Conduct ecological and social science research on urban ecosystems
- Engage the public in urban natural resources stewardship – public education, job training, volunteer action
- Support green jobs
- Create public-private partnerships
- Implement watershed forestry projects
- Reconnect people to their waterways through science, management and technology transfer
- Work to revitalize and stabilize communities in economically distressed areas

Housing and Urban Development | HUD

The missions of HUD and the Partnership are strategically aligned based on the following goals:

- Leverage \$14M in sustainability grants via HUD's Sustainable Communities Planning and Challenge grant programs
- Integrate housing, land use, economic development, transportation, and infrastructure investments in ways that foster healthy communities and residents
- Partner to revitalize distressed lands along urban waterways
- Improve access and education for communities along waterways
- Connect low to moderate-income community stakeholders to projects that affect them

Department of Interior | DOI

The goals of the America's Great Outdoors initiative align with those of the Urban Waters Partnership in the following ways:

- Reconnect Americans, especially children, to US rivers and waterways, landscapes of national significance, ranches, farms and forests, great parks and coasts and beaches by:
 - promoting community-based recreation and conservation, including local parks, greenways, beaches and waterways
 - advancing job and volunteer opportunities related to conservation and outdoor recreation
 - supporting existing programs and projects that educate and engage Americans in our history, culture, and natural bounty

- Build upon State, local, private and tribal priorities for the conservation of land, water, wildlife, historic and cultural resources, creating corridors and connectivity across these outdoor spaces and determine how the Federal Government can best advance those priorities with public-private partnerships and locally supported strategies.
- Use science-based management practices to restore and protect our lands and waters for future generations.

Environmental Protection Agency | EPA

The missions of EPA and the Partnership are strategically aligned based on the following goals:

- Use all tools at our disposal to protect US waters
- Work at community level to provide safe, healthy and accessible outdoor spaces
- Focus on economically distressed communities, and work to create jobs
- Create new and innovative partnerships
- Recognize and build on local efforts and leadership, by engaging and serving community partners
- Engage communities in activities that increase their stewardship of local urban waterways

Centers for Disease Control and Prevention | CDC

The missions of CDC and the Partnership are strategically aligned based on the following goals:

- Healthy and accessible urban waters
- Protecting public and environmental health
- Reconnecting people in underserved communities with their waterways
- Engaging and serving community partners

Corporation for National & Community Service | NCS

The missions of CNCS and the Partnership are strategically aligned based on the following goals:

- Engaging and serving economically distressed communities
- Strengthening communities and developing leaders
- Recognizing and building on local efforts and leadership by engaging and serving community partners

National Institute of Environmental Health Sciences | NIEHS

In August 2012, NIEHS released its Strategic Plan for 2012-2017 after over a year of input from the Environmental Health Sciences community and other stakeholders. The NIEHS Strategic Plan reflects identified themes and goals from the Strategic Planning process to help NIEHS with efforts to support and move forward our mission and vision. Current goals from the NIEHS 2012-2017 Strategic Plan that align with the mission and strategies of the Urban Waters Federal Partnership include:

- Evaluating the economic impact of policies, practices, and behaviors that reduce exposure to environmental toxicants, through prevention of disease and disabilities, and invest in research programs to test how prevention improves public health and minimizes economic burden.
- Promoting bidirectional communication and collaboration between researchers and stakeholders, e.g., policy-makers, clinicians, intervention and prevention practitioners, and the public, in order to advance research translation in the environmental health sciences.
- Enhancing the teaching of Environmental Health Sciences at all levels of education and training — kindergarten through professional — to increase scientific literacy and generate awareness of the health consequences of environmental exposures.

National Oceanic and Atmospheric Administration | NOAA

The missions of NOAA and the Partnership are strategically aligned based on the following goals:

- Coastal management and restoration
- Improving and sustaining economic vitality by revitalizing urban waters
- Achieving healthy oceans and coasts by protecting the quality of rivers and watersheds

United States Army Corps of Engineers | USACE

The missions of USACE and the Partnership are strategically aligned based on the following goals:

- Establishing strong partnerships with community-based organizations and local governments
- Leveraging existing community assets as well as federal resources to serve local needs
- Protecting urban water resources that are valuable to the health and safety of communities

Department of Energy | DOE

The missions of EERE and the Partnership are strategically aligned based on the following goals:

- Develop approaches that can accelerate economic growth and job creation while improving the environment by both reducing greenhouse gas emissions and improving air and water quality.
- Ensure diversity and choice in the way energy services are produced
- Provide American businesses and households with low-cost energy services by creating low cost renewable supplies and energy efficient products and systems
- Insulate the U.S. economy from the price and supply uncertainties associated with petroleum

Shared priorities also include:

- Interagency coordination and issue resolution

Department of Transportation | DOT

The missions of DOT and the Partnership are strategically aligned based on the following goals:

- Integrate environmental sustainability into all work being done, including reducing water quality impacts of transportation infrastructure

Shared priorities also include:

- Interagency coordination and issue resolution
- Environmentally sensitive decision making Grant funding for safer, more sustainable infrastructure

Economic Development Administration | EDA

The missions of EDA and the Partnership are strategically aligned based on the following goals:

- Foster healthy and accessible urban waterways to help catalyze local economic revitalization
- Collaborate regionally to leverage resources and work together to overcome economic challenges
- Support development of an urban waters-friendly national policy
- Make urban waters a funding priority
- Cultivate long-term jobs

Department of Education | DOE

The Department of Education has many initiatives that dovetail with the mission and principles of the Partnership to increase environmental protection, economic revitalization and connecting people to their urban waters. One initiative, U.S. Department of Education Green Ribbon Schools (ED-GRS), is an example of a perfect fit with the UWFP principals. Through this initiative, the Department of Education communicates best practices and resources in the areas of facilities, health and environment.

FEMA

Flood Emergency Management Administration | FEMA

FEMA approves projects through its supplemental Public Assistance grant that align with the work of the Urban Waters Federal Partnership in several ways. Providing ways for people to access the water and enjoy recreational activities is an essential part of restoring urban waterways and revitalizing the surrounding communities. The Public Assistance program works with state and local officials to fund recovery measures and the rebuilding of government and certain private nonprofit organizations' buildings, as well as roads, bridges and water and sewer plants.

Community Development Financial Institutions | CDFIs

Community Development Financial Institutions (CDFIs) are private financial institutions that are dedicated to delivering responsible, affordable lending to help low-income, low-wealth, and other disadvantaged people and communities. Since its inception in 1994, the CDFI Fund has built a nation-wide network of CDFIs committed to ensuring that underserved communities have access to quality, affordable, and credible financial services. The CDFI Fund supports the mission-driven financial institutions working on a local level that know their communities best. By financing community businesses—including small businesses, microenterprises, nonprofit organizations, commercial real estate, and affordable housing—CDFIs spark job growth and retention in hard-to serve markets across the nation.

AGENDA

DRAFT FEDERAL PARTNERS TOUR – The Rio Reimagined

June 6, 2018

Event: 6:15am – 6:00pm

Wednesday – June 6, 2018

6:15am – 6:30am	Group Gathering - Federal Agencies Federal Agencies Arrive at SRP Flight Services Sky Harbor Airport - 2601 E. Air Lane, Phoenix, AZ	15 min.
6:30am – 6:45am	Introductions and Overview SRP Flight Briefing and Orientation	15 min.
7:00am – 8:00am	Helicopter Tour of the Project Area Federal Agencies	60 min.
8:00am – 8:30am	Travel back to ASU Fulton Center ASU Tempe - Fulton Center, 300 E University Drive, Tempe, AZ Lincoln Conference Center – 6th Floor	30 min.
8:30am – 9:00am	Continental Breakfast Breakfast Networking	30 min.
9:00am – 9:30am	Urban Waters Federal Partnership Mission Alignment of Goals and Objectives Agency Partners Non-Profit Partners	30 min.
9:30am – 10:15pm	Examples of UWFP in River Revitalization Agency Program Engagement AZ and Other River Pilot Projects	45 min.
10:15am – 11:15am	Community Projects and Planning Key River Restoration Projects River Corridor Initiatives	60 min.
11:15am – 12:15pm	Key Issues and Discussion USACE, ADEQ, Maricopa County, FCDMC, AZ Game + Fish, BLM	60 min.
12:15pm – 1:45pm	Tempe Project Tour Tempe Town Lake Tour with Brown Bag Lunch Provided	90 min.
1:45pm – 2:45pm	SRP-MIC Project Tour Va Shly' Ay Akimel	60 min.
2:45pm – 3:45pm	Mesa Projects Tour Granite Reef Dam Usery Mountain Park, Riverview, Recreation Connections	60 min.

MISSION ALIGNMENTS WITH THE URBAN WATERS FEDERAL PARTNERSHIP

US Department of Agriculture | USDA

The missions of USDA Forest Service and the Partnership are strategically aligned based on the following goals:

- Promote all-lands conservation
- Connect the US along the rural-urban gradient
- Conduct ecological and social science research on urban ecosystems
- Engage the public in urban natural resources stewardship – public education, job training, volunteer action
- Support green jobs
- Create public-private partnerships
- Implement watershed forestry projects
- Reconnect people to their waterways through science, management and technology transfer
- Work to revitalize and stabilize communities in economically distressed areas

Housing and Urban Development | HUD

The missions of HUD and the Partnership are strategically aligned based on the following goals:

- Leverage \$14M in sustainability grants via HUD's Sustainable Communities Planning and Challenge grant programs
- Integrate housing, land use, economic development, transportation, and infrastructure investments in ways that foster healthy communities and residents
- Partner to revitalize distressed lands along urban waterways
- Improve access and education for communities along waterways
- Connect low to moderate-income community stakeholders to projects that affect them

Department of Interior | DOI

The goals of the America's Great Outdoors initiative align with those of the Urban Waters Partnership in the following ways:

- Reconnect Americans, especially children, to US rivers and waterways, landscapes of national significance, ranches, farms and forests, great parks and coasts and beaches by:
 - promoting community-based recreation and conservation, including local parks, greenways, beaches and waterways
 - advancing job and volunteer opportunities related to conservation and outdoor recreation
 - supporting existing programs and projects that educate and engage Americans in our history, culture, and natural bounty

- Build upon State, local, private and tribal priorities for the conservation of land, water, wildlife, historic and cultural resources, creating corridors and connectivity across these outdoor spaces and determine how the Federal Government can best advance those priorities with public-private partnerships and locally supported strategies.
- Use science-based management practices to restore and protect our lands and waters for future generations.

Environmental Protection Agency | EPA

The missions of EPA and the Partnership are strategically aligned based on the following goals:

- Use all tools at our disposal to protect US waters
- Work at community level to provide safe, healthy and accessible outdoor spaces
- Focus on economically distressed communities, and work to create jobs
- Create new and innovative partnerships
- Recognize and build on local efforts and leadership, by engaging and serving community partners
- Engage communities in activities that increase their stewardship of local urban waterways

Centers for Disease Control and Prevention | CDC

The missions of CDC and the Partnership are strategically aligned based on the following goals:

- Healthy and accessible urban waters
- Protecting public and environmental health
- Reconnecting people in underserved communities with their waterways
- Engaging and serving community partners

Corporation for National & Community Service | NCS

The missions of CNCS and the Partnership are strategically aligned based on the following goals:

- Engaging and serving economically distressed communities
- Strengthening communities and developing leaders
- Recognizing and building on local efforts and leadership by engaging and serving community partners

National Institute of Environmental Health Sciences | NIEHS

In August 2012, NIEHS released its Strategic Plan for 2012-2017 after over a year of input from the Environmental Health Sciences community and other stakeholders. The NIEHS Strategic Plan reflects identified themes and goals from the Strategic Planning process to help NIEHS with efforts to support and move forward our mission and vision. Current goals from the NIEHS 2012-2017 Strategic Plan that align with the mission and strategies of the Urban Waters Federal Partnership include:

- Evaluating the economic impact of policies, practices, and behaviors that reduce exposure to environmental toxicants, through prevention of disease and disabilities, and invest in research programs to test how prevention improves public health and minimizes economic burden.
- Promoting bidirectional communication and collaboration between researchers and stakeholders, e.g., policy-makers, clinicians, intervention and prevention practitioners, and the public, in order to advance research translation in the environmental health sciences.
- Enhancing the teaching of Environmental Health Sciences at all levels of education and training — kindergarten through professional — to increase scientific literacy and generate awareness of the health consequences of environmental exposures.

National Oceanic and Atmospheric Administration | NOAA

The missions of NOAA and the Partnership are strategically aligned based on the following goals:

- Coastal management and restoration
- Improving and sustaining economic vitality by revitalizing urban waters
- Achieving healthy oceans and coasts by protecting the quality of rivers and watersheds

United States Army Corps of Engineers | USACE

The missions of USACE and the Partnership are strategically aligned based on the following goals:

- Establishing strong partnerships with community-based organizations and local governments
- Leveraging existing community assets as well as federal resources to serve local needs
- Protecting urban water resources that are valuable to the health and safety of communities

Department of Energy | DOE

The missions of EERE and the Partnership are strategically aligned based on the following goals:

- Develop approaches that can accelerate economic growth and job creation while improving the environment by both reducing greenhouse gas emissions and improving air and water quality.
- Ensure diversity and choice in the way energy services are produced
- Provide American businesses and households with low-cost energy services by creating low cost renewable supplies and energy efficient products and systems
- Insulate the U.S. economy from the price and supply uncertainties associated with petroleum

Shared priorities also include:

- Interagency coordination and issue resolution

Department of Transportation | DOT

The missions of DOT and the Partnership are strategically aligned based on the following goals:

- Integrate environmental sustainability into all work being done, including reducing water quality impacts of transportation infrastructure

Shared priorities also include:

- Interagency coordination and issue resolution
- Environmentally sensitive decision making Grant funding for safer, more sustainable infrastructure

Economic Development Administration | EDA

The missions of EDA and the Partnership are strategically aligned based on the following goals:

- Foster healthy and accessible urban waterways to help catalyze local economic revitalization
- Collaborate regionally to leverage resources and work together to overcome economic challenges
- Support development of an urban waters-friendly national policy
- Make urban waters a funding priority
- Cultivate long-term jobs

Department of Education | DOE

The Department of Education has many initiatives that dovetail with the mission and principles of the Partnership to increase environmental protection, economic revitalization and connecting people to their urban waters. One initiative, U.S. Department of Education Green Ribbon Schools (ED-GRS), is an example of a perfect fit with the UWFP principals. Through this initiative, the Department of Education communicates best practices and resources in the areas of facilities, health and environment.

FEMA

Flood Emergency Management Administration | FEMA

FEMA approves projects through its supplemental Public Assistance grant that align with the work of the Urban Waters Federal Partnership in several ways. Providing ways for people to access the water and enjoy recreational activities is an essential part of restoring urban waterways and revitalizing the surrounding communities. The Public Assistance program works with state and local officials to fund recovery measures and the rebuilding of government and certain private nonprofit organizations' buildings, as well as roads, bridges and water and sewer plants.

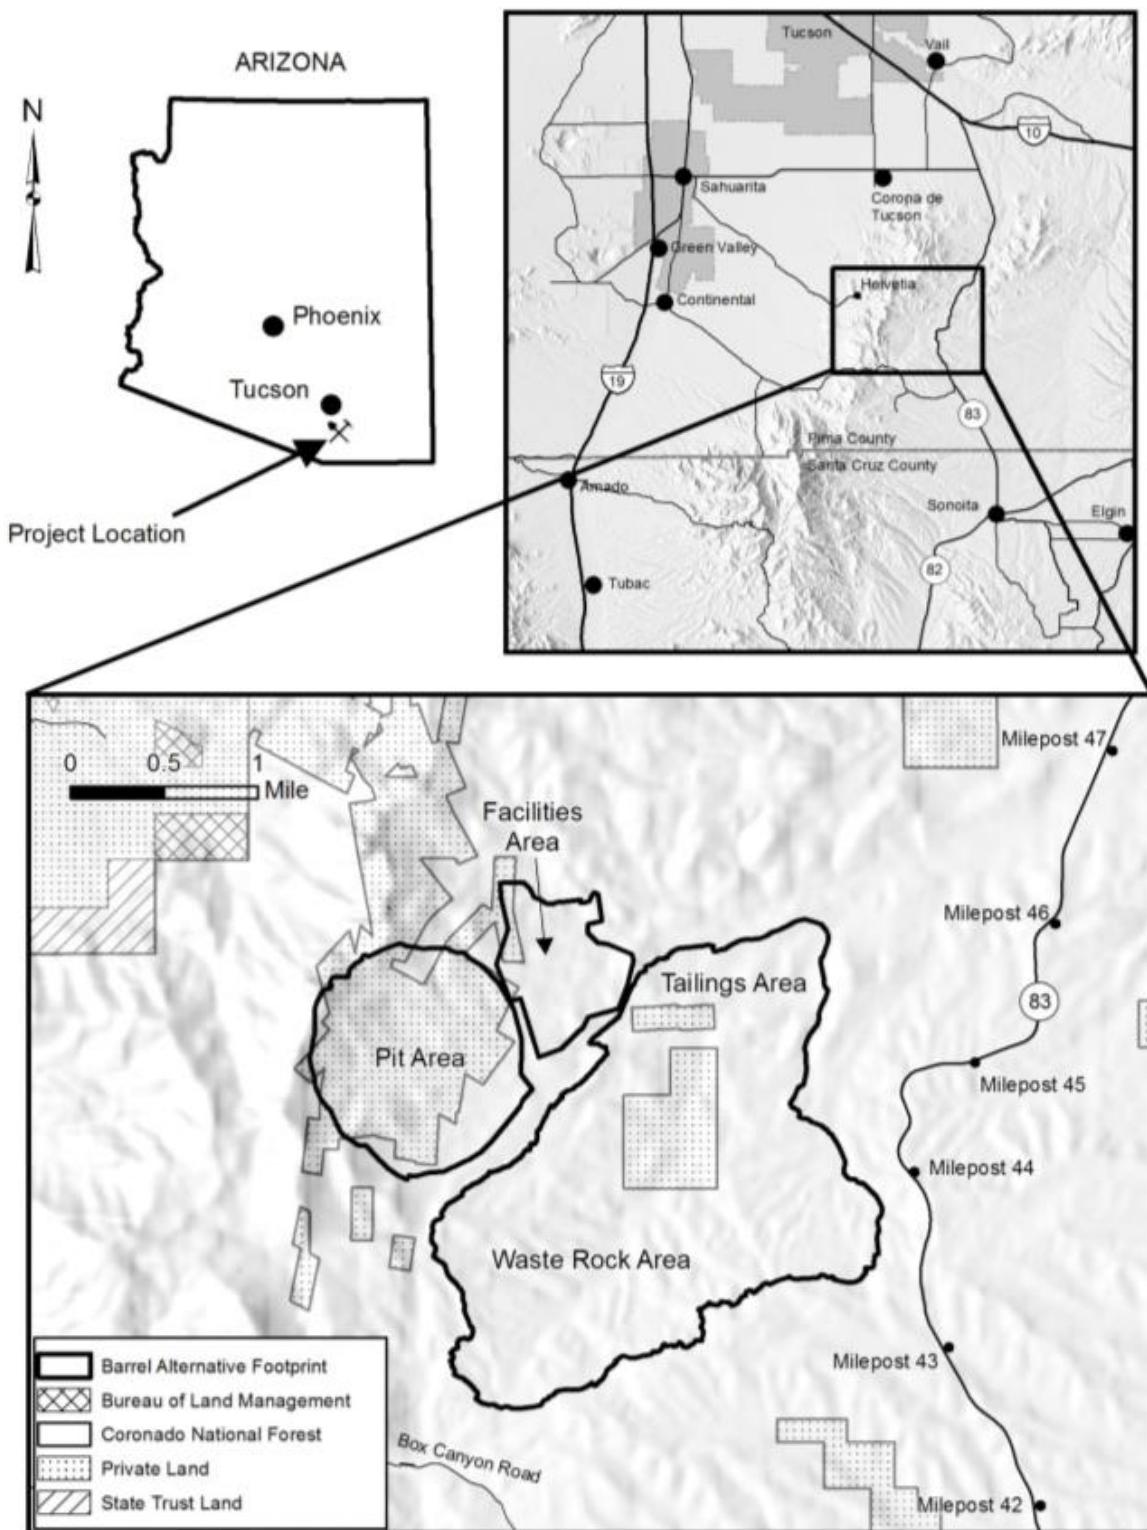

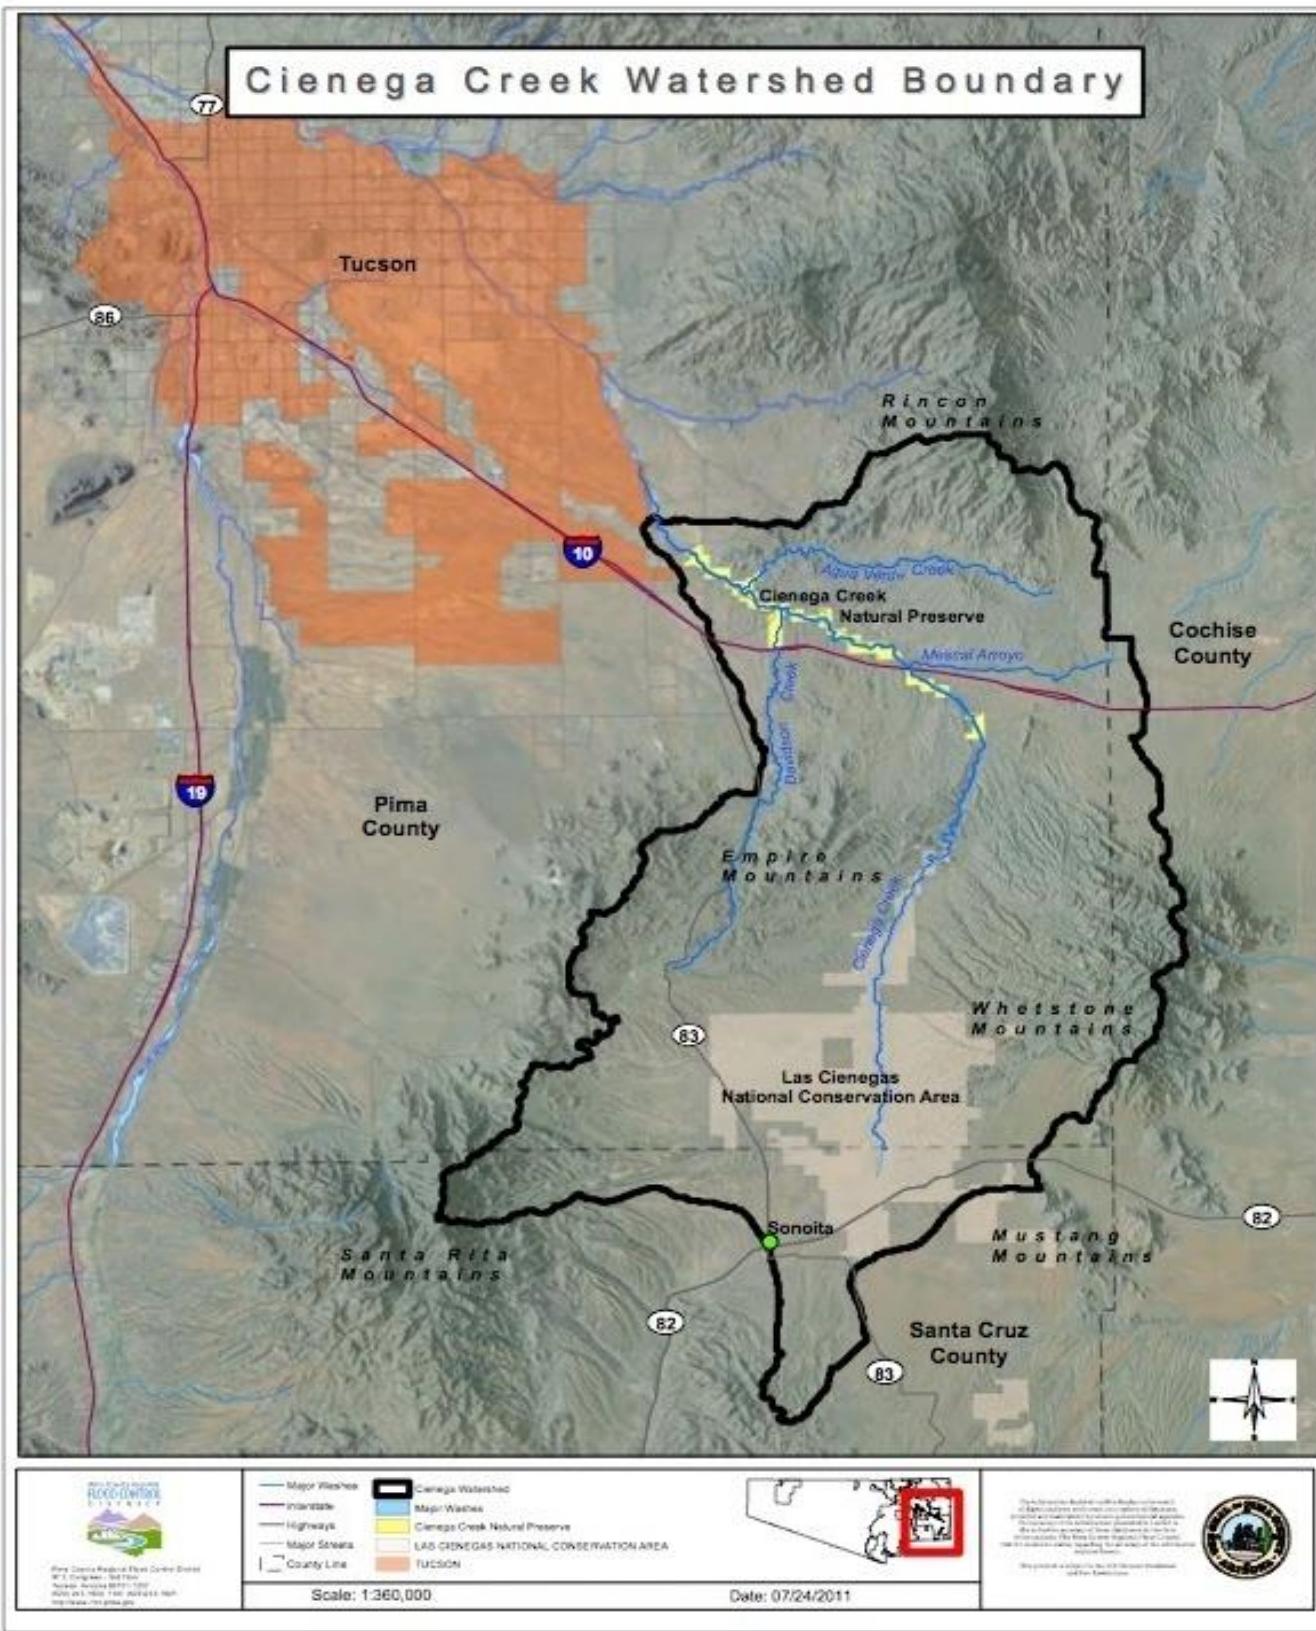

Community Development Financial Institutions | CDFIs

Community Development Financial Institutions (CDFIs) are private financial institutions that are dedicated to delivering responsible, affordable lending to help low-income, low-wealth, and other disadvantaged people and communities. Since its inception in 1994, the CDFI Fund has built a nation-wide network of CDFIs committed to ensuring that underserved communities have access to quality, affordable, and credible financial services. The CDFI Fund supports the mission-driven financial institutions working on a local level that know their communities best. By financing community businesses—including small businesses, microenterprises, nonprofit organizations, commercial real estate, and affordable housing—CDFIs spark job growth and retention in hard-to serve markets across the nation.

San Joaquin Valley Ozone State Implementation Plan (SIP)

Update for the Regional Administrator

July 11, 2018

Air Quality in San Joaquin Valley

Primary Air Pollutants of Concern

- Ozone (O_3)
- Fine particulate matter ($PM_{2.5}$)
- Coarse particulate matter (PM_{10})

Topography and weather
conducive to formation and
accumulation of pollution

Diverse combination of sources

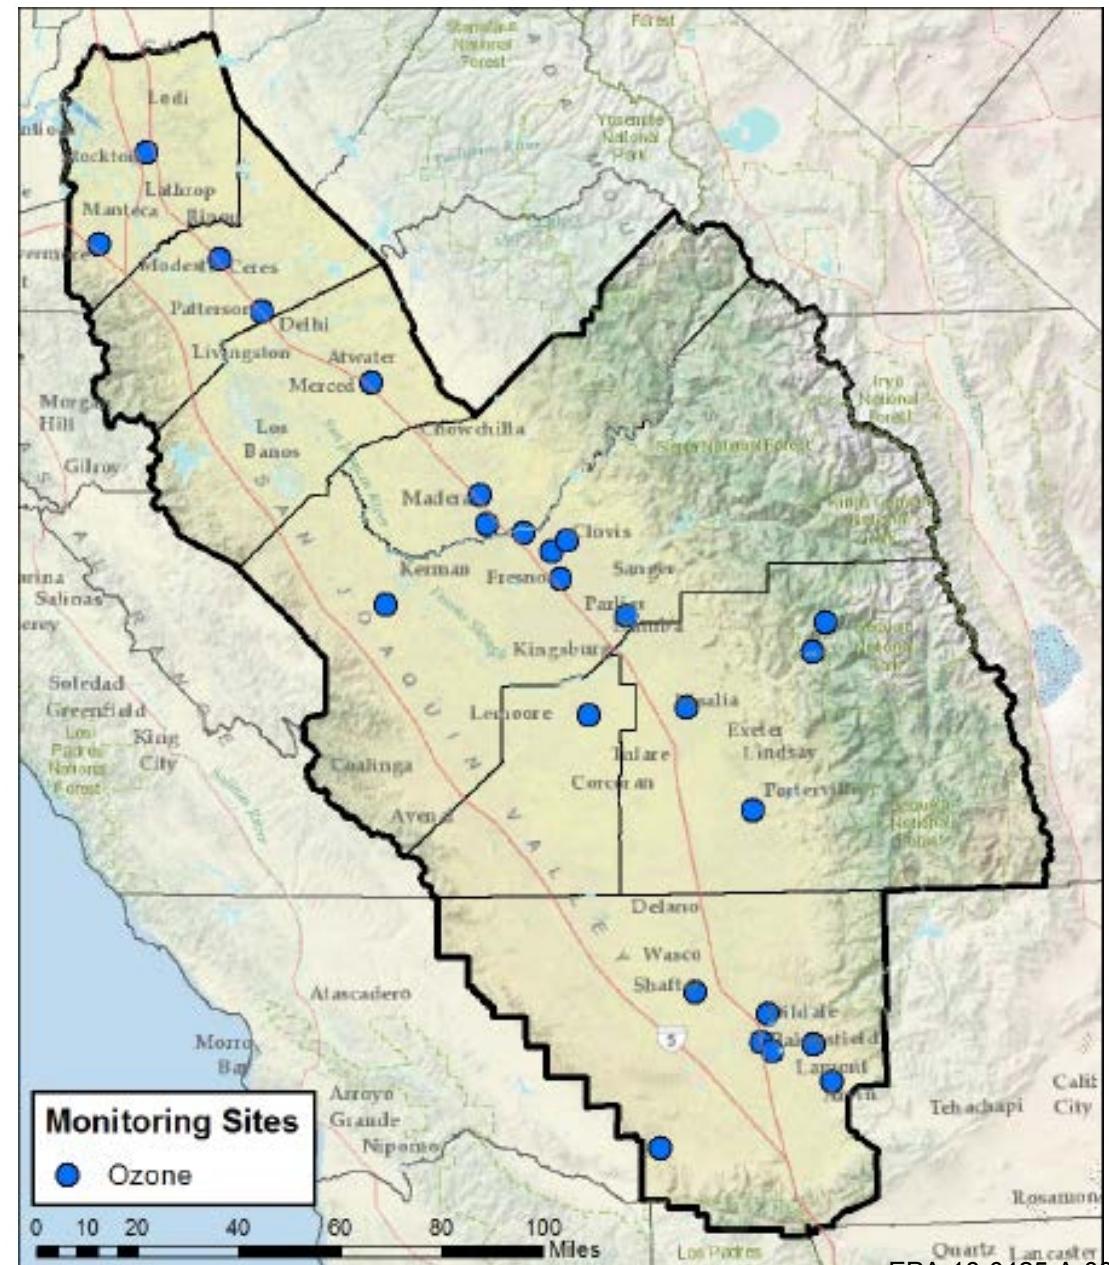

Ozone Nonattainment Area for
the 2008 Ozone NAAQS

SJV must show attainment by
2031

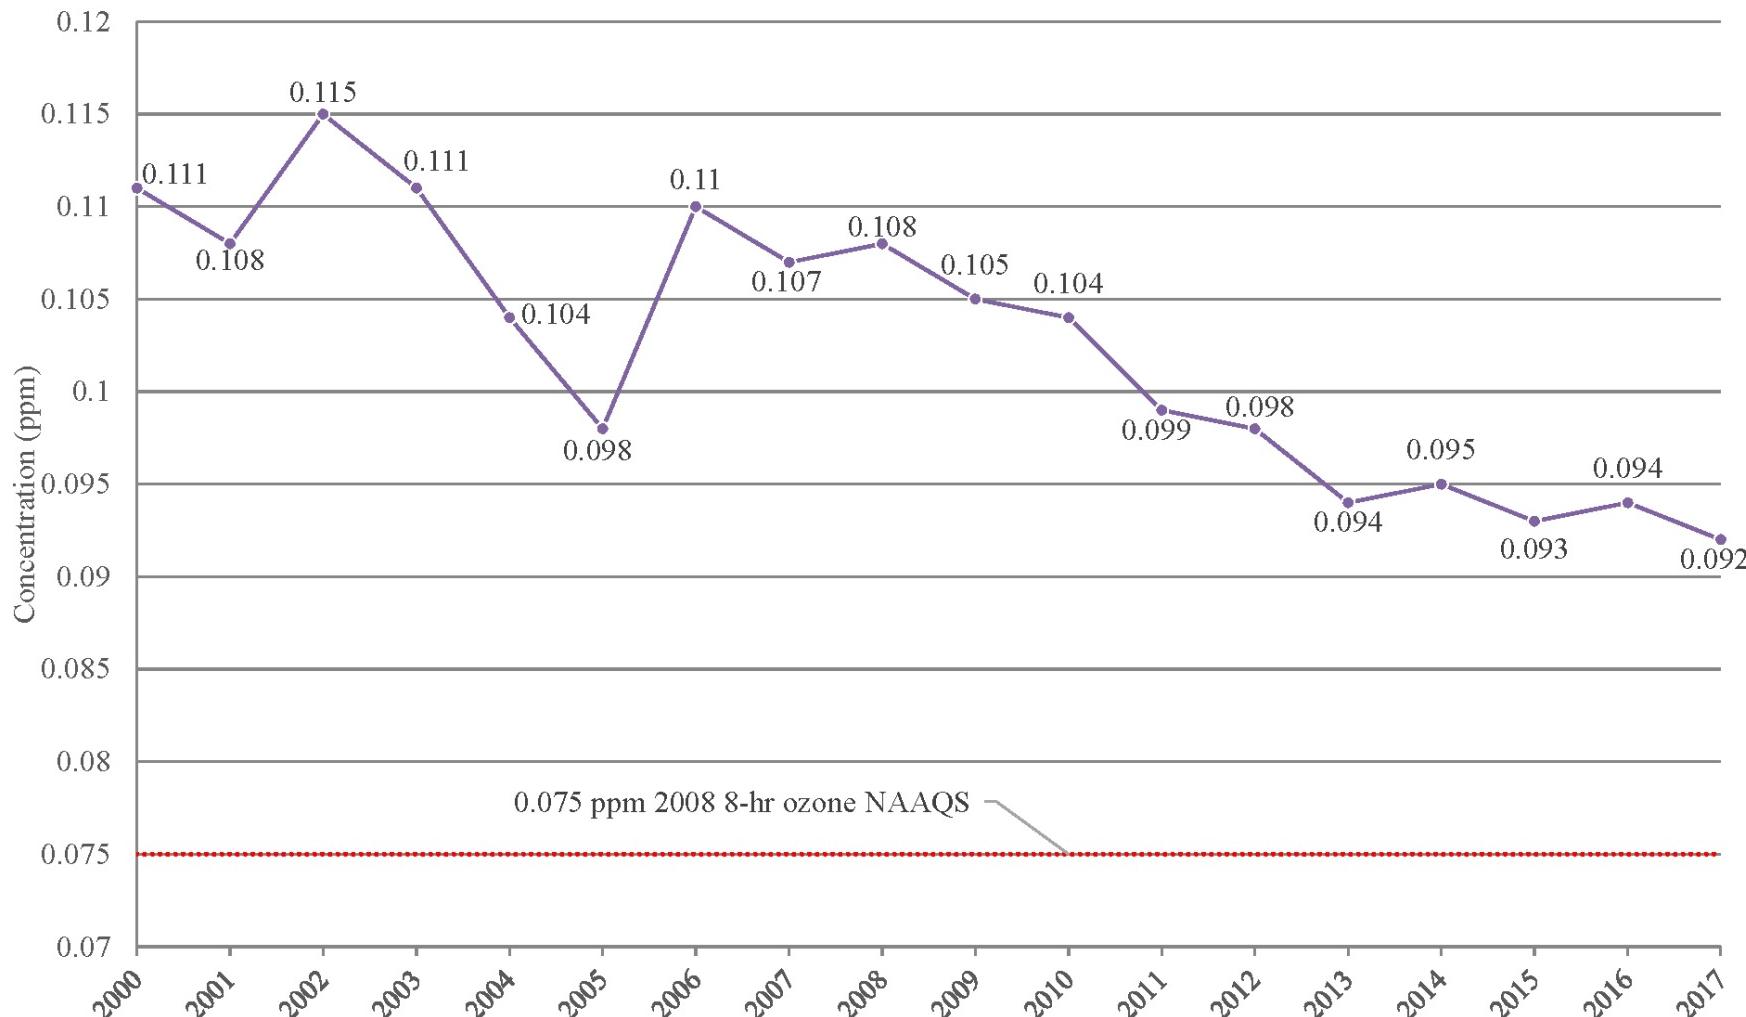

EPA-18-0425-A-000234

Ozone Monitors in the San Joaquin Valley

EPA-18-0425-A-000235
3

*SAN JOAQUIN VALLEY, CA 8-HOUR OZONE (O_3) NONATTAINMENT AREA
DESIGN VALUE CONCENTRATIONS, 2000-2017*

Source: US EPA's Office of Air Quality Planning and Standards and the Air Quality System (AQS) database (June 27, 2018).

The 2008 national ambient air quality standard (NAAQS) for 8-hour ozone is 0.075 parts per million (ppm). The design value is a calculation of each year's 4th-highest day's recorded values, averaged over a 3-year period at an air quality monitor. X-axis labels represent the last year of a monitor's 3 year time period. All invalid and exceptional event data (e.g., high winds and wildfires) that EPA has concurred on have been excluded from design value calculations.

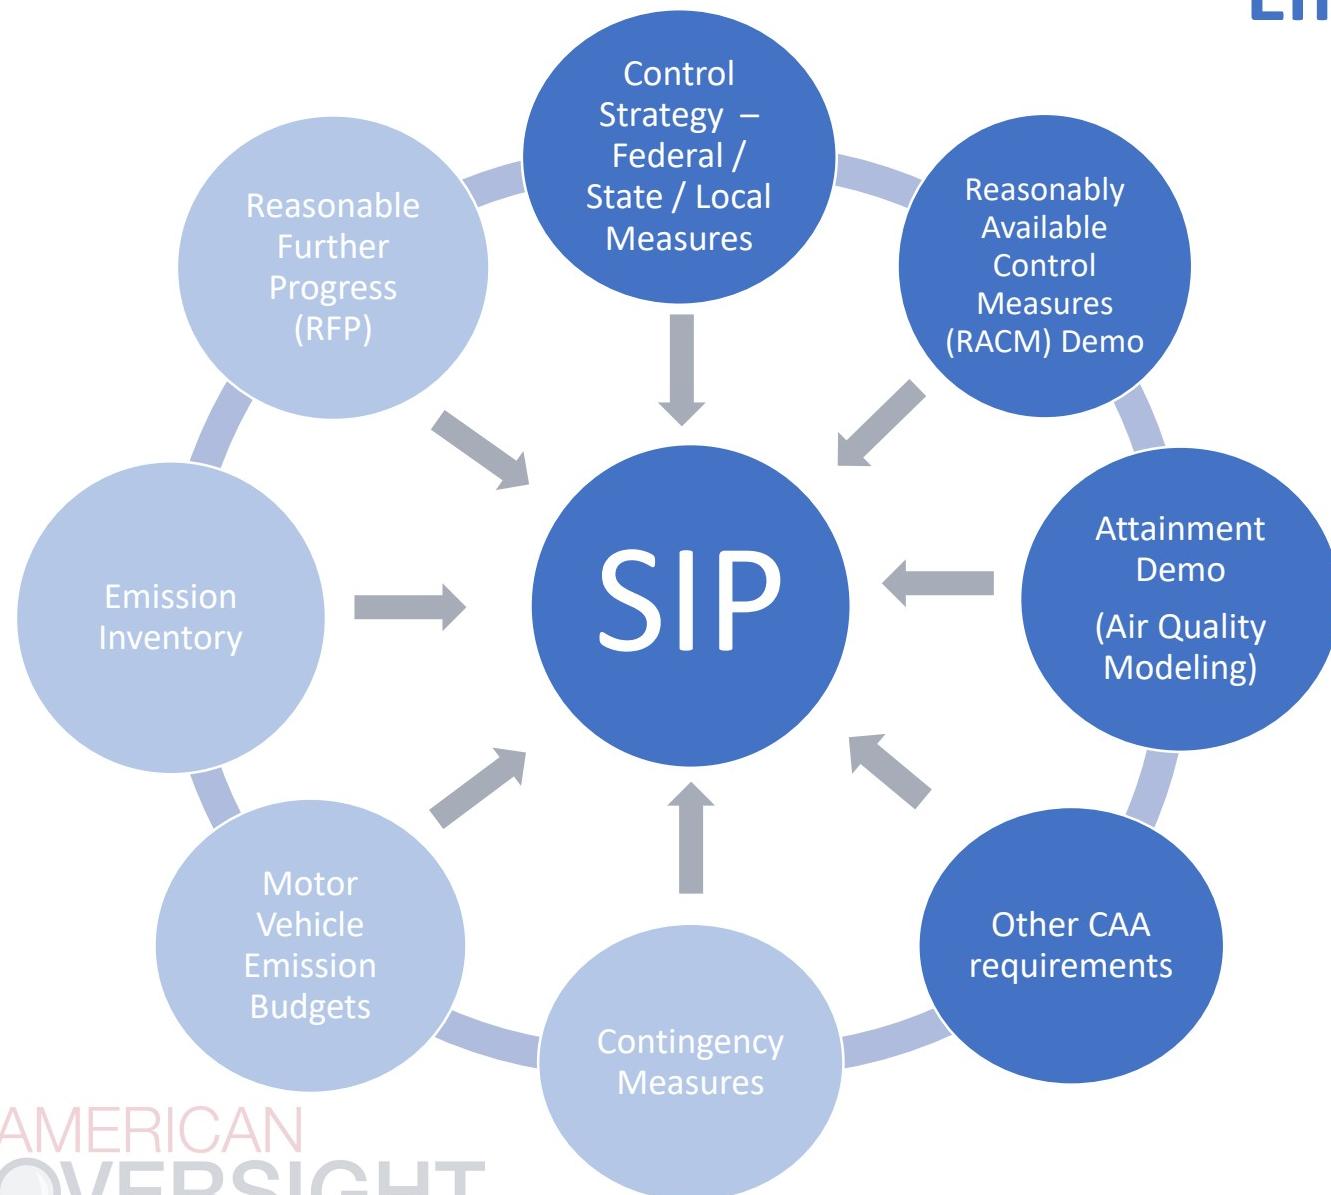

AIR18079 - 2017 annual air quality update - ozone.xlsx (July 9, 2018)

EPA-18-0425-A-000236

State Implementation Plan (SIP) Requirements

Emission Reductions are the Core Elements of the SIP

- Federal, State, and Local Measures to reduce emissions
- Mobile sources; NOx is the driver
- Demonstration that area is implementing all reasonably available control measures (RACM Demo)
- Air Quality Modeling to show the measures will result in attainment of the standard (Attainment Demo)
- Other requirements in the Clean Air Act (CAA)

Additional Elements of the SIP

- Demonstration that the plan makes annual incremental progress towards attainment (RFP Demo)
- Emission inventories for NOx and VOC
- Budgets for NOx and VOC emissions from on-road mobile sources
- Measures that are triggered for additional emission reductions if the area does not meet deadlines to attain or meet RFP milestones (Contingency Measures)

Ex. (b)(5): Internal Deliberative

San Joaquin Valley Ozone State Implementation Plan (SIP)

Update for the Regional Administrator

July 11, 2018

Air Quality in San Joaquin Valley

Primary Air Pollutants of Concern

- Ozone (O_3)
- Fine particulate matter ($PM_{2.5}$)
- Coarse particulate matter (PM_{10})

Topography and weather
conducive to formation and
accumulation of pollution

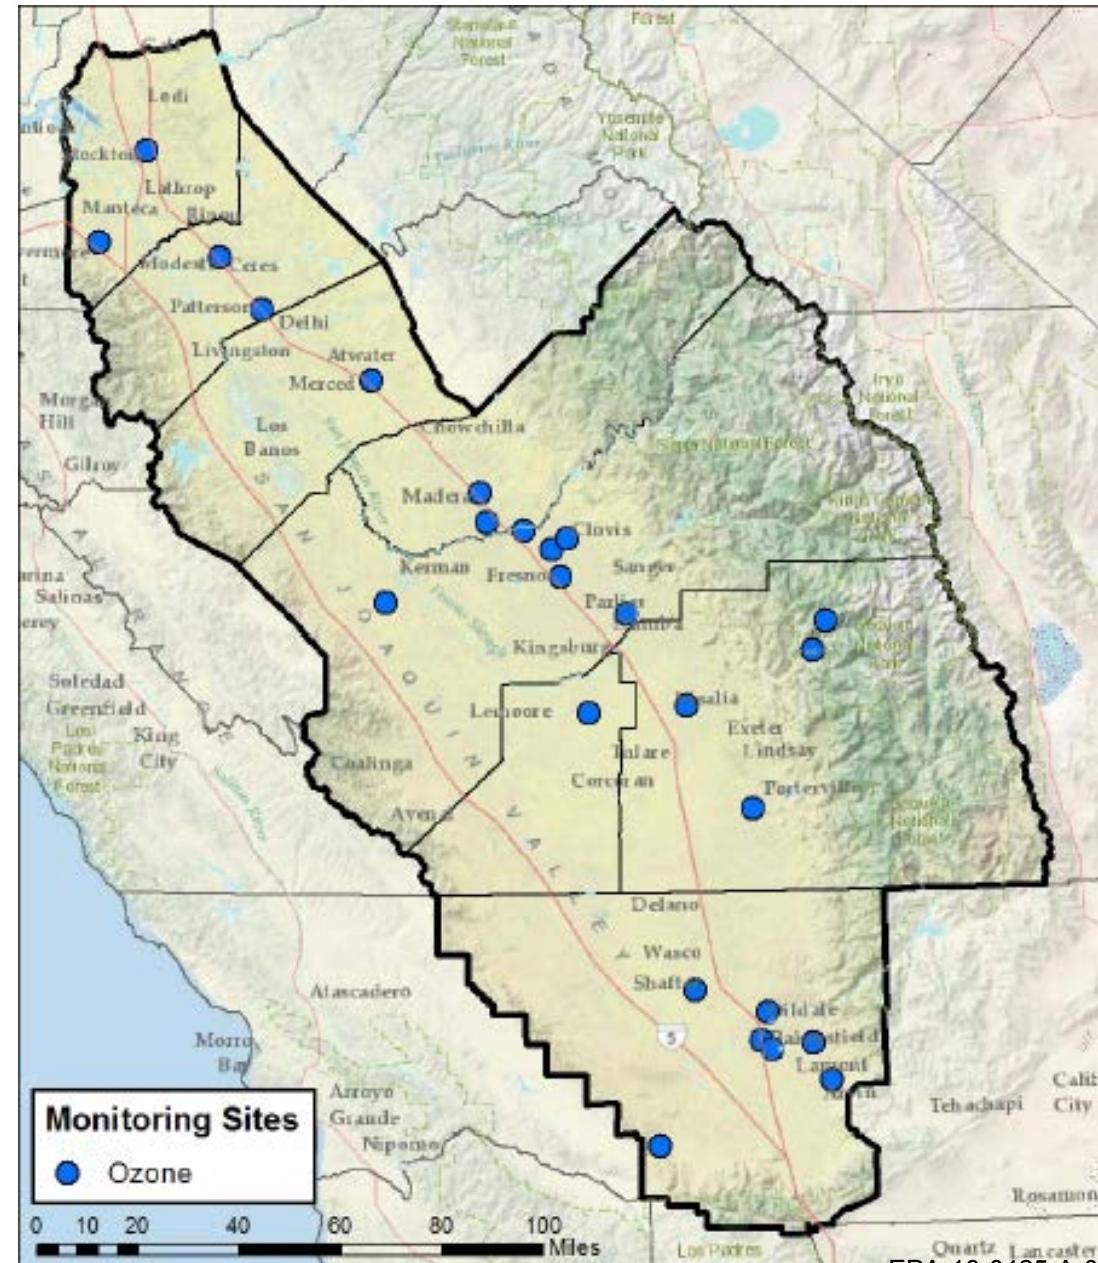

Diverse combination of sources

Ozone Nonattainment Area for
the 2008 Ozone NAAQS

SJV must show attainment by
2031

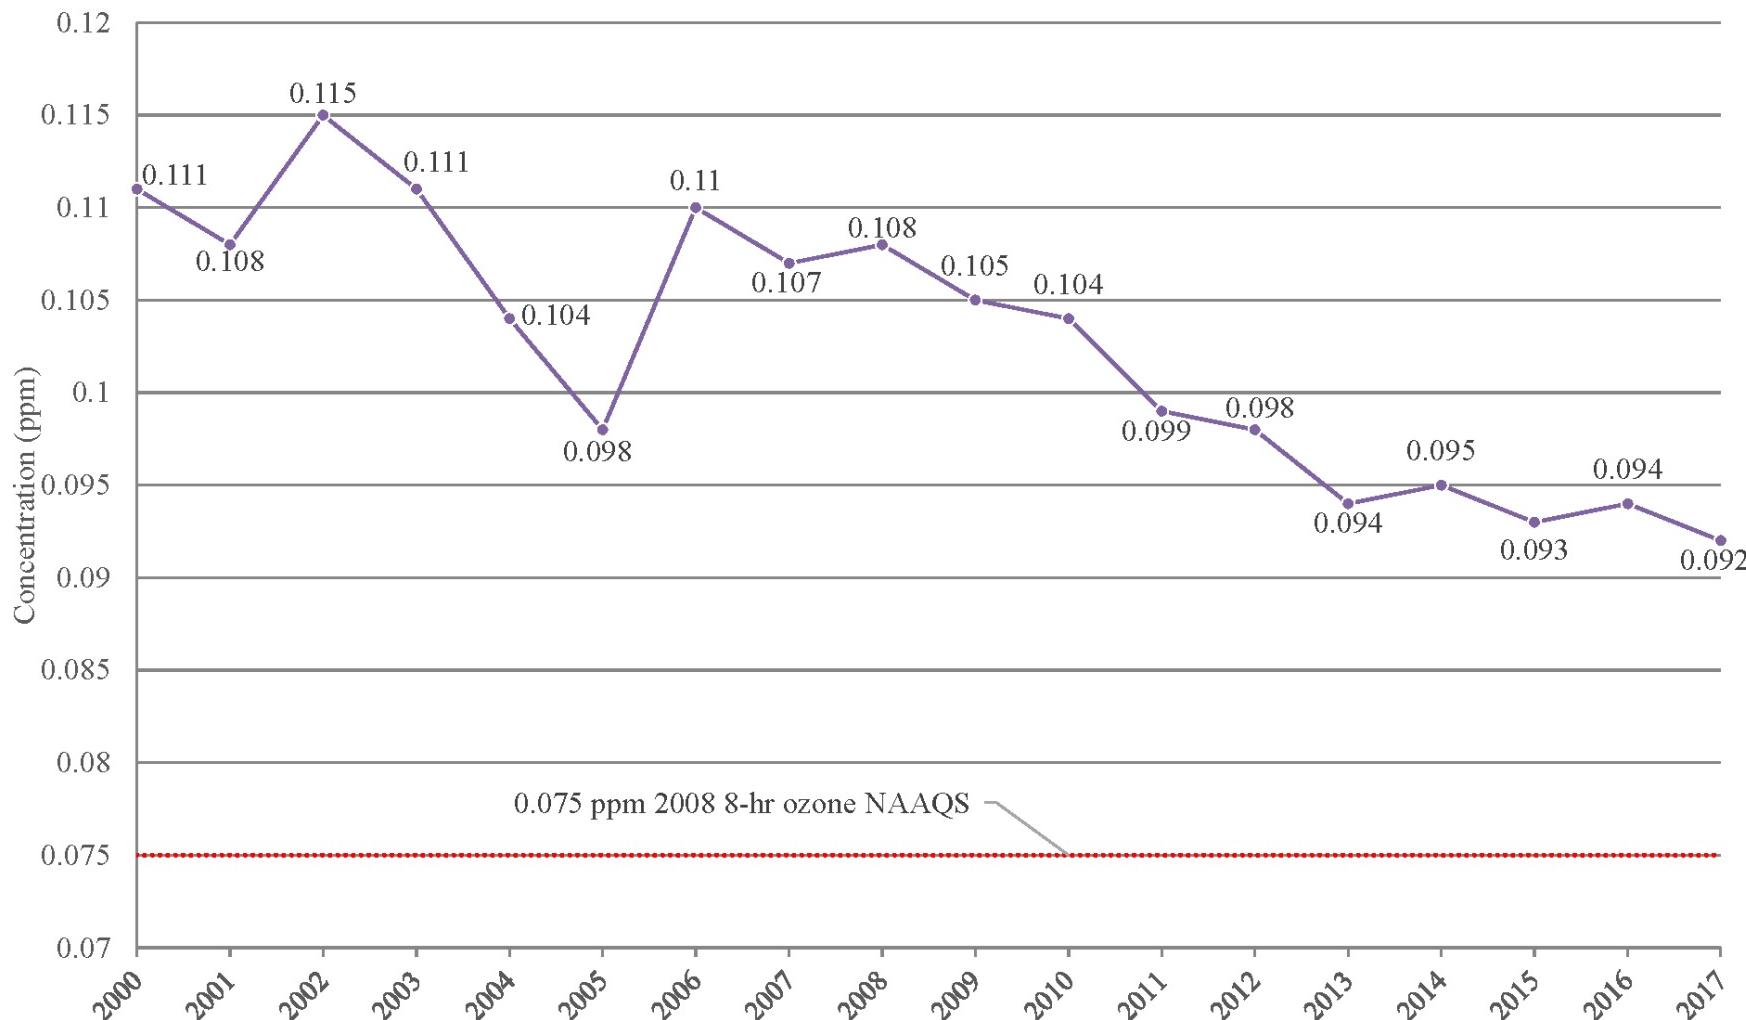

Ozone Monitors in the San Joaquin Valley

EPA-18-0425-A-000248

*SAN JOAQUIN VALLEY, CA 8-HOUR OZONE (O_3) NONATTAINMENT AREA
DESIGN VALUE CONCENTRATIONS, 2000-2017*

Source: US EPA's Office of Air Quality Planning and Standards and the Air Quality System (AQS) database (June 27, 2018).

The 2008 national ambient air quality standard (NAAQS) for 8-hour ozone is 0.075 parts per million (ppm). The design value is a calculation of each year's 4th-highest day's recorded values, averaged over a 3-year period at an air quality monitor. X-axis labels represent the last year of a monitor's 3 year time period. All invalid and exceptional event data (e.g., high winds and wildfires) that EPA has concurred on have been excluded from design value calculations.

AIR18079 - 2017 annual air quality update - ozone.xlsx (July 9, 2018)

EPA-18-0425-A-000249

State Implementation Plan (SIP) Requirements

Emission Reductions are the Core Elements of the SIP

- Federal, State, and Local Measures to reduce emissions
- Mobile sources; NOx is the driver
- Demonstration that area is implementing all reasonably available control measures (RACM Demo)
- Air Quality Modeling to show the measures will result in attainment of the standard (Attainment Demo)
- Other requirements in the Clean Air Act (CAA)

Additional Elements of the SIP

- Demonstration that the plan makes annual incremental progress towards attainment (RFP Demo)
- Emission inventories for NOx and VOC
- Budgets for NOx and VOC emissions from on-road mobile sources
- Measures that are triggered for additional emission reductions if the area does not meet deadlines to attain or meet RFP milestones (Contingency Measures)

Senior Leadership Council Engagement with States, Tribes, Local and Other Leaders
July 18, 2018 (1:00 pm – 4:25 pm)
EPA East 1153

FINAL AGENDA

Purpose: Identify strategies for how EPA can change the way we work with state, tribal, local, and other partners to strengthen cooperative federalism and shared governance in implementing the *FY 2018-FY 2022 EPA Strategic Plan*.

Outcome: EPA senior leadership will gain a better understanding of state, tribal, local, and other partner priority areas and will consider them in continuing to implement the *FY 2018- FY 2022 EPA Strategic Plan*.

Time	Topic	Speaker
1:00 – 1:15	Introductions & Opening Remarks	Andrew Wheeler, Acting Administrator
1:15 – 1:20	Meeting Purpose: Identify strategies for how EPA can work better together with state, tribal and local partners to strengthen cooperative federalism and shared governance in achieving results in key priority areas. Approach: Session leads will introduce the topic and discussion questions.	Henry Darwin, Acting Deputy Administrator
1:20 – 2:00	Permitting Topic Introduction: Henry Darwin, Acting Deputy Administrator <u>Discussion Questions</u> 1. What strategies can we employ to address permitting process improvement opportunities? 2. How can we better articulate shared goals and opportunities for permitting process improvement in the <i>FY 2020-2021 National Program Guidances</i> ?	EPA, State, Tribal, Local & Other Leaders
2:00 – 2:40	Lead Topic Introduction: Hayley Hughes, National Lead Coordinator <u>Discussion Questions</u> 1. What are best practices or what is currently working to reduce and/or prevent lead exposures in your community? 2. What recommendations do you have for building capacity, increasing public engagement, and fostering communication opportunities?	
2:40 – 2:55	Break	

2:55 – 3:35	<p>Superfund Topic Introduction: Steve Cook, Deputy Assistant Administrator for Office of Land and Emergency Management</p> <p>Discussion Questions</p> <ol style="list-style-type: none"> 1. Considering the work of the Superfund Task Force over the last year, what positive changes have you seen and what disappointments do you have? What suggestions do you have for EPA going forward as we complete implementing the Task Force recommendations? 2. Some sites have remedies installed 10+ years ago and include institutional controls (ICs) as part of the long-term remedy. How do we work together and with the local community on the following issues: <ol style="list-style-type: none"> a. Ensuring ICs are effective over the long term b. Addressing new (emerging) contaminants from these mature sites c. Communicate/discuss risks to newcomers to the community 	
3:35 – 4:15	<p>Non-Attainment Areas Topic Introduction: Bill Wehrum, Assistant Administrator for Office of Air and Radiation</p> <p>Discussion Questions</p> <ol style="list-style-type: none"> 1. EPA recognizes that states have primary responsibility for air pollution prevention and control. How can EPA best support states in preparing attainment plans and requests to redesignate areas from nonattainment? Are there tools, guidance, and technical assistance that will be critical to achieving clean air and to address interstate and international pollution? 2. As EPA looks at reforms to the way it sets and implements National Ambient Air Quality Standards, are there new flexibilities consistent with the Clean Air Act that would be particularly useful for you as a co-regulator and would achieve meaningful environmental protection? Are there resources or opportunities to engage state, local, and tribal co-regulators earlier in the process? 	
4:15 – 4:25	Wrap-Up and Next Steps	Andrew Wheeler, Acting Administrator

Meeting Attendees – State, Tribal, Local and Other Leaders

Environmental Council of States

Todd Parfitt	Director, WY DEQ & ECOS President
Becky Keogh	Director AR DEQ & ECOS Vice President
Jim Macy	Director NE DEQ & ECOS Secretary/Treasurer
John Linc Stine	Commissioner MN PCA & ECOS Past President
Pat Stevens	Assistant Deputy Secretary WI DNR & ECOS Planning Committee Chair
Sam Sankar	ECOS Executive Director
Carolyn Hanson	ECOS Deputy Director
Beth Graves	Executive Project Manager

National Tribal Caucus

Paula Britton	NTC Chair
Gerald Wagner	NTC Vice Chair
Scott Clow	NTC Secretary

Association of State and Territorial Health Officials

Dr. Larry Wolk	Executive Director & Chief Medical Officer, CDPHE
----------------	---

National Association of State Departments of Agriculture

Doug Goehring	ND Agriculture Commissioner & Second Vice President of NASDA
Jim Reese	OK Agriculture, Food, and Forestry Secretary

Local Government Advisory Committee

Brian Fulton	Jackson County, MS Administrator
Karen Freeman-Wilson	Mayor of Gary, IN
Dr. Hector Gonzalez	Director of City of Laredo Health Department

FY 2020 Budget and Planning Meeting
July 19, 2018 (8:30 am - 2:45 pm)
EPA East 1153

Purpose: Convene senior leaders from across the Agency to discuss budget priorities and the alignment of resources and FTE with the FY 2018 – FY 2022 Strategic Plan.

Outcome: Input from senior leaders to support the FY 2020 budget and multi-year resource planning, as well as FY 2019 where feasible.

Attendees: All senior EPA leaders (Acting Administrator, Acting Deputy Administrator, AAs, DAAs, RAs, DRAs)

Time	Topic	Speaker
8:30 – 8:45 (15 Minutes)	Introductions & Opening Remarks The Administrator will set the context for the day.	Andrew Wheeler, Acting Administrator
8:45 – 9:05 (20 Minutes)	Agency Priorities Henry Darwin will present strategic and reform priorities as context for budget and workforce discussions.	Henry Darwin, Acting Deputy Administrator
9:05 – 9:30 (25 Minutes)	Budget Context Presentation The CFO/DCFO will deliver a presentation on the Agency's budget to establish context for the day's discussions. Topics will include the status of Congressional action on FY 2019 and OMB guidance for FY 2020. Presentation will include relevant background information on resource trends including fixed costs, FTE levels and payroll requirements, as well as reform plan proposals and President's Management Agenda highlights that may impact budget. Will include Q&A.	Holly Greaves, Chief Financial Officer and David Bloom, Deputy CFO
9:30 – 11:30 (2 Hours)	Workforce Discussion and Alignment with Strategic Plan <i>Pre-Work: Attendees will be provided the guiding questions in advance to prepare. Input for session 1 only will be gathered in advance of the meeting.</i> Session 1 – Long-term Workforce Planning Purpose: Engage senior leaders on a strategic discussion of human capital. Focus will be on long term considerations and nearer-term actions for workforce and staffing to advance strategic priorities and support what	Facilitated Plenary Discussion

	<p>we heard from our external partners the day before.</p> <p>Guiding questions:</p> <ul style="list-style-type: none"> • What does the workforce need to advance the strategic priorities (i.e., tools, technology, training)? • Do we have the right people, with the right skills, in the right places? If not, how do we get there? • What about succession planning? Are we doing enough? Do we need to do anything differently? <p><i>Session 2 – FTE Alignment</i></p> <p>Purpose: Discuss the choices and flexibilities available within the current operating targets to optimize the alignment of FTE allocations with Strategic Plan objectives and priority work.</p> <p>Guiding questions:</p> <ul style="list-style-type: none"> • Within the FTE levels provided in the FY 2018 Enacted budget, what adjustments would programs make to best advance the Strategic Plan? • Given upcoming priorities and expected programmatic workload, are there red flag issues with the current allocation? 	
11:30 – 12:30 (1 Hour)	Lunch	
12:30 – 2:30 (2 Hours)	<p>FY 2020 and Multi-Year Funding Priorities to Advance the Strategic Plan</p> <p>Purpose: Identify challenges and opportunities to advance agency priorities in FY 2020 and out-years.</p> <p>CFO/DCFO will outline FY 2020 and multi-year planning approaches and initiate discussion. (15 minutes)</p> <p><i>Pre-Work: Attendees will be provided guiding questions and asked for input in advance to prepare. Programs will be asked to work together to develop initial ideas on potential multi-office and multi-year investments.</i></p> <p>Guiding Questions:</p> <ul style="list-style-type: none"> • If funding could help accelerate progress in an agency strategic priority what would that priority be? • What are the top multi-media investment areas – multi-year or shorter term - that could accelerate our progress? Are some ready for inclusion in FY 2020 	Facilitated Plenary Discussion

	<p>submission?</p> <ul style="list-style-type: none"> • Are there areas where the work has evolved and we should change our approach? • Within the amounts provided in the FY 2018 Enacted budget, are there problem areas which could cause us to not meet strategic priorities or work? 	
2:30 – 2:45 (15 Minutes)	Wrap-Up and Next Steps	Andrew Wheeler, Acting Administrator Henry Darwin, Acting Deputy Administrator

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

WASHINGTON, D.C. 20460

JUN 19 2018

OFFICE OF THE
CHIEF FINANCIAL OFFICER

MEMORANDUM

SUBJECT: Senior Leadership Council Meetings on State and Tribal Engagement and Budget and Planning

FROM: Holly W. Greaves, Chief Financial Officer
Office of the Chief Financial Officer

TO: General Counsel
Assistant Administrators
Inspector General
Chief of Staff
Associate Administrators
Regional Administrators

I look forward to seeing everyone at the Senior Leadership Council meeting on July 18-20, 2018, at the U.S. Environmental Protection Agency headquarters. On July 18, we will convene as a group in the afternoon with the leadership of the Environmental Council of States and the National Tribal Caucus, local government representatives, and other leaders. On July 19, we will hold the Budget and Planning Meeting. This session will facilitate discussion and planning for the upcoming FY 2020 OMB Submission as well as important longer-term strategic issues. The enclosed agenda outlines expectations and the schedule for these discussions.

The focus of the meeting is on achieving or accelerating progress toward our strategic objectives. To ensure we have productive conversations and make the best use of our time together, the agenda contains guiding questions for each session. We are seeking your input in advance of the meeting to inform our discussions. There may be some cases where funding will make a difference and accelerate progress. Therefore, we are asking you to work together to provide a limited set of ideas for multi-year, multi-media investments that cross program lines and would support progress in our strategic objectives and priorities. Additionally, we are asking for each national program manager and regional office to provide responses to a set of questions related to long-term workforce planning. These items will be due by July 3, 2018, and consolidated results of this data collection effort will be provided to you before the meeting.

In addition, please review the questions for the discussion with ECOS, tribes and other organizations on July 18 and the workforce discussions on July 19 shown on the agenda and come prepared to discuss them from both the EPA-wide perspective but also through the lens of your program or region. Details on the pre-work request will be provided in follow-on guidance from the Office of Budget and the Office of Planning, Analysis and Accountability.

Logistical information for the SLC was previously provided by the Office of Congressional and

Intergovernmental Relations. This information, including the agenda, is centrally available at the following [SharePoint link](#).

Should you have any questions on the Budget and Planning Meeting or this memo you may reach out to me or your staff may contact Beth Baden at baden.beth@epa.gov or (202) 564-7628.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

WASHINGTON, D.C. 20460

JUN 19 2018

OFFICE OF THE
CHIEF FINANCIAL OFFICER

MEMORANDUM

SUBJECT: Senior Leadership Council Meetings on State and Tribal Engagement and Budget and Planning

FROM: Holly W. Greaves, Chief Financial Officer
Office of the Chief Financial Officer

TO: General Counsel
Assistant Administrators
Inspector General
Chief of Staff
Associate Administrators
Regional Administrators

I look forward to seeing everyone at the Senior Leadership Council meeting on July 18-20, 2018, at the U.S. Environmental Protection Agency headquarters. On July 18, we will convene as a group in the afternoon with the leadership of the Environmental Council of States and the National Tribal Caucus, local government representatives, and other leaders. On July 19, we will hold the Budget and Planning Meeting. This session will facilitate discussion and planning for the upcoming FY 2020 OMB Submission as well as important longer-term strategic issues. The enclosed agenda outlines expectations and the schedule for these discussions.

The focus of the meeting is on achieving or accelerating progress toward our strategic objectives. To ensure we have productive conversations and make the best use of our time together, the agenda contains guiding questions for each session. We are seeking your input in advance of the meeting to inform our discussions. There may be some cases where funding will make a difference and accelerate progress. Therefore, we are asking you to work together to provide a limited set of ideas for multi-year, multi-media investments that cross program lines and would support progress in our strategic objectives and priorities. Additionally, we are asking for each national program manager and regional office to provide responses to a set of questions related to long-term workforce planning. These items will be due by July 3, 2018, and consolidated results of this data collection effort will be provided to you before the meeting.

In addition, please review the questions for the discussion with ECOS, tribes and other organizations on July 18 and the workforce discussions on July 19 shown on the agenda and come prepared to discuss them from both the EPA-wide perspective but also through the lens of your program or region. Details on the pre-work request will be provided in follow-on guidance from the Office of Budget and the Office of Planning, Analysis and Accountability.

Logistical information for the SLC was previously provided by the Office of Congressional and

Intergovernmental Relations. This information, including the agenda, is centrally available at the following [SharePoint link](#).

Should you have any questions on the Budget and Planning Meeting or this memo you may reach out to me or your staff may contact Beth Baden at baden.beth@epa.gov or (202) 564-7628.

**Senior Leadership Council Engagement Meeting
with States, Tribes, Local, And Other Leaders
July 18, 2018 (1:00 pm – 4:25 pm)
EPA East 1153**

Purpose: Identify strategies for how EPA can change the way we work with state, tribal, local, and other partners to strengthen cooperative federalism and shared governance in implementing the *FY 2018-FY 2022 EPA Strategic Plan*.

Outcome: EPA senior leadership will gain a better understanding of state, tribal, local, and other partner priority areas and will consider them in continuing to implement the *FY 2018- FY 2022 EPA Strategic Plan*.

Attendees:

- **EPA:** Deputy Administrator, Chief of Operations, Assistant Administrators, Deputy Assistant Administrators, Regional Administrators, Deputy Regional Administrators
- **Environmental Council of the States:** President, Vice-President, Secretary-Treasurer, Past President, Executive Director
- **National Tribal Caucus Executive Committee:** Chair, Vice-Chair, Secretary
- **National Association of State Departments of Agriculture:** President, Second Vice President, Secretary-Treasurer, At-Large, Western Region
- **Local Government Advisory Committee:** Chair, Small Communities Advisory Subcommittee Vice Chairman, 2 LGAC Members
- **Association of State and Territorial Health Officials:** President, Environmental Health Policy Committee Chair

Time	Topic	Speaker
1:00 – 1:15	Introductions & Opening Remarks	Scott Pruitt, Administrator
1:15 – 1:20	Meeting Purpose: Identify strategies for how EPA can work better together with state, tribal and local partners to strengthen cooperative federalism and shared governance in achieving results in key priority areas. Approach: Discussion leads will introduce the topic and discussion questions.	Henry Darwin, Chief of Operations
1:20 – 2:00	Permitting Topic Introduction: Henry Darwin, EPA Chief of Operations <u>Discussion Questions</u> 1. What strategies can we employ to address permitting process improvement opportunities? 2. How can we better articulate shared goals and opportunities for permitting process improvement in the FY 2020-2021 National Program Guidances?	EPA, State, Tribal, Local & Other Leaders

2:00 – 2:40	<p>Lead Topic Introduction: Hayley Hughes, National Lead Coordinator <u>Discussion Questions</u></p> <ol style="list-style-type: none"> 1. What are best practices or what is currently working to reduce and/or prevent lead exposures in your community? 2. What recommendations do you have for building capacity, increasing public engagement, and fostering communication opportunities? 	
2:40 – 2:55	Break	
2:55 – 3:35	<p>Superfund Topic Introduction: Steve Cook, Deputy Assistant Administrator for Office of Land and Emergency Management <u>Discussion Questions</u></p> <ol style="list-style-type: none"> 1. Considering the work of the Superfund Task Force over the last year, what positive changes have you seen and what disappointments do you have? What suggestions do you have for EPA going forward as we complete implementing the Task Force recommendations? 2. Some sites have remedies installed 10+ years ago and include institutional controls (ICs) as part of the long-term remedy. How do we work together and with the local community on the following issues? <ol style="list-style-type: none"> a. Ensuring ICs are effective over the long term b. Addressing new (emerging) contaminants from these mature sites c. Communicate/discuss risks to newcomers to the community 	
3:35 – 4:15	<p>Non-Attainment Areas Topic Introduction: Bill Wehrum, Assistant Administrator for Office of Air and Radiation <u>Discussion Questions</u></p> <ol style="list-style-type: none"> 1. EPA recognizes that states have primary responsibility for air pollution prevention and control. How can EPA best support states in preparing attainment plans and requests to redesignate areas from nonattainment? Are there tools, guidance, and technical assistance that will be critical to achieving clean air and to address interstate and international pollution? 2. As EPA looks at reforms to the way it sets and implements National Ambient Air Quality Standards, are there new flexibilities consistent with the Clean Air Act that would be particularly useful for you as a co-regulator and would achieve meaningful environmental protection? Are there resources or opportunities to engage state, local, and tribal co-regulators earlier in the process? 	
4:15 – 4:25	Wrap-Up and Next Steps	Andrew Wheeler, Deputy Administrator

FY 2020 Budget and Planning Meeting
July 19, 2018 (8:30 am - 2:45 pm)
EPA East 1153

Purpose: Convene senior leaders from across the Agency to discuss budget priorities and the alignment of resources and FTE with the FY 2018 – FY 2022 Strategic Plan.

Outcome: Input from senior leaders to support the FY 2020 budget and multi-year resource planning, as well as FY 2019 where feasible.

Attendees: All senior EPA leaders (DA, COO, AAs, DAAs, RAs, DRAs)

Time	Topic	Speaker
8:30 – 8:45 (15 Minutes)	Introductions & Opening Remarks The Administrator will set the context for the day.	Scott Pruitt, Administrator
8:45 – 9:05 (20 Minutes)	Agency Priorities Henry Darwin will present strategic and reform priorities as context for budget and workforce discussions.	Henry Darwin, Chief of Operations
9:05 – 9:30 (25 Minutes)	Budget Context Presentation The CFO/DCFO will deliver a presentation on the Agency's budget to establish context for the day's discussions. Topics will include the status of Congressional action on FY 2019 and OMB guidance for FY 2020. Presentation will include relevant background information on resource trends including fixed costs, FTE levels and payroll requirements, as well as reform plan proposals and President's Management Agenda highlights that may impact budget. Will include Q&A.	Holly Greaves, Chief Financial Officer and David Bloom, Deputy CFO
9:30 – 11:30 (2 Hours)	Workforce Discussion and Alignment with Strategic Plan <i>Pre-Work: Attendees will be provided the guiding questions in advance to prepare. Input for session 1 only will be gathered in advance of the meeting.</i> Session 1 – Long-term Workforce Planning Purpose: Engage senior leaders on a strategic discussion of human capital. Focus will be on long term considerations and nearer-term actions for workforce and staffing to advance strategic priorities and support what we heard from our external partners the day before. Guiding questions: <ul style="list-style-type: none"> • What does the workforce need to advance the strategic priorities (i.e., tools, technology, training)? • Do we have the right people, with the right skills, in the right places? If not, how do we get there? • What about succession planning? Are we doing enough? Do we need to do anything differently? 	Facilitated Plenary Discussion

	<p>Session 2 – FTE Alignment</p> <p>Purpose: Discuss the choices and flexibilities available within the current operating targets to optimize the alignment of FTE allocations with Strategic Plan objectives and priority work.</p> <p>Guiding questions:</p> <ul style="list-style-type: none"> • Within the FTE levels provided in the FY 2018 Enacted budget, what adjustments would programs make to best advance the Strategic Plan? • Given upcoming priorities and expected programmatic workload, are there red flag issues with the current allocation? 	
11:30 – 12:30 (1 Hour)	<p>Lunch</p>	
12:30 – 2:30 (2 Hours)	<p>FY 2020 and Multi-Year Funding Priorities to Advance the Strategic Plan</p> <p>Purpose: Identify challenges and opportunities to advance agency priorities in FY 2020 and out-years.</p> <p>CFO/DCFO will outline FY 2020 and multi-year planning approaches and initiate discussion. (15 minutes)</p> <p><i>Pre-Work: Attendees will be provided guiding questions and asked for input in advance to prepare. Programs will be asked to work together to develop initial ideas on potential multi-office and multi-year investments.</i></p> <p>Guiding Questions:</p> <ul style="list-style-type: none"> • If funding could help accelerate progress in an agency strategic priority what would that priority be? • What are the top multi-media investment areas – multi-year or shorter term - that could accelerate our progress? Are some ready for inclusion in FY 2020 submission? • Are there areas where the work has evolved and we should change our approach? • Within the amounts provided in the FY 2018 Enacted budget, are there problem areas which could cause us to not meet strategic priorities or work? 	Facilitated Plenary Discussion
2:30 – 2:45 (15 Minutes)	<p>Wrap-Up and Next Steps</p>	Andrew Wheeler, Deputy Administrator Henry Darwin, Chief of Operations

Reporter Danielle Venton. Her main questions are :

- What issues will be your priorities as head of Region 9? Why?

- What motivated you to want to take this job?

- How does your past experience prepare you for this job?

- What do you think is the biggest environmental problem facing California?

Attachments ICS Briefing for Mike Stoker July.11.2018.pptx
Reminder 15 minutes
Show Time As Busy
This briefing will provide a more in-depth review of the National Incident Management System/Incident Command System (NIMS/ICS),

how EPA fits into the federal structure and how the EPA regional leadership team interfaces with EPA headquarters and other federal agencies, during significant incident responses. The focus of this briefing is the use of ICS and policy/coordination groups during the large or high visibility incident, where regional resources are overwhelmed, the President issues a federal disaster declaration and EPA is activated by FEMA or the nature of the incident (ie, a terrorist attack) leads to high levels of scrutiny and public interest.

Main points:

- * NIMS/ICS provides a structure, terminology and doctrine that is well understood by the response community and provides a high level of 'interoperability' among various agencies.
- * ICS works well; the key is for everyone to stay within the system (ie, stay in their lane) and maintain confidence that the system will work; problems develop when people (at any level) short circuit the system.
- * EPA regions and headquarters have analogous policy and planning groups (National Incident Coordination Team and the Regional Incident Coordination Team) that can be used to facilitate the efficient use of Agency resources and assets. In the briefing we will describe how those pieces fit together.

Hi Mike,

Yes, we got it and I have everything you need. (Anytime an email includes “Leadership Deputy Regional Administrators” among the addressees, we have it.)

I'll give you your folder when I see you Wednesday.
Have a good day tomorrow.

Deborah

Deborah Jordan
Deputy Regional Administrator
U.S. EPA Region 9

Subject: Fwd: Senior Leadership Council: Budget Forum (times may vary) (SAVE THE DATE)

Alexis/Deborah,
Did you get this. I am going to assume I don't need to worry about this. (I haven't even opened attachments.) I assume Deborah is bringing copies of whatever important.

Michael Stoker
EPA Regional Administrator-Region 9

Time	3:30 PM – 6:00 PM
Subject	SLC Dinner
Location	Dock 79 - 79 Potomac Avenue, SE Washington DC
Show Time As	Busy
	Hi everyone – We hope you all can attend as it was a great time last year and a great opportunity to get to visit with your colleagues both old and new. We'll have similar fare as last year, appetizers, salad bar, pizza, dessert and beverages. The cost is \$25 per person. Please RSVP to Donna Vizian, Nancy Grantham or me know. Also let us know if you have any questions. Looking forward to seeing everyone! Robin

Directions:

Uber/Taxi – 79 Potomac Avenue, SE, Washington, DC – From Federal Triangle ~\$10-15.

Metro – Green line in the direction of Branch Avenue, Take the Navy Yard – Ballpark stop and walk down (toward the river) First Street, SE to Potomac Avenue.

Driving – From Federal Triangle - South on 12th St, NW, Take 9th St Expy and I-695 to South Capitol St, SW, Take the exit toward S. Capitol St/Nationals Park from I-695, Follow S capitol St SW and Potomac Ave SE to 79 Potomac Ave, SE.
